

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed mixed trend today due to the commencement of CCI procurement on large scale. MCX cotton spot price was down at Rs.22,020 /bale Tuesday. ICE cotton futures closed green on Monday.

News: Cotton Yarn prices have dropped as second wave of corona hits the demand. Cotton yarn prices have dropped from the peak seen at the beginning of this year and could decline further from May when a revision in rates is due to slack demand. Prices of almost of all counts of yarn have dropped by at least Rs.10 a kg as demand is low due to second wave of corona virus. Production in textile mills has dropped and it is impacting yarn off take where as the last six months were good period for Indian spinning mills because there was a huge shortage of cotton yarn due to last year's lockdown and huge demand for yarn came from domestic and International market as a result mill during that period performed well. But again with the second wave of corona virus many states have announced lockdowns and production in textile mills have slowed down.

Cotton farmers were assured for the payment. According to the Lands, Agriculture, Fisheries, Water and Rural settlement, Cotton farmers have been assured that they will be paid their outstanding dues in full by next month for the crop which they have delivered in the last season.

Over 90 percent of the cotton has already arrived in the market till March 2021. According to Cotton Association of India, the total cotton supplies in the first six months of the season stood at 459.26 lakh bales. Besides the market arrivals, the supplies included 7.50 lakh bales of imports and a record opening stock of 125 lakh bales at the beginning of the season. Also, with the ongoing semi- lockdown situation in various parts of India and strict curfew in Maharashtra, reports are also coming in regard of supply tightness and panic buying in the domestic market.

Cotton Association of India has estimated cotton exports around 60 lakh bales. CAI has estimated cotton exports to increase by 20 percent to 60 lakh bales in the 2020-21 seasons due to higher prices of cotton in the international market compared to the Indian market. The average price difference between the Indian and International prices was 10-13 percent last month which is now 3-4 percent. In previous season 2019-20, cotton export stood at 50 lakh bales.

Cotton Association of India has estimated cotton crop for 2020-21 season at 360 lakh bales. CAI in its March estimates for 2020-21 cotton seasons has estimated production at 360 lakh bales, higher from the previous estimates of 358.50 lakh bales. The total supply from October 2020 to march 2021 was estimated at 459.26 lakh bales, which consist arrivals of 326.76 lakh bales, whereas imports are estimated at 7.50 lakh bales and opening stock at 125 lakh bales. Further Consumption was estimated at 165 lakh bales and exports till 31st march 2021 was around 43 lakh bales, stock at the end of March 2021 was estimated at 251.26 lakh.

Cotton Corporation of India has procured around 92 lakh bales of cotton till March'2021 under Minimum Support Price program from various states like Punjab, Haryana, Rajasthan, Madhya Pradesh, Maharashtra, Gujarat, Telangana, Andhra Pradesh, Odisha, and Karnataka. Cotton arrivals have slowed down in CCI purchase centers from March as currently the prices in the local market are higher than the minimum support price of cotton. Cotton arrivals were around 90,000 bales a day in February and have come down to below 30,000 bales till last week.

Telangana becomes the second biggest state under cotton area. Telangana ahead of Gujarat and becomes a second biggest state in the cotton acreages. Telangana is now looking forward to increase the cotton cultivation area by another 15-20 lakh acres in the coming kharif season. This will take the total cotton area to 75-80 lakh acres.

Cotton cultivation area is likely to increase in North India. According to the official sources sowing of cotton crop would increase in Punjab, Haryana and Rajasthan by 2 percent as in the current season prices of raw cotton are much higher than the MSP. Where else in Maharashtra the area will drop by 2 percent as farmers are likely to shift to pulses in view of

kapas price ruling around MSP level, while in, Madhya Pradesh demand for edible oils could see growers switching over to Soybean.

Weather Forecast:

Thunderstorm with lightening & gusty winds very likely at isolated places over Kerala & Mahe and with lightening & gusty winds at isolated places over West Bengal & Sikkim, Odisha, Assam, Meghalaya, Madhya Maharashtra, Marathwada, Coastal Andhra Pradesh & Yanam and Telangana and with lightening at isolated places over Jammu, Kashmir, Ladakh, Gilgit-Baltistan, Muzzafarabad, Himachal Pradesh, Uttarakhand, Chattisgarh, Vidarbha, Arunachal Pradesh, Nagaland, Manipur, Mizoram, Tripura, Saurashtra & kutuch, Konkan & Goa, Rayalaseema, Karnataka, Tamilnadu, Pondicherry & Karaikal. Heat wave condition very likely in isolated pockets over Kerala & Mahe.

International Fundamentals:

The ICE cotton Futures was up by 35 points at 87.86 cents/lb. The Cotlook A index was down by 25 points at 91.95 cents/lb. The AWP for cotton was at 70.49 cents/lb.

Bangladesh apparel export improved year- on- year in March 2021. Bangladesh apparel export was at 2.450 billion USD, up by 8.8 percent on year-on- year basis but has slowed down on month on month basis by 6.5 percent. During January to March, Bangladesh apparel export has reached 7.94 billion USD which was down by 1.7 percent year on year; where else the cumulative export volume was 299 million USD.

According to the 2020-21 U.S. cotton supply and demand forecast, higher exports and lower ending stock was observed as compared to last month. Production and domestic mill use are unchanged; where else the export forecast has been raised to 250,000 bales to 15.75 million, based on the increase in recent sales and shipments. Ending stock has now forecasted at 3.9 million bales, which is equivalent to 22 percent of total disappearance. The projected global production is around 276,000 bales lower than March month, led by decline in Australia and Turkmenistan and also the rising textile demand in china accounts for much of the 387,000 bales increase in projected 2020-21 world cotton consumption. World trade has also raised about 935,000 bales.

Pakistan is planning to import cotton from Uzbekistan. The Pakistan government is considering an option to import cotton from Uzbekistan via land route after it took back a decision of its import from India, as textile exporters want government to take decision regarding the 40 percent drop in the crop output.

China's cotton production is projected at 6.30 million tonnes in 2020-21 seasons, up by 8.7 percent from 2019-20 seasons, a new high since 2014-15. The cotton consumption along with the ending stock is also high this season, indicating the ample domestic cotton supply. If some cotton restriction is made by the government then, it is bound to increase the supply and Chinese cotton with high prices will be replaced by the imported cotton and Chinese cotton prices are supposed to come down.

The global 2020-21 cotton supply and demand estimates shows lower stocks and production. The April 2020-21 forecast shows marginal increase in consumption in Bangladesh and Mexico compared to March 2021. Global trade has boosted by greater import demand from China and Bangladesh. Also, higher exports are expected from Brazil, United States and Egypt.
