

**Domestic Fundamentals:****Market Outlook:**

The Gujarat cotton physical market closed remain in steady to firm zone today after lower supplies in the market. MCX cotton October contract stood higher at Rs.17950/bale on Tuesday. ICE cotton futures closed in green on Monday.

**News:** As the advancement of rainfall in Maharashtra, Karnataka, Gujarat (Saurashtra), few areas in Madhya Pradesh & Telangana, and coastal AP is expected by IMD in the coming 2 weeks, therefore, the arrivals from the central & South India likely to be delayed by 10-15 days in Oct'20. Telangana is the CCI's largest procurement destination, if CCI commences the procurement on time in the state then full-fledged arrivals could be expected from Telangana if the weather favours. CCI expects that the agency would get extra days for exporting more if the arrivals get delayed and could reach to 55 lakh bales in the current season.

**Cotton has been sown across India in around 129.29 lakh ha as of 10th Sep'20 for 2020-21, up by 0.9% to the total acreage under cotton last year.** The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) covered an area of 19.06 lakh ha. The yield loss is expected in Punjab and Haryana amid continuous rainfall and whitefly attack on the crop. In Maharashtra, around 42.24 lakh ha and in Gujarat the area under 22.79 lakh ha is covered by cotton sowing, down by -4.7% and -14.6%, respectively compared to last year's total acreage. The area in Andhra Pradesh is still lagging behind by 11.9% covering 5.64 lakh ha as of 10th Sep'20 and Telangana has reported the maximum surge of 29.7% (24.13 lakh ha) in area this year.

**The area under cotton was expected to decline from the beginning kharif sowing earlier in June'20 as the farmers shifted to groundnut.** Also, it is estimated that the Gujarat ginners have around 1-1.5 lakh bales of unsold cotton and around 70-75 thousand bales unsold raw cotton with the farmers. In the past one month, the weather was not playing a good role in the cotton growth in the state. Around 50,000-60,000 ha of area in Amreli of Saurashtra region which covers around 15% of total cotton area in the state was damaged followed by 10-15% crop loss in other districts (Jamnagar, Morbi, Surendernagar, Kutch & Sabarkantha). This year, area is not likely to cross 24 lakh ha against 26 lakh ha last year.

**The agriculture officials have found the presence of Pink Bollworm (PBW) in cotton in Bhatinda, Punjab on around 100 acres so far.** It seems to have originated from the empty cotton bolls that were discarded from the ginning mills after removing fiber that were in close proximity to the cotton fields. Earlier, PBW has appeared in some parts of Maharashtra in Nanded, Parbhani, Vidarbha and Khandesh and Telangana to some extent. The PBW infestation has not yet crossed ETL levels. The pest infestation was observed in the regions where the farmers opted for early planting. However, the extent of damage could be recorded with a clearer picture when the rain stops.

**Coronavirus has hit hard on the global cotton textile industry.** According to the statistics from the Vietnam Chamber of Commerce and Industry, the country's yarn exports declined 20.9 percent from January to July 2020. Fabric exports decreased by 40% while the export of processed textiles dropped 12.1%. And the Vietnamese textile exports are likely to decline further by 14% in the second half of 2020. The Indian raw cotton exports to Vietnam in the first half of the year (Jan'20- June'20) declined by 33.6% compared to the same period last year.

**According to Agriwatch, India is likely to end this year (2019-20) with record of around 104 lakh bales of cotton as closing stock.** Cotton Corporation of India (CCI) has decided to sell a part of the surplus stock of about 15 to 20 lakh bales to Bangladesh, that would take place on a government-to-government basis and the shipments could start from next month onwards. Export prices will be decided by the two governments using the Cotlook index. As the current season is likely to end soon in one month, therefore, as soon as the exports starts India likely to ship around 5-7 lakh only and rest of the quantity would be off the ports in the coming season starting in October'20.

