

**Domestic Fundamentals:****Market Outlook:**

The cotton physical market showed mixed trend today in the market. MCX cotton November contract stood lower at Rs.19,280/bale on Friday. ICE cotton futures closed red on Thursday.

**News: Government gave assurance to farmers that it will procure all the cotton produced in Telangana by paying MSP of Rs. 5,825 per quintal.** Due to heavy rains in Telangana the moisture content in cotton crop has been increased. The Government officials have requested CCI to purchase cotton of more than 12 percent moisture. CCI has lifted only 9.2 lakh bales of cotton out of 40.56 lakh bales of cotton stored in godowns so far. So to create enough spaces cotton needs to be lifted from these godowns.

**Government has increased Cotton Procurement under MSP Scheme** five of the growing states. The Center procurement operations will help in cotton prices recovery.

**Cotton arrival in Punjab's has mandi doubled this season** compared with the corresponding period last season. A total of 10.92 lakh quintals were brought by the farmers to various purchase centers, for the same period in 2019 the arrival was 5.71 lakh quintals. Traditionally farmers used to hold back the harvested crop and bring them back to mandi's after paddy harvest phase. But due to ongoing farmers agitation panicked cotton growers and they rushed to mandi's. Although, CCI purchases are going smooth and the payments are being released in farmer's bank account within a week.

**New cotton purchasing centre has been inaugurated in Warangal** at Bhagyalakshmi Cotton Mill and state will buy cotton at reasonable price to support farmers. As per the CCI, the government's MSP is 5,825 per quintal. Cotton would be procured if its moisture content would be between 8-12%. For moisture content above 12%, Rs.58.25 would be deducted for every 1% and for moisture content below 8%, CCI would provide 5,825/quintal and Rs.58.25 incentives per quintal.

**The exponential rise in raw cotton and fiber demand from the overseas has led to the rise in the cotton exports.** According to Cotton Association of India, India have exported around 6 lakh bales and 25,000 to 50,000 bales of cotton are lined up at the Indian ports from the beginning of the new season (October'20). But the lack of availability of containers at the port is causing delay in exports. The traders claim that groundnut oil and castor shipments are getting priority against cotton because of higher demand from China.

**According to the trade sources, India is expected to have exported around 5 lakh bales in September 2020.** China and Bangladesh has imported notable quantity of raw cotton from India of around 2 lakh bales each at an average FOB of \$1.41/kg and \$1.49/kg, respectively. Vietnam was also a major importing country after China & Bangladesh buying around 54,000 bales at \$1.34/kg FOB followed by Mauritius (3,500 bales at \$1.42/kg), and Oman (2,450 bales at \$1.42/kg). The demand from China has increased significantly in September surpassing the demand from Bangladesh. The demand for organic cotton has also risen during September especially from Bangladesh, China and Indonesia.

**Cotton Corporation of India (CCI) procurement under MSP has been increased gradually in North India (Punjab, Haryana, and Rajasthan).** According to the sources, CCI procured a total of 2.36 lakh bales of cotton till 20th October 2020.

**The crop in Khammam district of Telangana has been adversely affected with the recent rains that resulted in high moisture content in the produce brought by the farmers in the procurement centers.** Even there are issues with the colour of the cotton not meeting the standards of CCI procurement. Therefore, the farmers are forced to sell their produce to the private traders below MSP. Some farmers brought the cotton that was kept in cold storage last year and are selling it at Rs 4,825 per quintal. The farmers claim that they can get MSP price if the moisture content is reduced if the mandi officials could provide a space for drying cotton.

**CCI is planning to expand buying but remains limited by the high moisture content of seed cotton.** The Shankar-6 1 1/8 ex-gin is back near 68.75 cents/lbs from the high of 71 cents/lbs during the month. But CCI has continuously raising floor prices in its auctions by around Rs.500 to 1000 per candy. The price weakness has again aided the attraction of Indian cotton for export. Chinese mills have purchased Indian cotton that is at large discounts to domestic cotton. Bangladesh and Vietnam were also active buyers of Indian cotton.

