

COTTON WEEKLY RESEARCH REPORT**21 Jan 2019****Domestic market summary**

Domestic market Scenario: Most Cotton spot market prices are witnessed weak during the week. The Cotton spot market prices have been higher this season on account of bullish global cues. Also, pace of arrivals in India has been slow as farmers await better prices. Prices may strengthen gradually over the next few months as arrivals are expected to remain slow and demand might improve significantly from China, Vietnam, Bangladesh and Pakistan. Average price of Lint at Sirsa during the week was Rs. 4354 per maund (of 37.32 Kg each), almost slightly weak from the previous week price of Rs 4397. Cotton fiber (Shankar-6) prices noticed slightly down trend this week. Average price was Rs 42566 per candy (of 355.6 kg each) during the week, which was Rs 43280 per candy previous week.

Weekly Price Outlook : In the coming week we expect Kapas price to remain to Range bound with the price band of Rs 5450-5800 per quintal in the Rajkot market. Lint price at Sirsa is likely to be in range of Rs 4200-5000 per maund.

Major Market Highlights:

Indian physical market gained nearly 500 Rs. Per candy during this week. In Gujarat ginners have big disparity so ginning is running in slow pace. Some ginners closed ginning operation for festival week.

Kapas prices for BT cotton traded lower on week on week at Adoni market, last reported around INR 5556 per quintal. Cotton supplies reported slowly during the week, mainly due to festival holidays in key cotton growing regions. All India cotton daily arrivals are stated around 150 K bales. Demand from the export market remains slow, domestic buying is reported to be hand to mouth. Total arrivals reached approximately 13.70 million bales by now.

Domestic prices continue to remain at elevated levels due to hoarding by farmers on expectation of spike in prices in coming days as domestic consumption remains bullish and output seen lower. MCX, cotton prices have risen almost 3% , since mid-December and had hit a three week high of 21,280 rupees a bale.

As per the latest estimates by Agriwatch, cotton output in country during the season 2018-19 would be around 338.22 lakh bales (of 170 kg each) which is lower compared to 365 lakh bales of last season. AW has reduced the crop estimate for Gujarat to around 92.82 lakh bales (from 108 lakh bales last year), Maharashtra to around 72 lakh bales (83 lakh last year), Telangana and AP by 52.00 lakh and 16.50 lakh bales respectively. The main reason for reduction in cotton crop is that farmers have uprooted more than 50% of their cotton crop after second picking and foregone the third and fourth pickings due to moisture deficiency and pest attacks. Dry spells in the initial stages of the crop, too, led to stunted growth of bolls, were the major reasons to decline in cotton yield in India.

Agriwatch expects imports of cotton during current year may reach 27 lakh bales as against last year's of 15 lakh bales. This is supported by weak global prices, which have touched their lowest levels in more than a year at 72.1 cents per pound for ICE futures by December. The volatility in exchange rate, and expectation of lower output this year leads to higher imports of cotton. Although imports are higher than last year, importers are finding it difficult to

locate quality material as good quality cotton of the US, Australia and Brazil has already been sold. Also, exports have declined to 53 lakh bales compared to 70 lakh bales during corresponding period of last year. The reduction in exports is mainly due to stronger Indian Rupee, lower production and weak international prices.

Cotton Balance Sheet (India):

| In Lakh Bales | 2014-15 | 2015-16 | 2016-17 | 2017-18 | 2018-19* | Oct-Dec* | Jan-Mar* | Apr-Jun* | Jul-Sep* |

*All figures in Lakh Bales (of 170 Kgs. Each) Source: CAI& Agriwatch *: estimated*

As per the latest estimates by Agriwatch, cotton output in country during the season 2018-19 would be around 338.22 lakh bales (of 170 kg each) which is lower compared to production of 365 lakh bales of last season.

Following lower production, imports will rise marginally to 27 lakh bales compared to 15 lakh bales in previous season.

Due to lower opening stock imports, and lower production of cotton availability would be standing lower this season at 389.26 lakh bales compared to 428.04 lakh bales during the previous season.

Total domestic consumption (Including mill, small mill and non-mill consumption) would be around 367 lakh bales compared to 404 lakh bales during the previous season.

Cotton exports are expected to remain lower as that of previous year. It is expected that country would export around 53 lakh bales of cotton in the season 2018-19.

Ending stocks are expected to be around 22.26 lakh bales, it is lower compared to the ending stocks of previous season

Domestic Cotton Prices Scenario

Kapas (Raw Cotton) Weekly Price Scenario

Weekly Price Review: Weekly kapas average price at Rajkot rose is Rs 5566/quintal this week.

