The sudden dip in the global demand due to the pandemic scare and poor quality of raw cotton in areas of Punjab has lowered the rates of cotton crop by Rs. 1,500 per quintal in the last two weeks. For the 2021-22 season, average prices for the cotton at Punjab market was Rs, 9,500 per quintal which means 70 percent of the crop was purchased at around Rs. 9,500 and nearly 10 percent of the best quality was sold even higher than Rs. 9,500. Whereas, 20 percent of the cotton was being sold below the model rate due to poor quality. However, the mode rate of cotton in the last 10 days remains static at about Rs. 8,000 per quintal. For the current season the worst ever quality of cotton is being reported from Bhatinda and Mansa districts due to pink bollworm infestation earlier in the crop. According to the Punjab Mandi Board data, About 9.57 lakh quintal of cotton was purchased in the state till 04th December 2021 as compared to 21 lakh quintals in the corresponding period last year. Although the new crop arrivals are slow in the local markets and domestic mills are making limited purchases due to the high prices of the natural fibre compared to the previous season. About 35,000 to 40,000 cotton are daily arriving in the market. Currently arrivals are slow as farmers are busy with marriage season and there is also labour shortage to pluck cotton. The arrivals are expected to pick up after 10th December 2021.