**According to Cotton Association of India (CAI), the cotton production in 2019-20 is expected to have reached 360 lakh bales up from 354.5 lakh bales as estimated earlier and declined imports by 50,000 bales to 15.5 lakh bales from the previous estimates.** The exports and consumption figures remained unchanged at 50 lakh bales and 250 lakh bales, respectively. Till 6th October'20, 3.12 lakh bales of new crop of raw cotton had arrived in the market. Out of which, CCI could procure 2,311 bales in Haryana, Punjab and Rajasthan as against zero procurement in the corresponding period of last year.

#### **Weather Forecast for tomorrow:**

Heavy rainfall likely at isolated places over Tamilnadu, Puducherry & Karaikal. Thunderstorm with lightning likely at isolated places over Kerala & Mahe and Tamilnadu, Puducherry & Karaikal.

#### **International Fundamentals:**

The cotton Futures ended lower by 16 point at 70.07 cents/lbs. The Cotlook A index recovered 140 points to 77 cents flat. USDA's FSA lowered the week's AWP for cotton 136 points to 56.01 cents/lb.

**The Cotton Supply Chain Continues to Suffer from COVID, Trade Tension and a Sluggish Global Economy.** The Production in 2020-21 is expected to be 146 million bales and is projected to outpace consumption by 500,000 tonnes. Many major producers are expected to see their total drop in coming years such as USA, Brazil, Pakistan and West Africa. Inclement weather and trade conflicts would compound the challenges in some region like USA which is experiencing a hurricane season and is also engaged in trade war with china. However, India and China world's top two producers are expected to increase their total in the coming season.

**The China cotton fiber imports have reached 9.65 lakh bales** and the import volume has driven with the arrival of US Reserve purchases amounting to 6.70 lakh bales. Similarly, cotton yarn imports have reached equivalent to more than 9 lakh bales of cotton fiber. Such a surge in imports was driven by the revival of domestic demand and the attraction of cotton yarn imports because China enjoy quota free status and a small duty rates.

**Lower demand in the textile and garment sector as a result of COVID-19 had a bad impact on Indonesia's economy.** As a result, capacity utilization of the textile industry from March to June 2020 reached only 50%, down from a normal range of 70-80%. Similarly, utilization in Indonesia's garment sector declined to 80% from a normal utilization of 90%.

**Iran's cotton production is estimated to reach 16 lakh bales, from which about 4 lakh bales of refined cotton are expected to be produced in the current fiscal year started in March 2020, a 15.71% increase compared with last year.** Iran will be able to meet 68% of its domestic demand this year against 58% last year. Iran imports around 3.5-4.5 lakh bales of cotton every year from the world.

**Despite the increasing kapas arrivals, active procurement of CCI could support the market in coming days. At present, CCI is procuring around 60% of the total arrival in north India per day.** As of 20th Oct'20, CCI purchases were reported around 2.3 lakh bales in the Northern India. In Telangana, CCI has announced that the MSP will be paid only for 8% moisture, with premiums for 6% and 7% moisture levels. Purchases will be made to a maximum of 12%, with discounts for each 1% of moisture above 8%.

**Bangladesh cotton imports for September were 4.57 tonnes, an increase of 43% from the prior month, but a decline of 22% year over year. During August to September the imports were 7.76 tonnes, down from the last two years, a 30% reduction.**

**U.S. Export Sales were 51% from the prior 4- week average. Net UPLAND sales of 2,27,800 RB for 2020- 2021 primarily sold to Pakistan 93,300 RB, China 47,500 RB, Mexico 33,800 RB, Vietnam 30,100 RB, Bangladesh 9,000 RB and reductions were from Japan 1,000 RB and Indonesia 800 RB.**
