

Domestic Fundamentals:**Market Outlook:**

The Gujarat cotton price stood weaker at Rs.4725/q, down by Rs.25. MCX cotton August contract stood firm at Rs.16470/bale on Friday. ICE cotton futures declined on Friday on dull trading activities.

News: CCI sold around 16 lakh bales in August month so far and totaling to around 22 - 23 lakh bales (2019-20 crop) this season. Due to the weak logistic system by CCI, therefore, the buyers are facing delay in delivery. If the frequency of sales continues with the present trend, then there is possibility that CCI could sale another 25 lakh bales by the end of September'20, hence improving the liquidity in the market.

After the heavy rainfall in Punjab that left the crop wilted in some areas, hot and humid weather conditions have now led to pest infestation. Presence of sucking pest has been reported in some parts of Mansa, and Fazilka district left the farmers worried. The state Agriculture Department has alerted the farmers to spray pesticide as per the requirement to avoid the spread of the pests. However, the estimated area under cotton is 5 lakh hectares this year, up from 3.92 lakh hectares in 2019.

CCI has offered bulk discounts to encourage cotton sales started since June and also reduced the base prices. So far, about 15 lakh bales have been sold under the bulk discount scheme till 5th Aug'20. CCI is offering over 8 lakh bales (2019-20 crop) cotton per day for sale. According to the market sources, the ginners are having enough stock with them, therefore, the sale is slow. According to the traders, CCI can sell about 35-45 lakh bales of cotton by the end of the season out of the total procured cotton of 105 lakh bales in 2019-20.

Although the country is expecting an increase in cotton area by 5% but there are possibilities in decline in the yield. The continuous rainfall across the country could cause damage as cotton crop does not sustain for more than two days of stagnating water. Also, the cotton crop in Marathwada and Vidarbha region (41.8 lakh ha) in Maharashtra has started flowering that was sown in early June. Thus, the early signs of pink bollworm infestation was noticed in the fields. Aurangabad, Jalna and Beed, the main cotton growing areas (over 15.9 lakh hectare area is under cotton cultivation) in the Marathwada region have found some traces of pink bollworm as the bud formation has started. The government has issued an alert to the farmers to take precautionary measures against the attack of pink bollworm on the cotton crop.

Cotton area across India covered around 121.25 lakh ha as on 31st July'20 for 2020-21 marketing year, down by around 5% compared to the total acreage under cotton last year. The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) covered an area of 19.12 lakh ha. In Maharashtra the acreage increased to 41.19 lakh ha while in Gujarat the area is near about same at 22.16 lakh ha compared to corresponding time last year. AP and Telangana received 58% and 26% higher rainfall in July, thus, a surge in acreage is reported in both the states covering 4.24 lakh ha (+84%) and 21.71 lakh ha (+37%), respectively.

According to the trade sources, the Indian cotton exports for the June'20 were reported higher around 4.5 lakh bales, doubled compared to the prior month. In June'20, the Indian cotton prices were cheaper in the international market, therefore, the exports were increased during June. Bangladesh was the largest importer of Indian cotton purchasing around 2 lakh bales at an average FOB of \$1.46/kg followed by China (71,747 bales at \$1.29/kg), Vietnam (43,000 bales at \$1.25/kg) and Indonesia (20,000 bales at \$1.32/kg). The other export destinations of India were Korea, Turkey, Thailand & Italy.

The immense rainfall in Punjab, seems to have destroyed over 4,000 ha area. The reports said, 15-17% crop loss was reported in around 60 villages. The final assessment is yet to be done which will reveal the exact damage caused to cotton and other crops in Abohar, Fazilka and nearby areas. Although the area under cotton has increased by around 25% this year, but the continuous rains would decrease the cotton yield for the crop 2020-21.

The Maharashtra government has procured over 7 lakh bales of cotton from 1.37 lakh farmers in the five districts of Nashik division under MSP. After procurement, the state government has stocked 12,000 bales of cotton in Nashik district. Around 5 lakh bales of cotton were procured from Jalgaon district, followed by 98,000 bales from Ahmednagar district, 87,300 bales from farmers in Dhule and 86,100 lakh bales of cotton in Nandurbar district.

Cotton Corporation of India (CCI) gave the priority in procuring cotton at guaranteed prices this year, thus, CCI's maximum cotton procurement in Maharashtra was reported in Yavatmal district. A total of 55.695 lakh quintals of cotton has been procured from 2,69,534 farmers in Yavatmal district this season. 11.48 lakh quintals of cotton has been procured from 49,056 farmers in the district after the lockdown. Before the outbreak of corona, 44.21 lakh quintals of cotton was purchased from 2,20,478 lakh farmers in the district.

In the recent report published by Cotton Association of India (CAI), increased the its cotton crop estimate for 2019-20 to 335.50 lakh bales compared to its previous estimate of 330 lakh bales made during the last month. The estimate of the cotton imports and exports has been maintained by the CAI at the same level as estimated in the previous month i.e. at 15.00 lakh bales and 47 lakh bales, respectively. According to CAI, Indian cotton arrivals during the months of October 2019 to June 2020 are estimated at 327.02 lakh bales till June.

