

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed a mixed trend across India today. MCX cotton spot price was higher at Rs.31,680/bale on Thursday. ICE cotton futures closed green on Wednesday.

News: The sudden dip in the global demand due to the pandemic scare and poor quality of raw cotton in areas of Punjab has lowered the rates of cotton crop by Rs. 1,500 per quintal in the last two weeks. For the 2021-22 season, average prices for the cotton at Punjab market was Rs. 9,500 per quintal which means 70 percent of the crop was purchased at around Rs. 9,500 and nearly 10 percent of the best quality was sold even higher than Rs. 9,500. Whereas, 20 percent of the cotton was being sold below the model rate due to poor quality. However, the mode rate of cotton in the last 10 days remains static at about Rs. 8,000 per quintal. For the current season the worst ever quality of cotton is being reported from Bhatinda and Mansa districts due to pink bollworm infestation earlier in the crop. According to the Punjab Mandi Board data, About 9.57 lakh quintal of cotton was purchased in the state till 04th December 2021 as compared to 21 lakh quintals in the corresponding period last year. As per the Industry sources the cotton prices may pick up again after 15th December 2021 as the picture of new Covid-19 variant Omicron may be clearer and demand regains the momentum.

Cotton Corporation of India is operating 71 procurement centers in Andhra Pradesh. The CCI is operating 71 procurement centers in the state to assist the cotton growers. As per CCI they have opened 30 procurement centers besides 41 procurement points at notified ginning and pressing factories.

With the chance of reemergence of the covid-19 variant Omicron, the slump in prices of the cotton is also being seen as the direct impact of this the prices of raw cotton have witnessed a slump of up to Rs. 2,000 per quintal in the last fortnight. The prices were being quoted up to Rs. 9,400 – Rs. 9,500 per quintal which is now at Rs. 7,500- 7,700 per quintal. The lower quality crop is being traded even at Rs. 6,200 – 6,500 per quintal.

The prices in the local cotton market in Ahmedabad has dropped by Rs. 1,000- Rs. 1,200 per candy as the new covid -19 variant Omicron, currently circulating in south Africa. Cotton shanker-6 prices were down to Rs. 65,300- Rs. 65,800 per candy in local market. Although the new crop arrivals are slow in the local markets and domestic mills are making limited purchases due to the high prices of the natural fibre compared to the previous season. About 35,000 to 40,000 cotton are daily arriving in the market. Currently arrivals are slow as farmers are busy with marriage season and there is also labour shortage to pluck cotton. The arrivals are expected to pick up after 10th December 2021.

The central Board of Indirect Taxes and customs notified the hike in GST rate from 5-12 percent on fabric, apparel and footwear w.e.f. January 2022. The objective behind the proposed increase is to correct the problem of Inverted Duty Structure faced by a small segment of the textile value chain. Although the Retailers Association of India has urged the government to reconsider the decision as it will adversely impact 85 percent of the textile sector. The Chamber of Industrial and Commercial Undertaking has also written a letter to Union Finance Minister seeking a rollback of the decision.

Cotton Association of India has maintained its yearly cotton crop estimate at 360.13 lakh bales. Cotton Association of India has released its monthly balance sheet for October 2021. Cotton supply for October month is estimated at 107.12 lakh bales, which consist of the arrivals of 31.12 lakh bales ,imports of 1 lakh bales during October 2021 and consumption is estimated at 27.91 lakh bales while export shipments of cotton up to 31st October 2021 is estimated at 4 lakh bales. Stock at the end of October 2021 is estimated at 75.21 lakh bales.

Cotton arrivals have slowed down in Punjab. Due to pink bollworm infestation earlier in the season, the crop has been affected in the major cotton producing areas of Bhatinda, Mansa, Sangrur and Barnala. The arrivals has been the slowest in the last five years, indicating a drastic fall in production this season. As per the Punjab Mandi Board, Punjab this time may face it challenging to touch even 50 percent of the 50 lakh quintals of cotton produced in 2020-21. Till 18th November 2021, around 7.98 lakh quintals of cotton was purchased in 9 districts as compared to 16 lakh quintals for the corresponding period last year.

Weather Forecast:

Thunderstorm accompanied with lightening very likely at isolated places over Tamil Nadu, Pondicherry & Karaikal, Rayalaseema and Coastal Andhra Pradesh & Yanam.

International Fundamentals:

The ICE cotton Futures was higher by 35 points at 106.72 cents/lb. The Cotlook A index was at 119 cents/lb. The AWP for cotton was at 97.06 cents/lb.

According to the International Cotton Advisory Committee December report, India's cotton production for the 2021-22 season is projected at 5.90 million metric tons lower from the previous season estimate of 6.00 million metric tonnes. While consumption is estimated at 5.70 million metric tonnes. Global cotton production is projected at 25.73 million metric tonnes higher from previous season of 24.30 million metric tons.

According to the fibre to fashion textile and apparel (texpro) data, Pakistan cotton production is expected to increase in 2021-22 season by 44.44 percent to 6.50 million bales compared to 4.50 million bales in 2020-21 season due to excellent conditions during harvest and a good growing season. Cotton imports are expected to fall by 6.19 percent during 2021-22 season as compared to 5.33 million bales in 2020-21 season. The country's cotton yarn and cloth exports have been rising consistently since the beginning of this year. Further Cotton consumption in Pakistan is also expected to increase by 5.64 percent to 11.23 million bales in 2021-22 compared to 10.63 million bales in 2020-21 season.

The United States is now looking to enhance its stake in cotton exports to Bangladesh to strengthen the US foothold in Bangladesh's market, the US exporters and their representative put an emphasis on resolving issues, such as obligation to fumigate US cotton after imports, not being able to send cotton laden ships directly to Bangladesh in the absence of a deep seaport, a hike in shipping costs and other logistic costs.

USDA has released US cotton harvested as of 21st November 2021, showing the US at 75 percent versus the 5 year average of 71 percent. Georgia and South Carolina were the furthest behind, while California, Texas and Oklahoma were the furthest ahead.

According to the USDA'S WASDE November report, the U.S. production was projected slightly higher at 18.2 million bales while the domestic mill use and exports were unchanged. U.S. ending stock were projected higher at 3.4 million which is 250,000 above the previous year.

The cotton harvest season in Xinjiang is expected to last until mid-November this year, with the output expected to reach 5.2 million tonnes. The region has contributed nearly 90 percent of china's cotton production capacity and about 20 percent of the global cotton production.
