

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed mixed trend today due to the commencement of CCI procurement on large scale. MCX cotton spot price was down at Rs.21,800 /bale Tuesday. ICE cotton futures closed red on Monday.

News: Cotton Corporation of India has reduced the selling price of cotton as a onetime correction. International prices had risen almost 12 percent in the last two months and dropped at the same rate. Although CCI had not increased the prices to that extent, prices went up only by 2 percent and it has now been reduced by almost 2 percent. Also, the amount of reduction in prices differs according to the variety of cotton.

About 80 percent of the cotton has been sold in current cotton season. Cotton farmers in the country have taken advantage of higher global price for cotton in the current season 2020-2021, resulting in at least 80 percent of the production being sold. Cotton arrivals were higher in the various markets in the country since the prices have ruled higher than the minimum support price of Rs. 5825 per quintal by the government. Although, arrivals in government procurement center (CCI) has been decreased to about 75,000 bales.

Punjab Agriculture Department is likely to add 50,000 hectares area under cotton cultivation. As there is good production in 2020 and no major pest outbreak in the crop for last 5 years, the Punjab Agriculture Department has decided to add 50,000 hectares under cotton cultivation in the malwa region this year. This will increase about 10 percent over the current area of 5 lakh hectares.

Raw cotton prices have increased about 15 percent more than MSP. The current cotton prices in the market are prevailing at 6,500-6,600 per quintal, which is about 15 percent higher than the minimum support price of 5825 per quintal. Also, the CCI arrivals have slowed down to 90,000 bales a day.

Nacto Pharma is planning to launch pheromone product to control Pink Bollworm in cotton crop. Nacto Pharma limited is planning to launch India's first green label pheromone product for effective management of Pink Bollworm in cotton crop during kharif 2021. The product will be launched under the brand Natmate PBW. This is the first pheromone based indigenously manufactured product for mating disruption that received approval from Central Insecticide Board.

Cotton exports are likely to be hitting 60 lakh bales on competitive rates. India's cotton exports are likely to hit 60 lakh bales for the current season on cost competitiveness. According to Cotton Association of India about 60 percent or 36 percent has been shipped since the start of the season.

Cotton Association of India has reduced the cotton crop estimate for the current season by 1.50 lakh bales to 358.50 lakh bales from its previous estimate of 360 lakh bales. The total cotton supply for the five month period from October 2020 to February 2021 is estimated around 430.89 lakh bales, with arrivals of 298.89 lakh bales, imports are at 7 lakh bales and the opening stock at 125 lakh bales. Cotton Consumption was estimated at 137.50 lakh bales of 170 kg each, while the exports are estimated at 36 lakh bales. Stock at the end of February 2021 is estimated at 257.39 lakh of 170 kg each, including 92.50 lakh bales with textile mills, and the remaining 164.89 lakh bales with the CCI, Maharashtra Federation and others. The CAI Crop Committee has estimated the total cotton supply till end of the cotton season 2020-21 i.e. up to September 30, 2021 at 495.50 lakh bales of 170 kg each. The total cotton supply consists of the opening stock of 125 lakh bales of 170 kg each at the beginning of the cotton season on October 1, 2020, crop for the season estimated at 358.50 lakh bales, and the imports now estimated at 12 lakh bales as against 15.50 lakh bales estimated for the previous cotton season 2019-20. CAI has retained the domestic consumption estimate at the pre-lockdown level of 330 lakh bales. The exports for the season have now been revised to 60 lakh bales from the previous month's estimate of 54 lakh bales. The exports estimate for the previous cotton season 2019-20 was of 50 lakh bales. The carry-over stock at

the end of the cotton season 2020-21 on September 30, 2021, is estimated by the CAI at 105.50 lakh bales, as against 107.50 lakh bales estimated earlier.

Weather Forecast:

Thunderstorm with lightening, hail and gusty winds very likely in isolated places over Uttrakhand and lightening, hail & gusty winds at isolated places over Uttrakhand, with lightening & gusty winds at isolated places over Telangana, Vidarbha, Chattisgarh and with lightening & hail at isolated places over East Madhya Pradesh, Sub- Himalyan West Bengal & Sikkim, Andaman and Nicobar Island, Kerala & Mahe, Madhya Maharashtra and Marathwada.

International Fundamentals:

The ICE cotton Futures was down by 77 points at 84.68 cents/lb. The Cotlook A index was down by 50 to 91.25 cents/lb. The AWP for cotton was up by 76 points at 84.62 cents/lb.

The global 2020-21 cotton supply and demand estimates shows lower production and ending stocks, but higher mill use and trade. Estimated global production is reduced nearly 830,000 bales largely due to lower Brazilian and U.S. production. Cotton imports pace and indications of recovering global consumption has helped boost consumption estimates for Turkey, Bangladesh, Pakistan and Vietnam, more than offsetting lower projections for U.S. and Taiwan. The forecast for 2020-21 world trade is more than 600,000 bales. On export side, higher Indian exports accounts for most of the increase as auctions by Cotton Corporation of India have released much of the cotton purchased during last year under the MSP program.

According to US Department of Agriculture, global cotton consumption is expected to grow by 4.1 percent in 2021-22 seasons, substantially above the long term average rate of 1.7 percent. World cotton stocks are expected to reduce by 3.2 million bales. Also, World cotton production is expected to rise 4.7 percent with the most significant year-over-year growth in Pakistan, Australia, Brazil, the United States and West Africa. Overall, strong cotton consumption growth in 2021-22 and tightening stocks are expected to support prices with the A-Index forecast up 7 cents to 90 cents/pound for the marketing year.
