

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed mixed trend today due to the commencement of CCI procurement on large scale. MCX cotton spot price was lower at Rs.22,090 /bale Tuesday. ICE cotton futures closed green on Monday.

News: Cotton stock at MCX warehouse reached highest on export demand. Cotton stock in MCX accredited warehouse has touched a new high of 2,16,600 bales as on March 5 against previous high of 2,14,700 bales logged on March 30, 2019. The rising stock at warehouse was on the back of increasing hedging activities as the export demand, especially from China, has hit a new high. Also, Cotton prices have gained over 10 per cent so far and showed the firm trend in the global cotton trade. Cotton production globally is projected to touch a four-year low and imports by China are estimated higher. The Centre's decision to impose a ten per cent duty on imported cotton is seen as supporting domestic price.

Indian Cotton prices increase 5 percent in a month. Prices of Indian cotton have increased 5% in the past month, following the bullish trend in the international market. Although, cotton exports are strong as Indian cotton is cheaper than the overseas varieties. Cotton prices have increased to Rs 46,000 per candy of 356 kg from Rs 44,000 over the past month as the domestic cotton production is expected to be much lower than expected earlier. As against the earlier estimate of 40 million bales, the industry now expects the 2020-21 cotton production to be about 33 million bales. Projection of lower output in the next cotton crop as the major cotton producing nations including US and Brazil, farmers are shifting to maize and soyabean, which have given better returns, have also supported domestic price. Cotton prices are 13 percent cheaper than the prevailing global cotton prices.

Cotton farmers in Khammam are getting the prices above MSP. Farmers from Khammam are selling their cotton at Rs. 6,300 per quintal above minimum support price of Rs. 5,820 per quintal. Farmers are selling their cotton in local market instead of going at the CCI purchase centers.

Cotton exports from India are likely to rise 50 percent this year to 75 lakh bales in the 2020-21 crop year beginning October with revival in global demand from china and Bangladesh in last one month, amid the decline in cotton production in Pakistan, the textile exporters are urging the government to allow import of cotton from neighboring India.

Indian Cotton export may get a boost with rising global consumption. According to the International Cotton Advisory Committee, global consumption is estimated at 24.5 million tonnes for 2020-21 against 22.8 million tonnes in previous year. The rise in global consumption may boost prospects for Indian cotton exports. CAI has projected India's cotton export at 54 lakh bales for the current season against 50 lakh bales in the previous season, exports are likely to increase by the end of the season in September 2021.

High quality cotton exported to Bangladesh. Cotton Corporation of India has exported high quality cotton to Bangladesh through a goods train from Junagarh Road Railway Station in the district. The goods train has started its journey from Junagarh Road station in Kalahandi district to Benapol station of Bangladesh. The current consignment is of 6,500 bales of cotton weighing around 2,471 tonnes. The bales were packed into 42 wagons and sent to the neighbouring country via Kolkata.

Private players buy cotton above MSP in Punjab. Private players in Punjab are paying Rs. 6,240 per quintal to farmers which are Rs. 515 above the minimum support price; as a result CCI has steps aside in Punjab. According to the Punjab State Agriculture Marketing Board, 35.55 lakh quintal crops was sold in various places of the states till February 18, the CCI has purchased a record of 23.99 lakh quintal on MSP in 2020-21. Private players mean while have brought more than 12 lakh quintals and most of the purchase was at higher than MSP of Rs. 5,725 per quintal fixed for long staple.

Weather Forecast:

Thunderstorm with lightening & gusty winds very likely in isolated places over Sub- Himalyan West Bengal & Sikkim and with lightening at isolated places over Jammu & Kashmir, Ladakh, Gilgit- Balistan & Muzaffarabad ,Himachal Pradesh, Uttarakhand, Arunachal Pradesh, Assam & Meghalaya, Nagaland, Manipur, Mizoram, Lakshadweep and Kerala & Mahe.

International Fundamentals:

The ICE cotton Futures was up by 56 points at 86.77 cents/lb. The Cotlook A index was down by 105 points at 92.60 cents/lb. The AWP for cotton is 73.95 cents/lb.

Cotton prices in Pakistan are highest in 11 years. Cotton prices in Pakistan were pushed to an 11 years high because of a decline in production. Cotton traded at Rs. 12,000/ maund, while its spot rate moved up to Rs. 11, 700/ maund, increase of Rs. 400 was recorded in the spot rate. The shortfall in production has resulted in the price rise. Cotton production in Pakistan is 5.6 million bales only for the current season, which is the lowest in the past 30 years.

China cotton imports rise 16.8 percent in 2020. The total cotton imports by china has increased by 16.8 percent year-on-year to 2.16 million tonnes in 2020, Cotton imports have declined during the first half of the year due to the impact of covid-19 pandemic, but imports soared in the second half as production resumed and consumption recovered. In the six months of 2020, China's cotton imports decreased by 23.7 percent year-on-year to 900,000 tonnes. However, cotton imports surged 88.1 percent to 1.26 million tonnes during July-December 2020.

According to the USDA February forecast shows higher production in China and Australia. Production in China is raised sharply on the higher than normal last season ginning; Consumption has also risen in China and India on stronger expected recovery in mill demand. Global trade has reflected these changes and is raised slightly on higher imports for china.

Cotton Production in Pakistan witnessed a massive decline of about 35 percent to 5.57 million bales by the end of January 2021, which is the lowest in 30 years. The decline in cotton production is mainly due to pest's infestation and drought, seed degradation, reduction of planting area. There are multiple reasons this year for the decreasing production as white fly has also caused serious impact on cotton, even higher than those pi
