

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed a mixed trend across India today. MCX cotton spot price was lower at Rs.48,850/bale on Saturday. ICE cotton futures closed red on Friday.

News: *As per the market sources, government may impose temporary restrictions on cotton exports as the prices are at historic high making the fabric costlier. Although as per the textile industry, restricting cotton exports is unlikely to serve any purpose as the outbound shipments of cotton are unviable now, as domestic prices of the fiber have exceeded the global levels.*

Indian domestic market remained stable with slow supply against regular demand, through mills have reduced consumption. Weaker Indian rupee had made imports costly. Cotton fiber (Shanker-6) prices have touched a record high at Rs. 1,02,500 to Rs. 1,03,000 per candy in the last week. Agriwatch expects cotton fiber prices to range between Rs. 1,04,000 – Rs. 1,06,000 per candy in the coming week.

The Textile and garment manufacturer have approached the government to ban the future trading of cotton as it is adding to market speculation and further driving up the prices of the cotton in the market.

For the coming 2022-23 season, cotton sowing is being progressing in northern states along with some parts of Madhya Pradesh and Gujarat. As per Agriwatch market sources, around 5 percent of the cotton sowing is done in Gujarat where water availability was there. Also, In Madhya Pradesh sowing is progressing in Khandwa region.

The textile value chain in Gujarat is reducing cotton production by nearly half as textile mills are facing the possibility of shutting down units as raw cotton and cotton yarn prices kept on rising despite the governments steps to remove import duty.
