

**Domestic Fundamentals:****Market Outlook:**

*The kapas prices in Rajkot market stood steady at Rs. 4875/q. In Adoni market of Andhra Pradesh also the prices stood steady firm at Rs. 4592/q with 328 q of arrivals while the MCX spot price stood at Rs.15820/bale. ICE cotton futures fell more than 1% on Wednesday as farmers rushed to sell excess stocks in a bid to lock in prices given the uncertainty over future demand, especially from China.*

**News:** *An alert has been issued by the government that a possible attack of locust pest can damage the crops including cotton. The areas at borders of Punjab, Haryana and Rajasthan are likely to be more affected by this pest. Fazilka (villages of Roopnagar), Muktsar, Bhatinda and few areas of Abohar in Punjab followed by Barmer, Jaipur, Jaisalmer and Sriganganagar in Rajasthan and is likely to spread in Haryana also. If it is not controlled, then the pest attack would decline the yield of the crop.*

**The pace of cotton sowing in Punjab is in its peak as around 60-65% of cotton** *have already sown against the target of 5 lakh ha. The sowing likely to continue till May end but the late sown crop is prone to pest infestation. Around 3 lakh ha is already sown including 90,400 ha in Bhatinda followed by Fazilka 72,000 ha, Mansa 69,795 ha, Muktsar 65,600 ha and others contributing the area of 3,456 ha so far till 17<sup>th</sup> May.*

**Telangana is planning to increase cotton area by 50-55% this year in 2020-21 season.** *Last year Telangana produced cotton on area about 18 lakh ha while the CM told farmers to increase the area to around 28 lakh ha in 2020-21. The step is likely to be taken to discourage farmers to opt for excess water consuming crop paddy. While the huge surge in cotton area is difficult in such a short term as there should be sufficient supply of good quality seeds. Also, the farmers are not getting good returns as the prices (FAQ grade) are hovering around Rs. 4200-4700/q much below the MSP.*

**Cotton prices in India have fallen significantly and is ranging near 54-55 cents/lbs while ICE cotton ranging between 57-58 cents/lbs gaining strength** *because china still buying us cotton despite increasing tensions with USA despite of tensions between the two in last week. The Indian cotton is cheaper in the international market making a way for good exports. The industry already have signs of good demand from Bangladesh and China. It is possible that more contracts India might receive from Bangladesh, Vietnam and China in the coming days supporting the prices and rise over the expected range.*

**With subdued demand for yarn after the pandemic, India expects the yarn exports to fall by 18-20% in FY 2021,** *following with 25% decline in FY 2020. Starting from March, cotton yarn remained uncompetitive in global markets during much of the previous year. While the pickup in demand in yarn would be gradual in several months. China consumes 8- 10% of India's cotton yarn production, there is a supply glut that is likely to result in an increase in inventory in China due to the lack of demand. Of the total cotton yarn manufactured by India, 70-75% is consumed domestically, while 25-30% is exported to other countries; with China and Bangladesh (accounting for 50%).*

**The revival of textile industry seems very slow as all the labour force have been headed to their homes.** *The ginning mills are not working in its full capacity. Only 10% mills in Gujarat and around 20-25% mills in Maharashtra are working during the lockdown for 8-10 hours per day. And ginning mills are facing in the piling inventories due to the shortage of storage spaces and the stock is not being sold in the market due to the lack of demand. As 4th phase of lockdown is going to start after 18th May'20, if the government announces some ease in lockdown then there is possibility that purchasing power increases in the market and thus results in the liquidity of cotton in the industry.*

**The Cotton Corporation of India (CCI) has announced bulk discount for cotton bales with it from 2018-2019 and 2019-2020 cotton seasons.** *The discount scheme will be applicable for purchase of cotton pertaining to crop year 2018-19 & 2019-20 for the sales made from 4<sup>th</sup> May'20 till 31<sup>st</sup> May'20. The incentive for export could receive another boost as these incentives are implemented. The Cotton Association of India is requesting a 5-10% duty drawback on both yarn and fiber exports. The challenge is to provide incentive for spinners at a time of very uncertain demand. The fall in INR against USD and strength in ICE cotton futures has continued to increase the advantage of Indian cotton exports.*

**CCI continued buying cotton from the farmers while the demand for cotton remained very low in the market.** The functioning of ginning mills remained halted in many districts across India. Only few mills are working that falls under CCI. The mills are unable to operate with its full capacity due to lack of availability of labour around 20- 30% mills are working in Maharashtra while only 10% mills are working in Gujarat for around 8-10 hours. While only few mills are working in Adilabad of Telangana after the cotton procurement started in the district last week. Some ginners in Gujarat are able to get the export contracts from Vietnam, Bangladesh and China due to cheaper Indian cotton prices against the international cotton.

