Market Outlook:

The cotton physical market showed a mixed trend across India today. MCX cotton spot price was lower at Rs.37,890/bale on Tuesday. MCX cotton prices have reduced over 25 % as compared to the last week mainly because of the expectation of good production in the 2022-23 season. ICE cotton futures closed red on Monday.

News: Cotton Corporation of India has estimated cotton production to increase by 15% at 370 lakh bales in the 2022-23 season. With the increase in area, yields are also expected to increase due to good weather conditions. Further production is expected to rise in the 2022-23 season. As per CCI, If the weather remains conducive in the coming months, the production can increase to 370-375 lakh bales. However, if not, then the production can fall to 325-330 lakh bales.

As of Sept. 16th, 2022 Cotton sowing has reached 127.14 Lakh Ha. Vs 118.23 Lakh Ha. same period last year. Agriwatch expects overall cotton sowing to reach 128 Lakh Ha. in 2022-23 season. Earlier, due to excess rainfall in July month cotton sowing was affected in central and southern India.

AgriWatch expects that the coming 2-3 weeks are very crucial for the cotton crop. The ongoing heavy rains in Maharashtra and Gujarat may affect the cotton arrivals in the coming weeks. Also, if rain continues the cotton yield and quality may get affected adversely, currently the crop is in flowering stage in most of the key producing regions. In the coming days, raw cotton prices may

see an uptrend if rains continue as predicted by Indian Metrological Department (IMD).

International Fundamentals:

The ICE cotton Futures was lower by 325 points at 96.04 cents/lb. The Cotlook A index was high at 121.75 cents/lb. The AWP for cotton was 95.17 cents/lb.

According to the U.S. Crop progress report, as of 18th Sep 2022, U.S cotton Cotton Bolls opening stands at 59 percent which is higher than that of the previous season (46 percent). In the previous week cotton bolls opening was 49 percent. Overall 4 percent of the U.S Cotton Crop is in excellent condition, 30 percent in good to a fair condition which was 28 percent in the previous week.

According to USDA, Cotton and product update report, global cotton production is estimated higher at 118.40 million bales, and stocks are projected higher this month. However, Consumption has slightly decreased to 118.60 million bales with lower projected use in Pakistan and Vietnam. Global trade is unchanged as higher U.S. exports more than offset lower Brazil shipments.

Pakistan cotton production is forecasted down by 700,000 bales to 5.5 million bales amid smaller crop estimation due to heavy rains and floods. Cotton consumption is estimated lower by 400,000 bales to 10.5 million bales. Overall cotton imports are likely to increase in the 2022-23 season to 4.8 million bales. However, with a significant decline in production from the United States, The All-Pakistan Textile Mills Association is reported to have asked government officials to consider lifting the country's restriction on imports of Indian cotton. Earlier, Pakistan has restricted India cotton in 2019 due to border disputes and this urgent request underscores Pakistan's dire need for cotton.
