

Domestic Fundamentals:**Market Outlook:**

The Gujarat cotton physical market is closed today. MCX cotton August contract stood firm at Rs.16430/bale on Friday. ICE cotton futures rose on Thursday.

News: The continuous heavy rainfall in Punjab and Haryana left the cotton fields under submerged condition. Crop on nearly 50,000 acres in Haryana has been reported under 2 feet stagnant water condition for 2-3 days. Cotton crop on 5,000 to 6,000 acres had got destroyed in Hisar district as reported by the state official. The other districts: Bhiwani and Jind are also likely to have affected due to rains. Also, the presence of sucking pest has been reported in some parts of Mansa, and Fazilka district of Punjab.

With the context of favourable weather in India and increased area, USDA has increased the India's production estimates 38.04 million bales (170kg per bale) in 2020-21, up by 4% from previous month's estimates. While the import trade has been reduced to 1.28 million bales from 1.41 million bales in the previous month. As the recovery in revival of the cotton industry has been sluggish, the domestic use was also declined to 28.8 million bales in Aug'20 estimates from 29.46 million bales (Jul'20 estimates). Therefore, the assumptions are made that there would be higher ending stock 28.83 million bales compared to previous month's estimates (27.29 million bales) as well as from 2019-20 (24.60 million bales).

The cotton farmers in Jalgaon district of Maharashtra are also worried as signs of Pink Bollworm (PBW) infestation have been reported in 30-40% of the planted crop. The 70-80% crop is now in the flowering stage, the most vulnerable stage for bollworm attack. According to Cotton Association of India, cotton was sown on 5.25 lakh hectare in the region and PBW infestation has been reported on nearly 1.25-1.50 lakh hectare. Also, the early signs of pink bollworm infestation was noticed in the fields of Marathwada and Vidarbha region earlier in the month.

Cotton area across India covered around 123.63 lakh ha as on 6th Aug'20 for 2020-21 marketing year, down by around 3.2% compared to the total acreage under cotton last year. The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) covered an area of 19.11 lakh ha. In Maharashtra the acreage increased to 41.37 lakh ha while in Gujarat the area is near about same at 22.48 lakh ha, down by -9% compared to corresponding time last year. In AP and Telangana, a surge in acreage is reported in both the states covering 4.75 lakh ha (+13.9%) and 22.77 lakh ha (+32.1%), respectively.

CCI sold around 16 lakh bales in August month so far and totaling to around 22 - 23 lakh bales (2019-20 crop) this season. Due to the weak logistic system by CCI, therefore, the buyers are facing delay in delivery. If the frequency of sales continues with the present trend, then there is possibility that CCI could sale another 25 lakh bales by the end of September'20, hence improving the liquidity in the market.

After the heavy rainfall in Punjab that left the crop wilted in some areas, hot and humid weather conditions have now led to pest infestation. Presence of sucking pest has been reported in some parts of Mansa, and Fazilka district left the farmers worried. The state Agriculture Department has alerted the farmers to spray pesticide as per the requirement to avoid the spread of the pests. However, the estimated area under cotton is 5 lakh hectares this year, up from 3.92 lakh hectares in 2019.

CCI has offered bulk discounts to encourage cotton sales started since June and also reduced the base prices. CCI is offering over 8 lakh bales (2019-20 crop) cotton per day for sale. According to the market sources, the ginner are having enough stock with them, therefore, the sale is slow. According to the traders, CCI can sell about 35-45 lakh bales of cotton by the end of the season out of the total procured cotton of 105 lakh bales in 2019-20.

Although the country is expecting an increase in cotton area by 5% but there are possibilities in decline in the yield. The continuous rainfall across the country could cause damage as cotton crop does not sustain for more than two days of stagnating water. Also, the cotton crop in Marathwada and Vidarbha region (41.8 lakh ha) in Maharashtra has started

flowering that was sown in early June. Thus, the early signs of pink bollworm infestation was noticed in the fields. Aurangabad, Jalna and Beed, the main cotton growing areas (over 15.9 lakh hectare area is under cotton cultivation) in the Marathwada region have found some traces of pink bollworm as the bud formation has started. The government has issued an alert to the farmers to take precautionary measures against the attack of pink bollworm on the cotton crop.

According to the trade sources, the Indian cotton exports for the June'20 were reported higher around 4.5 lakh bales, doubled compared to the prior month. In June'20, the Indian cotton prices were cheaper in the international market, therefore, the exports were increased during June. Bangladesh was the largest importer of Indian cotton purchasing around 2 lakh bales at an average FOB of \$1.46/kg followed by China (71,747 bales at \$1.29/kg), Vietnam (43,000 bales at \$1.25/kg) and Indonesia (20,000 bales at \$1.32/kg). The other export destinations of India were Korea, Turkey, Thailand & Italy.

The immense rainfall in Punjab, seems to have destroyed over 4,000 ha area. The reports said, 15-17% crop loss was reported in around 60 villages. The final assessment is yet to be done which will reveal the exact damage caused to cotton and other crops in Abohar, Fazilka and nearby areas. Although the area under cotton has increased by around 25% this year, but the continuous rains would decrease the cotton yield for the crop 2020-21.

The Maharashtra government has procured over 7 lakh bales of cotton from 1.37 lakh farmers in the five districts of Nashik division under MSP. After procurement, the state government has stocked 12,000 bales of cotton in Nashik district. Around 5 lakh bales of cotton were procured from Jalgaon district, followed by 98,000 bales from Ahmednagar district, 87,300 bales from farmers in Dhule and 86,100 lakh bales of cotton in Nandurbar district.

Cotton Corporation of India (CCI) gave the priority in procuring cotton at guaranteed prices this year, thus, CCI's maximum cotton procurement in Maharashtra was reported in Yavatmal district. A total of 55.695 lakh quintals of cotton has been procured from 2,69,534 farmers in Yavatmal district this season. 11.48 lakh quintals of cotton has been procured from 49,056 farmers in the district after the lockdown. Before the outbreak of corona, 44.21 lakh quintals of cotton was purchased from 2,20,478 lakh farmers in the district.

In the recent report published by Cotton Association of India (CAI), increased the its cotton crop estimate for 2019-20 to 335.50 lakh bales compared to its previous estimate of 330 lakh bales made during the last month. The estimate of the cotton imports and exports has been maintained by the CAI at the same level as estimated in the previous month i.e. at 15.00 lakh bales and 47 lakh bales, respectively. According to CAI, Indian cotton arrivals during the months of October 2019 to June 2020 are estimated at 327.02 lakh bales till June.

Cotton Corporation of India (CCI) reported that there has been slight improvement in demand after the unlocking has been initiated since June month. CCI sold around 9 lakh bales of ginned cotton out of 113 lakh bales cotton i.e., the total procured cotton in 2019-20 season including previous year's stock (9 lakh bales). CCI expects the exports of around 15-20 lakh bales would soon be finalized and shipped. The main importing countries that India is getting orders from Bangladesh, Vietnam, Indonesia and Turkey. According to the market sources, majority of the business is captured by big traders and spinning mill operators. Most spinning mills were now functioning between 50 to 60% capacity.

Heavy rainfall in Haryana in 80-100 villages of Hisar, Fatehabad, Bhiwani, Jind and Charkhi Dadri districts were inundated. Farmers fear that the cotton crop grown over 6,000 acres in Hisar district may be damaged. Fatehabad villages adjoining the Ghaggar in Tohana and Ratia are submerged in water. According to the state Agriculture officials, cotton fields across 6,000 acres in Hisar and 3,600 acres in Fatehabad had been submerged.
