

Domestic Fundamentals:**Market Outlook:**

The Gujarat cotton price stood slightly firm at Rs.4680/q, up by Rs.10. In Adoni market of Andhra Pradesh, the prices stood firm at Rs. 4690/q, up by Rs.10. MCX cotton stood weak at Rs.15840/bale on Wednesday. ICE cotton futures hit one-month highs on Thursday after a positive weekly exports sales report.

News: *According to the trade sources, the Indian cotton exports for the June'20 were reported higher around 4.5 lakh bales, doubled compared to the prior month. In June'20, the Indian cotton prices were cheaper in the international market, therefore, the exports were increased during June. Bangladesh was the largest importer of Indian cotton purchasing around 2 lakh bales at an average FOB of \$1.46/kg followed by China (71,747 bales at \$1.29/kg), Vietnam (43,000 bales at \$1.25/kg) and Indonesia (20,000 bales at \$1.32/kg). The other export destinations of India were Korea, Turkey, Thailand & Italy.*

The immense rainfall in Punjab, seems to have destroyed over 4,000 ha area. *The reports said, 15-17% crop loss was reported in around 60 villages. The final assessment is yet to be done which will reveal the exact damage caused to cotton and other crops in Abohar, Fazilka and nearby areas. Although the area under cotton has increased by around 25% this year, but the continuous rains would decrease the cotton yield for the crop 2020-21.*

The Maharashtra government has procured over 7 lakh bales of cotton from 1.37 lakh farmers in the five districts of Nashik division under MSP. *After procurement, the state government has stocked 12,000 bales of cotton in Nashik district. Around 5 lakh bales of cotton were procured from Jalgaon district, followed by 98,000 bales from Ahmednagar district, 87,300 bales from farmers in Dhule and 86,100 lakh bales of cotton in Nandurbar district.*

Cotton Corporation of India (CCI) gave the priority in procuring cotton at guaranteed prices this year, *thus, CCI's maximum cotton procurement in Maharashtra was reported in Yavatmal district. A total of 55.695 lakh quintals of cotton has been procured from 2,69,534 farmers in Yavatmal district this season. 11.48 lakh quintals of cotton has been procured from 49,056 farmers in the district after the lockdown. Before the outbreak of corona, 44.21 lakh quintals of cotton was purchased from 2,20,478 lakh farmers in the district.*

In the recent report published by Cotton Association of India (CAI), increased the its cotton crop estimate for 2019-20 to 335.50 lakh bales *compared to its previous estimate of 330 lakh bales made during the last month. The estimate of the cotton imports and exports has been maintained by the CAI at the same level as estimated in the previous month i.e. at 15.00 lakh bales and 47 lakh bales, respectively. According to CAI, Indian cotton arrivals during the months of October 2019 to June 2020 are estimated at 327.02 lakh bales till June.*

Cotton Corporation of India (CCI) reported that there has been slight improvement in demand after the unlocking has been initiated since June month. *CCI sold around 9 lakh bales of ginned cotton out of 113 lakh bales cotton i.e., the total procured cotton in 2019-20 season including previous year's stock (9 lakh bales). CCI expects the exports of around 15-20 lakh bales would soon be finalized and shipped. The main importing countries that India is getting orders from Bangladesh, Vietnam, Indonesia and Turkey. According to the market sources, majority of the business is captured by big traders and spinning mill operators. Most spinning mills were now functioning between 50 to 60% capacity.*

Heavy rainfall in Haryana in 80-100 villages of Hisar, Fatehabad, Bhiwani, Jind and Charkhi Dadri districts were inundated. *Farmers fear that the cotton crop grown over 6,000 acres in Hisar district may be damaged. Fatehabad villages adjoining the Ghaggar in Tohana and Ratia are submerged in water. According to the state Agriculture officials, cotton fields across 6,000 acres in Hisar and 3,600 acres in Fatehabad had been submerged.*

In Tamil Nadu, since first week of June, over 18,000 bales cotton which is 40% of the total arrivals was purchased by CCI this year. *They have also tied up with ginning units so that the cotton procured is moved from the markets to the ginning*

units in a week. More private traders stepped in and they have procured the remaining 60% even if the moisture content is slightly high.

With the advancement in rainfall, India received around 388 mm rainfall in July, up by 6% from normal rainfall. **Cotton area across India covered around 118 lakh ha as on 24th July'20 for 2020-21 marketing year**, up by around 22% during the same period of time last year. The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) has been almost completed (covering 19.02 lakh ha). In Maharashtra the acreage increased to 40.78 lakh ha while in Gujarat the area is near about same at 21.48 lakh ha compared to corresponding time last year. AP and Telangana received 67% and 35% higher rainfall in July, thus, a surge in acreage is reported in both the states covering 3.42 lakh ha (+121%) and 21.09 lakh ha (+56%), respectively.