**The farmers in Vidarbha region are in distress after the isolated rains were reported in the region in the last few days and is expected to continue in the coming days also.** The farmers are facing problems in selling the cotton due to the unseasonal rains in the area. The farmers would likely to face difficulty as CCI buys only FAQ grade cotton while the rains are deteriorating the quality of cotton and the moisture content could exceed over 12%. The sowing time for cotton is likely arrive for which farmers need sufficient money to commence the sowing and CCI procurement is very sluggish. Therefore, farmers are forced to sell their produce to local traders and private ginners.

**Cotton area in Tamil Nadu is expected to increase but the farmers are uncertain that they will be paid a reasonable price** or not in the coming season. One of the reasons, all the textile mills are in financial crisis and all the factories have shut production of yarn came to halt. So, this would definitely affect the raw cotton procurement from the farmers until CCI gives assurance. The cost of production is cheaper while the returns in growing cotton is higher compared to paddy. Total cost would come around Rs. 30,000 per acre, while the return is Rs. 1.5 lakh.

### **Weather Forecast for tomorrow:**

Thunderstorm accompanied with lightning & gusty winds (speed reaching 30-40 kmph) likely at isolated places over Jammu & Kashmir, Ladakh, Gilgit-Baltistan, Muzaffarabad, Himachal Pradesh, Arunachal Pradesh, Assam & Meghalaya and Kerala & Mahe and with lightning at isolated places over Punjab, Haryana, Chandigarh & Delhi and Bihar. Heat wave conditions likely in isolated pockets over Uttar Pradesh, Rajasthan, Madhya Pradesh, Vidarbha, Coastal Andhra Pradesh & Yanam, Telangana and Rayalseema.

### **International Fundamentals:**

**Cotton futures gave back 22 to 99 points today, Jul 20 Cotton closed at 58.21, down 99 points.** The May 19th Cotlook A index was 70 points lower to 66.05c/lb. The AWP for cotton is 47.36 cents/lb through Thursday.

**The cotton trading has slightly improved after easing down the lockdown in Pakistan.** The demand has increased but the trading of yarn and cotton will fully resume after Ramazan and Eid holidays. A threat of locust infestation is prevailing on cotton in Pakistan. The sowing has completed in lower areas of Sindh while sowing is going on in upper areas of Sindh and many areas of Punjab. The farmers reported that the seed quality was not good that showed only 30 percent to 50 percent germination level.

**The world cotton market is suppressed after the rapid spread of Covid-19 has become pandemic.** There has been a decline in demand from across the world due to the closure of all non- essential businesses. China has commenced its spinning operations but the recovery rate is not satisfactory enough due to the lack of demand. The forecast for 2019-20 world cotton consumption dropped further by 5% to 104 million bales in May' 20 compared to April'20. USDA increased world consumption by 11 percent for the 2020-21 season to 116.46 million bales. The current forecast of world cotton demand is at 250 million bales, while the world cotton supply is at a relatively high level of 242 million bales. The ICE futures dropped to 55 cents/lbs in first week of May'20 from around 63 cents/lbs in March'20 first week.

**US textile and apparel total import was down by 12.6% year on year in Mar'20.** Imports from China were impacted as well from the port closures in February and March as the virus stormed through China. US imports from China fell 22.6%, and apparel imports only fell 42.6%. COVID-19 pandemic outbreak has affected on foreign trade, and the amount and quantity of China's textile and apparel imported by the United States have declined sharply. While an improvement in sale

of cotton is seen as China has started buying US cotton in the first week of May'20 that would help gain the cotton prices globally.

**Imported cotton yarn arrivals to China in Apr'20 are estimated at 132 kilo tonnes (kt), down 27.07% year on year and 27.47% month on month.** The shipments of Vietnamese cotton yarn are estimated at 62.7 kt, followed by Indian cotton yarn at 53.9 kt, Pakistani cotton yarn 23.6 kt, Uzbekistan cotton yarn at 7kt, Indonesian cotton yarn at 4 kt, in April month but not delivered as expected due to the breach of contracts. According to USDA, the total Demand decline to 34 million bales in May estimates compared to 35 mln bales in April estimates. Due to the reduced domestic as well as international demand, China is troubled facing dealing with huge inventory in the warehouses. Increase in the stock reserves China likely to end the year with higher ending stock at 36.25 million bales in 2019-20 MY.

**The US Export Sales report from USDA showed 370,300 RB for 2019-2020 in week ending 30<sup>th</sup> Apr'20 were down by 15% compared to previous week.** Increases primarily for China 217,500 RB, Vietnam 102,600 RB, Taiwan 18,300 RB, Bangladesh 10,900 RB, Turkey 10,300 RB and offset by reductions primarily from Mexico 7,000 RB, El Salvador 3,200 RB, Pakistan 2,800 RB. For 2020-2021, net upland sales of 55,900 RB were primarily for China 22,000 RB, Vietnam 11,400 RB, Turkey 6,600 RB, Mexico 5,000 RB. Net Upland Shipment for Exports of 370,300 RB were primarily to Vietnam 125,100 RB, China 56,500 RB, Turkey 51,500 RB, Pakistan 32,200 RB, Taiwan 23,700 RB.
