

Domestic Fundamentals:**Market Outlook:**

The cotton physical market showed a mixed trend across India today. MCX cotton spot price was lower at Rs.47,370/bale on Monday. ICE cotton futures closed red on Friday.

News: *With the expectation of increase in cotton acreages for the 2022-23 season, the central government may hike the minimum support price of cotton by 10-15 percent in the coming Kharif season. During the 2021-22 season, the government had fixed minimum support price of Rs. 6025 per quintal for cotton.*

According to the market sources, area under cotton cultivation is expected to grow in 2022-23 season by 7-9 percent on year-on-year basis to 13.2 million hectares on account of a strong demand and sufficient availability of seeds. The farm ministry has estimated cotton acreages at 12.0 million hectares. Cotton sowing is still progressing in Punjab, Haryana and Rajasthan and is expected to continue till 15th June 2022.

Telangana government is planning to launch a single pick cotton pilot project on approximately 50,000 acres.

As per the market sources, government may impose temporary restrictions on cotton exports as the prices are at historic high making the fabric costlier. Although as per the textile industry, restricting cotton exports is unlikely to serve any purpose as the outbound shipments of cotton are unviable now, as domestic prices of the fiber have exceeded the global levels.
