

**Domestic Fundamentals:****Market Outlook:**

*The Gujarat cotton physical market closed in steady to weak tone after good pace of arrivals in the market. MCX cotton October contract stood lower at Rs.18000/bale on Friday. ICE cotton futures closed in green on Friday.*

**News: The cotton prices recovered to around Rs. 36,500- Rs.37,000 per candy from Rs. 31,000 per candy in April. The good demand from the exporters and cotton yarn makers also from the reviving of the domestic mills have supported the prices. As the season is going to end within a week, therefore, provided well support to the prices. According to All Gujarat Spinner's Association (AGSA), yarn exports rose 10% in the past 2 months and the yarn prices surged to Rs.186 per kg from Rs.160-162 per kg during the lockdown.**

**According to the sources, the cotton crop in Khandesh region have been affected due to the excess rainfall. The crop planted in late May and early June has been most affected. The cotton bolls for first picking in Dhule, Jalgaona and Nandurbar (which covers 8.5 lakh ha area under cotton) were reported rotted. Also, in the further pickings, the quality of fibre likely to decline.**

**According to the first advance estimate released by the Agriculture Ministry, cotton production is estimated to be at 371.2 lakh bales (of 170 kg each) is higher by 16.3 lakh bales than the production of 354.91 lakh bales during 2019-20. The estimated production might fall lower than expected because of heavy rainfall as already the crop damage have been reported in Punjab, Haryana, Gujarat and Maharashtra.**

**The new cotton have started arriving in the Malwa region (Bhatinda and Mansa) of Punjab. The farmers are getting very low price at around Rs.4600/q which is very low below MSP of Rs. 5825/q. The mandi officers have recommended the farmers to bring cotton from 1st Oct'20 when CCI begins the procurement and must ensure that their produce contains between 8 to 12% moisture content to get remunerative prices.**

**CCI sales declined as the mills already have excess stock due to the lower demand and only limited stock of quality cotton is available. However, Indian spinning mills are getting good overseas demand for yarn and that has supported the domestic market, during last week. In fact, Chinese exporters are complaining that many of their orders were being switched to India and Pakistan. The delay in arrivals could led to only a slight surge in prices in October, as there is already excess stock with CCI and mills.**

**The hike in raw cotton MSP for the 2020-21 season by the government would eventually result in an increase in the production cost of cotton lint by the ginning mills. If the ginner sells cotton at higher prices to spinning mills, the cost of yarn production would increase. Hence, the entire chain of the cotton industry would incur a higher cost of production. The demand for cotton and its by-products is already lower in the domestic and international markets. At the higher price of yarn, fabrics and garments would discourage the Indian exports. Also, CCI's cotton selling policy is very uncertain because of no specification in the price and timing of cotton sales in the market. The whole cotton industry cannot make long-term business commitments regarding exports.**

**Earlier during this week, US has imposed restrictions on some textile imports from Xinjiang region of China. This move of US could benefit Indian textile industry as apart from China, India has been one of the major exporters of yarn and fabrics. Industry sources said that India has started receiving increased orders or are in active discussions with large international buyers, looking at increasing their sourcing from India.**

**As the advancement of rainfall in Maharashtra, Karnataka, Gujarat (Saurashtra), few areas in Madhya Pradesh & Telangana, and coastal AP is expected by IMD in the coming 2 weeks, therefore, the arrivals from the central & South India likely to be delayed by 10-15 days in Oct'20. Telangana is the CCI's largest procurement destination, if CCI commences the procurement on time in the state then full-fledged arrivals could be expected from Telangana if the weather favours. CCI**

expects that the agency would get extra days for exporting more if the arrivals get delayed and could reach to 55 lakh bales in the current season.

### Weather Forecast for tomorrow:

Heavy rainfall very likely at isolated places over Sub-Himalayan West Bengal & Sikkim, Arunachal Pradesh, Assam & Meghalaya and Coastal Andhra Pradesh & Yanam. Thunderstorm with lightning at isolated places very likely over Gangetic West Bengal, Assam & Meghalaya, Coastal Andhra Pradesh & Yanam, Telangana, Rayalaseema and Tamilnadu, Puducherry & Karaikal.

### International Fundamentals:

**Cotton Futures ended Friday session higher by 0.69 points Oct 20, Cotton is at 64.66. The Cotlook index closed lower by 0.25 points to 70.60 cents/lb against 70.85 cents/lb in previous day.**

**The Brazilian cotton started flowing in the market and the new crop is expected to fulfill export orders in the Asian markets** by late October and November. Both Brazilian and Indian cotton is expected to arrive in the market at the same time. Spinners have recently moved to focus on Brazilian and US for contamination improvement and better contract performance. But the improved quality of the CCI offers in India could compete over Brazil in the interests of Chinese mills.

**In the latest report released by USDA in Sep'20, decreased the production estimates from 23.14 million bales (170kg per bale) in 2020-21 to 21.84 million bales, -6% compared to the previous estimates reflecting the poor crop health in the cotton belts after storms hit the areas amid hurricane. Along with the 0.7% increase in beginning stocks, the total supply declined to 31.12 million bales, down by 3.8% compared to the previous months' estimates (m-o-m). While, the total demand in the country is expected to decline by 3.3% to 21.91 million bales due to the estimated significant fall in consumption to 3.2 million bales from 3.46 million bales m-o-m.**

**In Pakistan, due to the starting of spell of rains in many areas of Punjab and Sindh the supply of kapas will be decreased** as well as the quality will also be effected. The production of cotton crop might be effected in the cotton producing areas of Sindh because of rains. If rainwater collects in the field, it will damage the crops. Rains also increase the risk of attack of viruses and insects on the crop.

**China cotton yarn imports are estimated to increase by 7.4% to 1.51 LT in Jul'20 compared to the previous month.** According to foreign shipment data in June, cotton yarn imports of China from Vietnam in Jul are estimated at 70,400 tonnes followed by India 20,000 tonnes, from Pakistan 25,200 tonnes, Uzbekistan 15,000 tonnes, and from other regions and countries at 20,000 tonnes. It is expected that the demand in August likely to remain stagnant as the operating rate of fabric mills declined. The high inventory and lack of demand may put pressure on yarn prices in the country.
