

**Domestic Fundamentals:****Market Outlook:**

*The cotton physical market showed a mixed trend across India today. MCX cotton spot price was stable at Rs.46,000/bale on Wednesday. ICE cotton futures closed red on Tuesday.*

**News:** *The cotton yarn traders in south India are expecting demand to pick up in the coming weeks. Spinning mills are also reducing cotton yarn production which will support prices. Further, downstream manufacturers are likely to increase buying because of possible supply crunch in the market.*

*According to the market sources, government may impose a temporary ban on cotton exports if cotton prices continue to surge. Cotton prices are currently around Rs. 93,500 per candy for Shanker-6 variety. Although, prices for some varieties have even touched Rs. 1,00,00 per candy. As a result a ban could ease the prices in the domestic market. In the past week, the government had removed 10 percent import duty on cotton.*

*According to the market sources, Telangana government is targeting to increase the area under cotton by 55–65 percent to about 28–30 lakh hectares as compared to last year's 18 lakh hectares even as the cottonseed industry pegged the growth in cotton acreage at 15 per cent in the upcoming Kharif season. As per USDA report, the all-cotton planted area for the coming season (2022) is estimated at 12.2 million acres, higher 9 percent from last year.*

**Weather Forecast:**

*Thunderstorm accompanied with lightening winds & hail is very likely at isolated places over Chhattisgarh, Gangetic West Bengal, Andaman & Nicobar Islands, Odisha, and Rayalaseema, and with lightening at isolated places over Jharkhand, Telangana, Coastal Andhra Pradesh, & Yanam, South interior Karnataka, Tamil Nadu, Pondicherry, Karikal and Kerala & Mahe, and with lightening and gusty winds at isolated places over Jammu & Kashmir, East Uttar Pradesh, Sub- Himalayana, West Bengal & Sikkim, and Assam & Meghalaya. Heavy rainfall at isolated places over Andaman & Nicobar Islands, and Tamil Nadu, Pondicherry and Karikal. Heat wave condition at isolated places over north Madhya Maharashtra, and Vidarbha.*

**International Fundamentals:**

*The ICE cotton Futures was lower by 383 points at 153.33 cents/lb. The Cotlook A index was at 166.05 cents/lb. The AWP for cotton was at 138.6 cents/lb.*

*As the 2021-22 cotton season is coming towards its closure, the production and consumption both are on higher side. Global cotton production is higher by 8.4 percent from 24.39 million tonnes to 26.43 million tonnes in 2021-22 season. While the global cotton production is on the higher side, India (3.7%) and china(3.1%) cotton production is on its lower side as compared to the previous season mainly because of the lesser sown area. Further, Global cotton consumption has increased by 1.9 percent to 26.16 million tonnes as compared to the previous season. Global cotton trade was down from the previous season. The drop is mainly due to logistical complications and supply chain disruptions over the course of the 2021-22 season.*

*According to the U.S. Crop progress report, as on 01<sup>st</sup> May 2022, U.S cotton planting stands at 16 percent which is 1 percent higher as that of previous season of 15 percent. U.S. cotton planting was same as that of past 5 years average.*