Weekly Price Outlook: Kapas prices are expected to remain range-bound in coming days. The expected range for Kapas at Rajkot is Rs 5450-5800 per quintal for the coming week.

Kapas Monthly M-o-M Price Scenario

5400-6300 per quintal.

Kapas(seed cotton) prices in country noticed weak tone during the Dec month when compared to the previous month, and the same is ruling higher compared to the prices during the corresponding month of the previous season.

Monthly average price of Kapas at Rajkot remained Rs. 5654 per quintal during Dec, which was Rs. 5802 during previous month and Rs.5091 per quintal during the corresponding month last year. We expect Kapas prices to remain to firm in the coming month. The expected price range for Sep month is likely to be Rs

Spot Price versus MSP

The Kapas prices are ruling above the MSP so far. The gap between the two prices has decreased this week of dec. The average gap between the prices was Rs 122 compared to Rs 130 a week earlier, this means prices are decreasing.

Lint price Outlook

Lint prices remained weak during the week owing to weak tone prevailing in market. Weekly average price of Lint at Sirsa remained Rs 4354 per maund of 37.32 kg each, as compared to the previous week price of Rs 4397 per maund.

Cotton Fiber price Outlook

Cotton fiber noticed slightly down trend in this week compared to the previous week. Average price was Rs 42566 per candy (of 355.6 kg each) during the week, which was Rs 43280 per candy previous week. and around Rs 40760 per candy during the corresponding week previous season. We expect cotton fiber to remain in range of Rs 42000 -45000 per candy in the coming week candy.

Cotton Seed Oil and Cotton Seed Oil Cake

Cotton Seed Oil weekly Price Scenario

Cotton seed oil price noticed firm during the week. Weekly average price in New Delhi is Rs 703 per 10 Kg, to the weekly average price of Rs 698 per 10 Kg in previous week.

| | Weekly Average Price as on (Rs/10 kg.) | | % Change |
|------------------|--|-----------|----------|
| | 17-Jan-19 | 10-Jan-19 | |

*Source: NCDEX

International Market Scenario

International cotton prices remained firm during the week. Cotlook A index weekly average stood 82.34 cents/pound this week, which was 81.04 at cents/pound during last week.

Major Market Highlights:

The most active cotton contract on ICE Futures U.S., the March contract settled down 0.48 cent, or 0.65 percent, at 73.89 cents per lb. It traded within a range of 73.76 and 74.66 cents a lb. On 30th January Chinese delegation will go to US for further negotiation to resolve the trade dispute. Market is looking for some positive out come from this meeting.

World cotton production in 2018/19 is projected at 118.7 million bales, 4 percent (5 million bales) below last season, as a reduction in area and yield expectations both contribute to the decrease. Global harvested area is forecast at 33.3 million hectares (82.2 million acres) this season, 1 percent lower as area declines in most major producing

countries more than offset an increase for Brazil. The global yield is forecast at 777 kgs per hectare (693 pounds per acre), slightly above the 5-year average.

U.S. cotton production is estimated at nearly 18.6 million bales- around 2.3 million bales (11 percent) below the 2017 crop. Planted and harvested area this season are estimated at 14.0 million and 10.4 million acres, respectively; detrimental weather conditions in the Southwest and Southeast this season pushed the national abandonment rate to 26 percent, the highest in 5 years. The 2018 national yield is forecast at 860 pounds per harvested acre, below last season's record of 905 pounds but above the 3-year average of 846 pounds. Upland cotton production is estimated at 17.8 million bales, the second largest in a decade. The extra-long staple (ELS) crop is forecast at 771,000 bales, the largest since 2012's 780,000 bales.

For China, 2018/19 cotton production is projected at 27.0 million bales, 500,000 bales (2 percent) below a year earlier, with both harvested area and yield forecast lower. Most of China's cotton is produced in the western region of Xinjiang, where yields are significantly higher and have resulted in record yields for China in recent years as Xinjiang's share of the crop has risen. However, the national yield in 2018/19 is expected to dip below the 2017/18 record of 1,761 kg per hectare to 1,755 kg per hectare.

Pakistan's production in 2018/19 is forecast at 7.4 million bales, 800,000 bales (10 percent) below 2017/18 and the smallest crop there in 3 years. An 11-percent reduction in area is largely responsible for this season's decline, as yield is projected to rise slightly to the 5-year average of 671 kg per hectare. For Australia, lower area and yield are reducing the crop by nearly 50 percent to 2.5 million bales, the lowest in 4 years.

