

**Domestic Fundamentals:****Market Outlook:**

*The Gujarat cotton physical market closed higher side after improved demand today in the market. MCX cotton October contract stood higher at Rs.17900/bale on Friday. ICE cotton futures closed in red on Thursday.*

**News:** *All India daily arrivals increased to around 10,000 bales by the end of second week of Sep'20. If the weather helps in the right time of harvesting cotton in north zone of India and CCI starts its procurement in the first week of Oct'20, then the daily all arrivals by the first week of October would increase to around 25,000 to 35,000 bales per day otherwise the arrivals would limit to around 10,000 to 15,000 bales.*

**The hike in raw cotton MSP for the 2020-21 season by the government would eventually result in an increase in the production cost of cotton lint by the ginning mills.** *If the ginner sells cotton at higher prices to spinning mills, the cost of yarn production would increase. Hence, the entire chain of the cotton industry would incur a higher cost of production. The demand for cotton and its by-products is already lower in the domestic and international markets. At the higher price of yarn, fabrics and garments would discourage the Indian exports. Also, CCI's cotton selling policy is very uncertain because of no specification in the price and timing of cotton sales in the market. The whole cotton industry cannot make long-term business commitments regarding exports.*

**Earlier during this week, US has imposed restrictions on some textile imports from Xinjiang region of China.** *This move of US could benefit Indian textile industry as apart from China, India has been one of the major exporters of yarn and fabrics. Industry sources said that India has started receiving increased orders or are in active discussions with large international buyers, looking at increasing their sourcing from India.*

**As the advancement of rainfall in Maharashtra, Karnataka, Gujarat (Saurashtra), few areas in Madhya Pradesh & Telangana, and coastal AP is expected by IMD in the coming 2 weeks, therefore, the arrivals from the central & South India likely to be delayed by 10-15 days in Oct'20.** *Telangana is the CCI's largest procurement destination, if CCI commences the procurement on time in the state then full-fledged arrivals could be expected from Telangana if the weather favours. CCI expects that the agency would get extra days for exporting more if the arrivals get delayed and could reach to 55 lakh bales in the current season.*

**Cotton has been sown across India in around 129.29 lakh ha as of 10th Sep'20 for 2020-21, up by 0.9% to the total acreage under cotton last year.** *The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) covered an area of 19.06 lakh ha. The yield loss is expected in Punjab and Haryana amid continuous rainfall and whitefly attack on the crop. In Maharashtra, around 42.24 lakh ha and in Gujarat the area under 22.79 lakh ha is covered by cotton sowing, down by -4.7% and -14.6%, respectively compared to last year's total acreage. The area in Andhra Pradesh is still lagging behind by 11.9% covering 5.64 lakh ha as of 10th Sep'20 and Telangana has reported the maximum surge of 29.7% (24.13 lakh ha) in area this year.*

**The agriculture officials have found the presence of Pink Bollworm (PBW) in cotton in Bhatinda, Punjab on around 100 acres so far.** *It seems to have originated from the empty cotton bolls that were discarded from the ginning mills after removing fiber that were in close proximity to the cotton fields. Earlier, PBW has appeared in some parts of Maharashtra in Nanded, Parbhani, Vidarbha and Khandesh and Telangana to some extent. The PBW infestation has not yet crossed ETL levels. The pest infestation was observed in the regions where the farmers opted for early planting. However, the extent of damage could be recorded with a clearer picture when the rain stops.*

**According to Agriwatch, India is likely to end this year (2019-20) with record of around 104 lakh bales of cotton as closing stock.** *Cotton Corporation of India (CCI) has decided to sell a part of the surplus stock of about 15 to 20 lakh bales to Bangladesh, that would take place on a government-to-government basis and the shipments could start from next month onwards. Export prices will be decided by the two governments using the Cotlook index. As the current season is likely to*

end soon in one month, therefore, as soon as the exports starts India likely to ship around 5-7 lakh only and rest of the quantity would be off the ports in the coming season starting in October'20.

### Weather Forecast for tomorrow:

Heavy to very heavy rainfall very likely at isolated places over Andaman & Nicobar Islands, Madhya Maharashtra, Konkan & Goa, Kerala & Mahe and Coastal & South Interior Karnataka and heavy rainfall at isolated places over Chhattisgarh, Odisha, south Gujarat region, Marathawada, Coastal Andhra Pradesh & Yanam, Telangana, Rayalaseema and North Interior Karnataka.

### International Fundamentals:

**Cotton Futures ended Thursday session at lower by 0.62 points Oct 20, Cotton is at 64.35. The Cotlook index closed steady 71.65 cents/lb.**

**In the latest report released by USDA in Sep'20, decreased the production estimates from 23.14 million bales (170kg per bale) in 2020-21 to 21.84 million bales, -6% compared to the previous estimates reflecting the poor crop health in the cotton belts after storms hit the areas amid hurricane. Along with the 0.7% increase in beginning stocks, the total supply declined to 31.12 million bales, down by 3.8% compared to the previous months' estimates (m-o-m). While, the total demand in the country is expected to decline by 3.3% to 21.91 million bales due to the estimated significant fall in consumption to 3.2 million bales from 3.46 million bales m-o-m.**

**In Pakistan, due to the starting of spell of rains in many areas of Punjab and Sindh the supply of kapas will be decreased as well as the quality will also be effected. The production of cotton crop might be effected in the cotton producing areas of Sindh because of rains. If rainwater collects in the field, it will damage the crops. Rains also increase the risk of attack of viruses and insects on the crop.**

**China cotton yarn imports are estimated to increase by 7.4% to 1.51 LT in Jul'20 compared to the previous month. According to foreign shipment data in June, cotton yarn imports of China from Vietnam in Jul are estimated at 70,400 tonnes followed by India 20,000 tonnes, from Pakistan 25,200 tonnes, Uzbekistan 15,000 tonnes, and from other regions and countries at 20,000 tonnes. It is expected that the demand in August likely to remain stagnant as the operating rate of fabric mills declined. The high inventory and lack of demand may put pressure on yarn prices in the country.**

**The United States Department of Agriculture's weekly crop progress report showed 45% of the crop in good/excellent condition, compared with 54% a year ago. Hot temperatures returned in West Texas on Tuesday with most of the region above 100 degrees Fahrenheit, according to a National Weather Service bulletin.**