**In the recent report published by Cotton Association of India (CAI), the agency increased its cotton crop estimate for 2019-20 to 354 lakh bales compared to its previous estimate of 335.5 lakh bales.** The Agriwatch estimates that the

production for the current season might reach to around 362 lakh bales out of which around 11 lakh bales might be carried forward in the coming season. The estimate of the cotton imports has been increased by the CAI at 16.00 lakh bales, up by 1 lakh bales from previous estimates. CAI also increased the estimated exports to 50 lakh bales from 47 lakh bales for 2019-20. According to market sources, Indian cotton arrivals during the months of October 2019 to July 2020 are estimated at 337 lakh bales.

**With the context of favourable weather in India and increased area, USDA has increased the India's production estimates 38.04 million bales (170kg per bale) in 2020-21, up by 4% from previous month's estimates. While the import trade has been reduced to 1.28 million bales from 1.41 million bales in the previous month. As the recovery in revival of the cotton industry has been sluggish, the domestic use was also declined to 28.8 million bales in Aug'20 estimates from 29.46 million bales (Jul'20 estimates). Therefore, the assumptions are made that there would be higher ending stock 28.83 million bales compared to previous month's estimates (27.29 million bales) as well as from 2019-20 (24.60 million bales).**

### **Weather Forecast for tomorrow:**

Heavy to very heavy rainfall at isolated places over Marathwada; heavy rainfall at isolated places over Northwest Madhya Pradesh, Vidarbha, Bihar, Sub-Himalayan West Bengal & Sikkim, Andaman & Nicobar Islands, Gujarat State, Madhya Maharashtra, Konkan & Goa, Coastal Andhra Pradesh & Yanam, Telangana, Coastal & North Interior Karnataka and Kerala & Mahe. Moderate thunderstorm accompanied with lightning likely at isolated places over East Uttar Pradesh and thunderstorm accompanied with lightning likely at isolated places over South Rajasthan, Vidarbha, Assam & Meghalaya, Telangana and Rayalaseema.

### **International Fundamentals:**

**Cotton Futures ended Monday session at higher by 1.40 points Oct 20, Cotton is at 65.46. The Cotlook index closed steady at 70.5 cents/lb.**

**In the latest report released by USDA in Sep'20, decreased the production estimates from 23.14 million bales (170kg per bale) in 2020-21 to 21.84 million bales, -6% compared to the previous estimates reflecting the poor crop health in the cotton belts after storms hit the areas amid hurricane. Along with the 0.7% increase in beginning stocks, the total supply declined to 31.12 million bales, down by 3.8% compared to the previous months' estimates (m-o-m). While, the total demand in the country is expected to decline by 3.3% to 21.91 million bales due to the estimated significant fall in consumption to 3.2 million bales from 3.46 million bales m-o-m.**

**In Pakistan, due to the starting of spell of rains in many areas of Punjab and Sindh the supply of kapas will be decreased as well as the quality will also be effected. The production of cotton crop might be effected in the cotton producing areas of Sindh because of rains. If rainwater collects in the field, it will damage the crops. Rains also increase the risk of attack of viruses and insects on the crop.**

**China cotton yarn imports are estimated to increase by 7.4% to 1.51 LT in Jul'20 compared to the previous month. According to foreign shipment data in June, cotton yarn imports of China from Vietnam in Jul are estimated at 70,400 tonnes followed by India 20,000 tonnes, from Pakistan 25,200 tonnes, Uzbekistan 15,000 tonnes, and from other regions and countries at 20,000 tonnes. It is expected that the demand in August likely to remain stagnant as the operating rate of fabric mills declined. The high inventory and lack of demand may put pressure on yarn prices in the country.**

**The United States Department of Agriculture's weekly crop progress report showed 45% of the crop in good/excellent condition, compared with 54% a year ago. Hot temperatures returned in West Texas on Tuesday with most of the region above 100 degrees Fahrenheit, according to a National Weather Service bulletin.**