Cotton fields are prone to damage due to continuous rains since last three days in Punjab. The cotton crop does not sustain for more than two days of stagnating water. Therefore, crops in few areas in Bhatinda and Mansa have started showing wilting symptoms. As the crop has reached near flowering stage in both the areas, the yield loss might increase if the area receives continuous rainfall in the coming days. The crop condition in Fazilka, Muktsar and Faridkot is also worrisome with heavy rainfall.

According to the ICRA's forecast, revenue of India's cotton spinning sector will decline by 25-30% during 2020-21 due to the virus, and recovery will be slow. The reason behind it is that the demand has been sluggish after the pandemic affected the global economy. Also, the reduced offtake of cotton yarn and fibre exports reduced as a result of the China and India dispute.

On 20th Jul'20, CCI sold around 4.5 lakh bales of cotton in three phases of auction. In North India, Punjab purchased 44,000 bales followed by Haryana (12,500 bales) and Rajasthan (16,000 bales). In Central India, the maximum purchase was reported from Maharashtra (2.17 lakh bales), followed by Gujarat (0.715 bales) and Madhya Pradesh (8,500 bales). In South India, CCI sold 20,000 bales in Telangana, 8,900 bales in Karnataka and 1200 bales in Guntur, AP.

Weather Forecast for tomorrow:

Heavy to very heavy rainfall at isolated places over Andaman & Nicobar Islands, Konkan & Goa and Coastal Karnataka and heavy rainfall at isolated places over Himachal Pradesh, Uttarakhand, Uttar Pradesh, East Rajasthan, Madhya Pradesh, Chhattisgarh, Saurashtra & Kutch, Madhya Maharashtra, Telangana, South Interior Karnataka, Tamilnadu, Puducherry & Karaikal and Kerala & Mahe.

International Fundamentals:

Cotton futures settled the Thursday session with triple digit gains in the front months, OCT 19 Cotton closed at 62.66, up 163 points. The July 29 Cotlook A index was steady at 66.55 cents/lb. The week's new AWP from FSA is 47.71 cents/lb, down 133 points from last week.

U.S. Export Sales was slightly good. Net sales of 118,700 RB for 2019/2020 were up noticeably from the previous week and from the prior 4-week average. Increases for Vietnam (76,500 RB), China (22,100 RB), Bangladesh (17,600 RB), Turkey (4,000 RB), Brazil (3,900 RB), were more than offset by reductions primarily for Ecuador (3,900 RB), Pakistan (2,500 RB), Mexico (2,100 RB), Philippines (1,900 RB), India (1,800 RB).

The demand at the Chinese Reserve auctions has remained good, with sales now exceeding 100,000 tons since the auctions begun in first week this month, which implies increased mill use. A survey shows Chinese spinners were operating at more than 60% of capacity. Cotton use has recovered slightly and is steady, but the yarn and fabric sector are still suffering from weak apparel exports due to which the cotton yarn prices are weak.

The Pakistan kapas prices stood slightly firm compared to the previous week but less than 1%. The kapas supply has increased in the market. The supply of Kapas was coming from the lower areas of Sindh while it has been also started in limited amount from some areas of Punjab. The kapas in Sindh was affected due to the rains in some cotton producing areas a week ago. A new spell of rains in many cotton producing areas of Sindh may affect the quality and picking of the cotton. However, rains are beneficial for the crop at this stage, but if there will be more rains, water accumulated in the fields may damage the crop.

According to the latest WASDE report released by USDA, the U.S. 2020-21 production forecast was revised, which fell 2.0 million bales to 17.5 million bales. Also, the U.S. export forecast for 2020-21 was lowered to 15.0 million bales, down one million bales from June. 2019-20 exports were increased 2 lakh bales, so 2020-21 beginning stocks declined to 7.1 million bales. In total, the USDA reduced expected ending stocks for 2020-21 by 1.2 million bales to 6.8 million.

According to USDA, the global production is reduced by around 5.5% y-o-y to 116.25 million bales in 2020-21 marketing year. Also, the world imports and exports were reduced by 2% to 41.84 million bales and 41.81 million bales, respectively from the previous month's estimate. With the reduction in world cotton production and lowering the imports & exports, the ending stocks were reduced by 1.8% to 102.77 million bales in the 2020-21 marketing year. Production is lowered for the United States, Turkey, and Tanzania, and a small rise in Pakistan. Consumption is lowered by only 1.2 lakh bales to 114.29 million bales.