Cotton Corporation of India (CCI) reported that there has been slight improvement in demand after the unlocking has been initiated since June month. CCI sold around 9 lakh bales of ginned cotton out of 113 lakh bales cotton i.e., the total procured cotton in 2019-20 season including previous year's stock (9 lakh bales). CCI expects the exports of around 15-20 lakh bales would soon be finalized and shipped. The main importing countries that India is getting orders from Bangladesh, Vietnam, Indonesia and Turkey. According to the market sources, majority of the business is captured by big traders and spinning mill operators. Most spinning mills were now functioning between 50 to 60% capacity.

Heavy rainfall in Haryana in 80-100 villages of Hisar, Fatehabad, Bhiwani, Jind and Charkhi Dadri districts were inundated. Farmers fear that the cotton crop grown over 6,000 acres in Hisar district may be damaged. Fatehabad villages adjoining the Ghaggar in Tohana and Ratia are submerged in water. According to the state Agriculture officials, cotton fields across 6,000 acres in Hisar and 3,600 acres in Fatehabad had been submerged.

Weather Forecast for tomorrow:

Heavy to very heavy rainfall with extremely heavy falls very likely at isolated places over Odisha; Heavy to very heavy rainfall at isolated places over Himachal Pradesh, Punjab, Haryana, Chandigarh & Delhi, West Uttar Pradesh, Coastal Karnataka and Kerala & Mahe and heavy rainfall at isolated places over Jammu & Kashmir, Ladakh, Gilgit-Baltistan, Muzaffarabad, Uttarakhand, East Uttar Pradesh, Rajasthan, Madhya Pradesh, Vidarbha, Chhattisgarh, Jharkhand, West Bengal & Sikkim, Arunachal Pradesh, Assam & Meghalayan, Nagaland, Manipur, Mizoram & Tripura, Gujarat Region, Konkan & Goa, North Coastal Andhra Pradesh & Yanam, Telangana, South Interior Karnataka and Tamilnadu, Puducherry & Karaikal.

International Fundamentals:

Cotton Futures ended Friday session with loss of 2.53 points, Oct 20 Cotton is at 64.74. The Cotlook A index was back up by 50 points to 70.85 cents/lb.

China cotton yarn imports are estimated to increase by 7.4% to 1.51 LT in Jul'20 compared to the previous month. According to foreign shipment data in June, cotton yarn imports of China from Vietnam in Jul are estimated at 70,400 tonnes followed by India 20,000 tonnes, from Pakistan 25,200 tonnes, Uzbekistan 15,000 tonnes, and from other regions and countries at 20,000 tonnes. It is expected that the demand in August likely to remain stagnant as the operating rate of fabric mills declined. The high inventory and lack of demand may put pressure on yarn prices in the country.

The United States Department of Agriculture's weekly crop progress report showed 45% of the crop in good/excellent condition, compared with 54% a year ago. Hot temperatures returned in West Texas on Tuesday with most of the region above 100 degrees Fahrenheit, according to a National Weather Service bulletin.

U.S. Export Sales was recorded down from last week record. Net UPLAND sales 68,500 RB for 2019/2020 were down noticeably from the previous week and from the prior 4-week average. Increases primarily for Egypt (5,800 RB switched from Turkey), Malaysia (1,400 RB switched from Indonesia), and China (600 RB), were more than offset by reductions primarily for Vietnam (61,300 RB), Turkey (5,900 RB), South Korea (3,500 RB), El Salvador (2,100 RB), and Indonesia (1,800 RB). For 2020/2021, net sales of 130,800 RB were primarily for China (46,900 RB), Vietnam (22,100 RB), Indonesia (13,000 RB), Bangladesh (11,000 RB), and Pakistan (8,200 RB). Exports of 346,800 RB were up 8 percent from the previous week and 13 percent from the prior 4-week average. Exports were primarily to China (116,700 RB), Vietnam (103,300 RB), Pakistan (28,900 RB), Turkey (21,200 RB), and Bangladesh (18,500 RB). No net sales of Pima for 2020/2021 were reported for the week. For 2020/2021, net sales of 13,300 RB were primarily for El Salvador (2,600 RB), India (2,500 RB), Austria (2,100 RB), Pakistan (2,100 RB), and Bangladesh (1,100 RB). Exports of 16,300 RB were up noticeably from the previous week and from the prior 4-week average. The destinations were primarily to India (6,600 RB), China (5,200 RB), Djibouti (2,200 RB), Pakistan (1,000 RB), and Peru (900 RB).

Australia is facing with continuous dry conditions since last year. The 2020-21 forecast is for a recovery in cotton production to 1.7 million bales, from a revised estimate of 0.625 million bales in 2019-20. As, the drought affected cotton growing States have received above average rainfall this year. However, it will still be the second smallest crop in a decade. As an advantage, Australia the only country that was spared stockpiling pressure due to the pandemic which is expected around 0.512 million bales in 2019-20, down by 64% y-o-y. China is the main export market for Australia which so far in 2019-20 has accounted for nearly two-thirds (65%) of total exports.

Pakistan cotton prices remained weaker by around 2% during last week mainly because quality of kapas as well as supply was affected due to the monsoon rains. Also, the downward trend was witnessed in the international market. The sowing area of cotton was decreased by 20 percent. The major reason for the decrease in the production of cotton is unavailability of good quality seeds.

The demand at the Chinese Reserve auctions has remained good, with sales now exceeding 100,000 tons since the auctions begun in first week this month, which implies increased mill use. A survey shows Chinese spinners were operating at more than 60% of capacity. Cotton use has recovered slightly and is steady, but the yarn and fabric sector are still suffering from weak apparel exports due to which the cotton yarn prices are weak.
