International Market Scenario

International cotton prices remained slightly weak during the week. Cotlook A index weekly average stood 86.18 at cents/pound this week, which was 86.33 cents/pound during last week

Major Market Highlights:

The most active cotton contract on ICE Futures U.S., the March contract settled down 1.56 cent, or 1.98 percent, at 77.22 cents per lb. The contract fell to 77.2 cents a lb earlier in the session, its lowest since Oct. 9.

This month's 2018/19 U.S. balance sheet shows lower production, consumption, exports, and ending stocks. Production is reduced 1.35 million bales due mainly to decreases in the Southeast, reflecting the impact of adverse weather. Domestic mill use is reduced 1.00 lakh bales and exports are reduced 5.00 lakh bales. Projected ending stocks in 2018/19 are 7.00 lakh bales lower this month, at 4.3 million bales or 24 percent of use. The marketing-year-average price received by producers is forecast between 71.0 and 77.0 cents per pound, with a midpoint of 74.0 cents, 1 cent above last month.

This month's 2018/19 world supply and demand forecasts include lower beginning stocks, production, consumption, trade, and ending stocks. Historical revisions to Benin's exports resulted in a 3.75 lakh bales decrease in 2018/19 beginning stocks there, accounting for much of this month's 5.00 lakh bale decline in global beginning stocks. Forecast global production is reduced 2.3 million bales as smaller expected crops in the United States, India, Pakistan, and Turkmenistan offset an increase in Benin. Consumption is reduced 8.75 lakh bales, with smaller expected mill use in India, Pakistan, Turkey, Brazil, Indonesia, and the United States. Global ending stocks are 1.8 million bales lower this month, at 73 million bales or 57 percent of mill use.

The US Department of Agriculture's Foreign Agricultural Service has projected India's Cotton production in 2018-19 (Aug-Jul) at 36.5 mln bales, down nearly by 2% against 37.2 mln bales in previous year, where one Indian bale equals 170 kg. Dry weather in the key growing regions of Gujarat and Maharashtra have hampered crop development and will likely to affect yields of standing crop. The US agency has estimated opening stock of Cotton for 2018-19 at 15.6 mln bales, higher than the opening stock of 14.3 mln bales in 2017-18. Imports have been estimated at 1.9 mln bales in 2018-19, compared with 2.2 mln bales in the previous year. On the demand side, consumption by mills in 2018-19 is seen at 32.1 mln bales, slightly higher from 31.4 bales a year earlier. Exports are seen falling to 5.5 mln bales from 6.7 mln bales in 2017-18. Considering consumption and exports, the closing stock at the end of 2018-19 is pegged at 16.6 mln bales, up from 15.6 mln bales the previous year.

Cotton production is estimated to fall 25 percent short of its target of 14.37 million bales in the current season as water shortage and pest attacks have squeezed the crop yields – signaling hard time ahead for the already struggling economy that is heavily reliant on fibre.

Official data on last week revealed that cotton output for 2018/19 is estimated at 10.847 million bales as water shortage and cotton leaf curl virus (CLCV) held back overall gains of areas under cultivation. The data showed that cotton production in the Punjab is estimated at 8.077 million bales as against the target of 10 million bales, while Sindh's output is feared to be just 2.60 million bales against the target of 4.20 million bales.

The country achieved a decade-high growth of 5.8 percent during the last fiscal year, but analysts feared the economy is likely to slide off on external pressures. An estimate said one million bales have an impact of 0.5 percentage points on GDP and the effect of cotton shortage on the economy due to the sector's backward and forward linkages with textile industry could simply be assessed.