Cotton production in Brazil is forecast to reach 11.0 million bales in 2018/19, 1.8 million bales (19 percent) above last season. Excellent growing conditions, in addition to favourable prices, are expected to push plantings—which largely occur in December and January—to 1.4 million hectares, the highest since a similar amount was harvested in 2011/12. Brazil's yield is also forecast higher in 2018/19, reaching a record of 1,711 kg per hectare and eclipsing 2017/18's high of 1,708 kg per hectare.

Cotlook A Index

Cotlook A index remained firm during the week.

| Prices in Yuan per ton | | | |

USA Spot Prices

Cotton was sharply lower last week as weak overall demand continues to impact the US market. On the other hand, world production and supplies are going lower due to bad weather in the growing season for major producers around the world, including India, Pakistan, and Australia. China had problems with its growing weather, too. Demand for US Cotton has been disappointing, as the weekly export sales reports have shown average demand at best since the start of the marketing year. China has not bought any US Cotton this year and has been active in other markets, especially India. US prices are down and China might start to look at the US crop, but there have been worries about the quality of the US crop due to some extreme growing conditions in Texas and the Southeast over the Summer and Fall. Ideas are that the quality worries have kept some importers of US Cotton away from the market.

Weekly Technical Outlook:

Commodity: Cotton
Contract: Jan

Exchange: MCX
Expiry: Jan 31, 2019

Cotton

Technical Commentary:

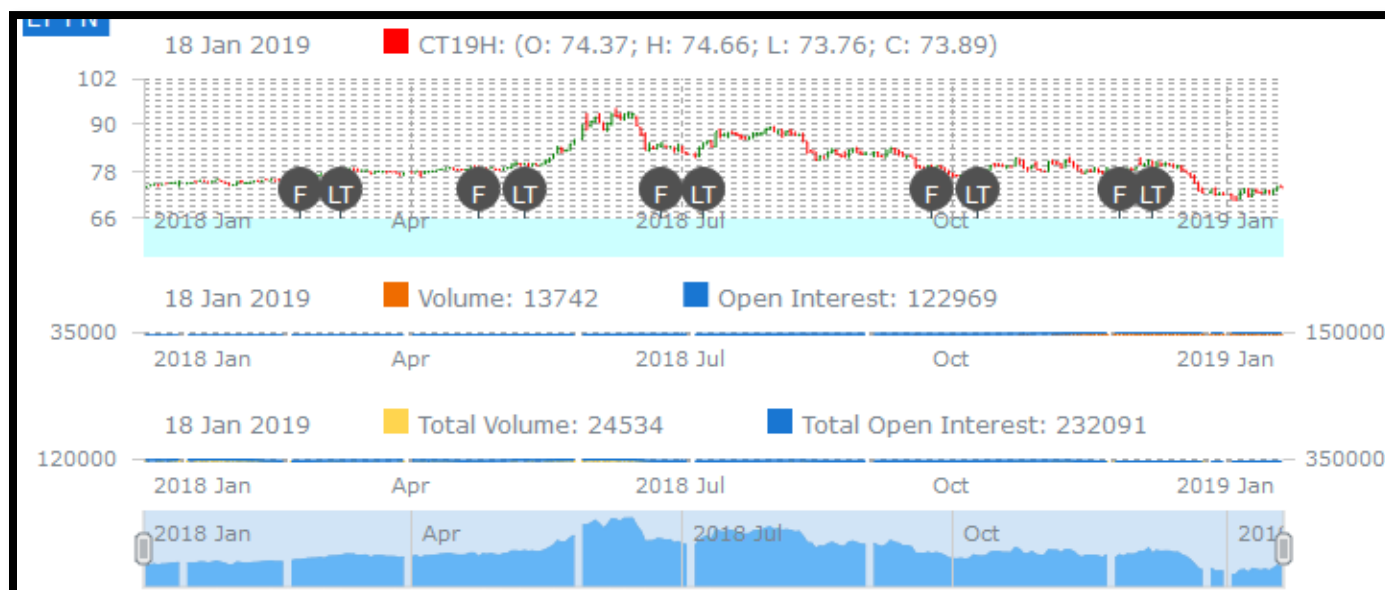

- On the technical front, the cotton 29 mm January contract at MCX shows some recovery. However, still the trend is down as prices are trading below 20-day EMA on the daily chart
- Candlestick pattern of daily chart shows bearish movement in the market on low selling pressures.
- Low prices and high volume indicate short build up phase of the market.
- Oscillator like RSI fell and indicates further fall in the market.
- We will advise traders to sell today.

Strategy: **BUY**
