

**Domestic Fundamentals:****Market Outlook:**

*The cotton physical market showed a mixed trend across India today. MCX cotton spot price was higher at Rs.37,060/bale on Saturday. ICE cotton futures closed red on Friday.*

**News:** *Cotton yarn prices in India slipped further by up to ₹8 per kg as the market received sluggish demand. According to trade sources, domestic demand did not support market sentiment as production activities remained weak in garment units. Export demand is weak due to uncertainty of geo-political developments after Russia's attack on Ukraine. In Mumbai market, yarn prices fell by ₹2-8 per kg as demand weakened further. 60 count carded cotton yarn of warp and weft varieties were traded at ₹1,910-1,920 and 1,670-1,720 per 5 kg, respectively.*

*Despite the infestation of pink bollworm on cotton crop during the 2021-22 seasons. Punjab has set a target to increase area under cotton by 23 percent in the coming 2022-23 season. Cotton was sown in 2021-22 season at 119.66 lakh hectares as compared to previous season of 128.07 lakh hectares across India.*

*Cotton Association of India has reduced its January estimate of the cotton crop for the 2021-22 season by 5 lakh bales to 343.13 lakh bales from its previous estimate of 348.13 lakh bales. The association has attributed the reduction in crop estimate to the drop in production in States including Gujarat, Telangana, Odisha, Karnataka and Andhra Pradesh. AgriWatch has estimated cotton production for 2021-22 season at 342.60 lakh bales lower from its previous season estimate of 365.00 lakh bales.*

*The total cotton supply for the month of October 2021 to January 2022 remained at 272.20 lakh bales, which consists of the arrivals of 192.20 lakh bales, imports of 5 lakh bales during the month of January 2022 and Opening Stock of 75 lakh bales equivalent to 79.69 lakh running bales at the beginning of the season on 1<sup>st</sup> October 2021. Further, the CAI has estimated cotton consumption for the months of October to January 2022 at 114 lakh bales while export shipment of cotton during the months of October to January 2022 is estimated at 25 lakh bales. Stock at the end of January 2022 is estimated at 113.20 lakh bales.*

*As per the Government's 02nd Advance Estimate, cotton production for 2021-22 have been projected at 340.63 lakh bales, which is 3% lower than the previous year's final production estimate of 352.48 lakh bales. As per AgriWatch estimate based on the arrival pattern, production is expected to be lower at 342.60 lakh bales against the previous season estimate of 365 lakh bales. Production is expected to be lower in the 2021-22 season mainly because of lower sown area in 2021-22 season at 119.66 lakh hectares as compared to previous season of 128.07 lakh hectares.*

*Cotton arrivals from 01<sup>st</sup> October 2021 till 22<sup>nd</sup> February 2022 has reached 3590.09 thousand tonne as compared to previous season arrivals of 2570.19 thousand tonne. For the current 2021-22 season, cotton arrivals were higher from Telangana, Madhya Pradesh and Haryana whereas it was lower from the states of Maharashtra, Gujarat, Punjab and Karnataka. The arrivals were lower mainly because of the late rains caused by the La Nina effect which has affected the yield of cotton.*

*The Government had set the date of submission of online application under the Rs 10,683 crore PLI scheme for textiles to January 31, 2022 which in late January was extended till February 14, 2022. As per the prescribed norms, the scheme will be in operation from September 24, 2021 to March 31, 2030 and the incentive under the scheme will be payable for five years.*

### Weather Forecast:

Thunderstorm accompanied with lightening & gusty winds at isolated places over Jammu & Kashmir, Ladakh, Gilgit, Baltistan, Muzaffarabad, TamilNadu, Pondicherry, and Karaikal. Heavy rainfall at isolated places over TamilNadu, Pondicherry, and Karaikal is expected.

### International Fundamentals:

The ICE cotton Futures was up by 388 points at 116.42 cents/lb. The Cotlook A index was at 138.7 cents/lb. The AWP for cotton was at 112.71 cents/lb.

The U.S. Department of Agriculture's (USDA's) first 2022-23 world cotton projections anticipate that global consumption will exceed production, reducing world stocks by 2.5 million bales. World cotton production is expected to rise 3.2 percent, with harvested area rising in some countries. Global consumption is expected to grow at about the long-term average rate, as the world economy continues its recovery from the severe downturn in 2020 and supply chain problems in 2021.

According to USDA's February report, the world ending stock is expected to fall further to 84.31 million bales (480 pounds each), the lowest level in 3 years from their January's forecast of 85.01 million bales and 2020-21's ending stock of 88.41 million bales. India's cotton production is estimated at 5.99 million MT in 2021-22 from 6.01 million MT in 2020-21. Cotton production in China is expected to increase in this season at 3.84 million MT from previous season of 3.18 million MT.

Textile exports hit record \$10.93 billion in the first seven months of the current Financial Year as per the data showed on last Wednesday. The textile earnings showed a growth of 24.7 percent over corresponding period of the last fiscal when the country's total textiles sales in international market were of \$8.76 billion.

Bangladesh's cotton production has been low as farmers are opting for other cash crops instead of the white fibre, missing out at least a \$3-billion domestic market.

Cotton plantings in the United States are likely to increase as a result of strong international demand, increasing input prices for farmers, and a prolonged drought in Texas. Cotton futures in New York hit a new decade high at the end of January, signalling a potential increase for the world's largest cotton provider. Last year, expectations for a second worldwide shortfall pushed the fibre up 44 percent.

Cotton arrivals in Pakistan have increased by 33.91 percent to 7.42 million bales in 2021-22 season. Sindh and Punjab has recorded an increase in cotton production this season.
