

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed firm trend today as CCI procurement has slowed down and major markets are closed due to lockdown restrictions. MCX cotton spot price was up at Rs.22,040/bale Thursday. ICE cotton futures closed green on Wednesday.

News: According to the Cotton Textile Export Promotion Council Cotton Textile and Apparel export are 13 percent lower from the previous year. The Textile and Apparel Export are 13 percent lower from previous season; the exports are worth \$29 billion last year as against \$34 billion in 2019-20. Exports of readymade garment have also declined 20.78 percent last fiscal year compared with the previous year, while exports for man-made textile items fell 21.20 percent. Export of cotton textile had declined 2.12 percent; it is mainly because of COVID spread.

Cotton Consumption may drop by 8 percent due to second wave of corona virus. According to the Union Ministry of Textile Committee on Cotton Production and Consumption has reduced cotton consumption for the season 2020-21 at 303 lakh bales from 330 lakh bales earlier, owing to the current lockdown as the extreme second wave of corona virus. Although total demand is expected to be 373 lakh bales, with 303 lakh bales consumed domestically and 70 lakh bales exported.

According to the International Cotton Advisory Committee, Global production is estimated at 24.6 million tonnes this month. India has lead global production at an estimated 6.3 million tonnes for 2020-21 season. China is expected to be the second largest producer with 5.9 million tonnes. The West Africa cotton producing countries together are estimated to produce over 1 million tonnes this year. The United States and Brazil are expected to produce 3.2 and 2.5 million tonnes respectively. These two countries have textile industries relatively small compared to the domestic supply and will export the overwhelming majority of their production.

Committee on Cotton Production and Consumption has reduced cotton crop estimate for 2020-21 season. According to the meeting held by Committee on Cotton Production and Consumption, cotton production is estimated at 360 lakh bales from its previous estimate of 371 lakh bales where as imports were maintained at 11 lakh bales and exports were reduced from 75 lakh bales to 70 lakh bales. Due to current lockdown situation cotton consumption was also reduced from 330 lakh bales to 303 lakh bales.

Cotton cultivation delays in Malwa region of Punjab. Cotton farmers in the malwa region are worried as the cotton cultivation for the coming season has been delayed due to acute shortage of water. The sirhind canal and kotla canal of the region have been running dry for over a month now. These two canal supply water for irrigation to majority of Malwa districts.

Punjab has decreased the cotton cultivation target for 2021-22 seasons. Despite of high cotton prices in the current season, the cotton cultivation target has decreased for the coming season 2021-22 to 3.25 lakh hectares. Whereas in the 2020-21 season the Punjab government had claimed that they have increased the area under cotton cultivation to 5 lakh hectares. Although, now the government has said that the last year's area was inflated by almost two times, in revenue assessment in 2020-21 the area is found to be 2.51 lakh hectares and not 5 lakh hectares.

Cotton Yarn prices have dropped as second wave of corona hits the demand. Cotton yarn prices have dropped from the peak seen at the beginning of this year and could decline further from May when a revision in rates is due to slack demand. Prices of almost of all counts of yarn have dropped by at least Rs.10 a kg as demand is low due to second wave of corona virus. Production in textile mills has dropped and it is impacting yarn off take where as the last six months were good period for Indian spinning mills because there was a huge shortage of cotton yarn due to last year's lockdown and huge demand for yarn came from domestic and International market as a result mill during that period performed well. But again with the second wave of corona virus many states have announced lockdowns and production in textile mills have slowed down.

Weather Forecast:

Thunderstorm with lightening, hail & gusty winds very likely at isolated places over Uttarakhand, Madhya Pradesh, Maharashtra and Telangana and with lightening & gusty winds at isolated places over Jharkhand and with lightening & gusty winds at isolated places over Jammu & Kashmir, Ladakh, Gilgit- Baltistan & Muzaffarabad, Himachal Pradesh, Punjab, Haryana, Chandigarh & Delhi, Uttar Pradesh, Madhya Pradesh, Vidarbha, Chhattisgarh, Odisha, Bihar, Gangetic West Bengal, Arunachal Pradesh, Assam & Meghalaya, Nagaland, Manipur, Mizoram & Tripura, Marathwada, Konkan & Goa, Coastal Andhra Pradesh, Yanam, Kerala & Mahe, and with lightening at isolated places over Andaman & Nicobar Islands, Rayalseema, Karnataka, Tamil Nadu, Puducherry, Karikal and Lakshadweep. Heavy rainfall very likely at isolated places over Sub- Himalaya West Bengal & Sikkim, Andaman & Nicobar Islands, Arunachal Pradesh, Assam & Meghalaya, Nagaland, Manipur, Mizoram & Tripura.

International Fundamentals:

The ICE cotton Futures was up by 16 points at 87.33 cents/lb. The Cotlook A index was up by 115 points at 93.05 cents/lb. The AWP for cotton was at 73.71 cents/lb.

Bangladesh apparel export improved year- on- year in March 2021. Bangladesh apparel export was at 2.450 billion USD, up by 8.8 percent on year-on- year basis but has slowed down on month on month basis by 6.5 percent. During January to March, Bangladesh apparel export has reached 7.94 billion USD which was down by 1.7 percent year on year; where else the cumulative export volume was 299 million USD.

Kenya aims to increase its commercial production of GMO cotton by 10 times next year. The target of Kenyan government is to involve over 200,000 farmers to boost production from 20,000 bales currently to 200,000 bales by 2022. Controlled farming of GMO cotton was approved by the Kenyan government in 2019 after successful field trials, and it identified 1,000 farmers last year to receive the first GMO cotton seeds. Overall the country has a demand of 38,000 tonnes of cotton lint, but produces only 5,300 tonnes. Besides Kenya, African countries like Sudan, South Africa, Ethiopia, Nigeria, Malawi also produce GMO cotton.

China will soon launch its own version of Better Cotton Initiative (BCI) standards. This cotton program will mainly focus on improving production efficiency through digitalization, a fully traceable cotton production process, low carbon production and high quality cotton farming.

According to the 2020-21 U.S. cotton supply and demand forecast, higher exports and lower ending stock was observed as compared to last month. Production and domestic mill use are unchanged; where else the export forecast has been raised to 250,000 bales to 15.75 million, based on the increase in recent sales and shipments. Ending stock has now forecasted at 3.9 million bales, which is equivalent to 22 percent of total disappearance. The projected global production is around 276,000 bales lower than March month, led by decline in Australia and Turkmenistan and also the rising textile demand in China accounts for much of the 387,000 bales increase in projected 2020-21 world cotton consumption. World trade has also raised about 935,000 bales.
