

COTTON WEEKLY RESEARCH REPORT**25 Feb 2019****Domestic market summary**

Domestic market Scenario: Indian physical market remained steady. Gujarat Shankar 6 Price remained in small range but Maharashtra is facing more selling pressure. The price in Indian market is higher than that internationally. This is backed by higher MSP and purchases by CCI. The market may move up only through larger offtake by exporters or by domestic industry. This may occur gradually over the next few months. Average price of Lint at Sirsa during the week was Rs. 4340 per maund (of 37.32 Kg each), unchanged from the previous week price of Rs 4340. Cotton fiber (Shankar-6) prices noticed slightly down trend this week. Average price was Rs 41533 per candy (of 355.6 kg each) during the week, which was Rs 41983 per candy previous week.

Weekly Price Outlook : In the coming week we expect Kapas price to remain to Range bound with the price band of Rs 5450-5800 per quintal in the Rajkot market. Lint price at Sirsa is likely to be in range of Rs 4200-5000 per maund.

Major Market Highlights:

Gujarat 29 mm Cotton sold between 42,150 to 42,450 Rs./Candy.

All India Daily Arrivals remained between 1,30,000 to 1,50,000 bales.

Gujarat Daily Pressing was approximately 45,000 bales.

Indian Rupee remained stable between 71.11 to 71.34 during this week.

CCI so far, procured around 8.5 lakh bales of kapas at MSP.

Indian arrivals are slow. CCI was procuring big quantities from Telangana and Maharashtra at MSP. Total CCI procurement Crossed 8.5 lakh bales, overall supply is limited so there is no big pressure. CCI expects procurement to reach 1.50 million bales by the end of the current season.

The Cotton Association of India has pegged India's exports of the commodity in Oct-Jan at 2.7 -2.8mln bales (1 bale = 170 kg), around 25% lower on year. The association attributed the decline to higher domestic prices. Higher prices in domestic markets during Nov-Dec made overseas sales economically unviable. Despite arrivals being at their peak, domestic prices of cotton were high in Nov-Dec. This was because farmers hoarded the produce, expecting a spike in prices due to lower output estimates for the current season.

For the current year sharp 26% hike in minimum support price for cotton in the ongoing season hitting the textile industry to some extent, traders and government agencies have recommended a further 10-15% increase in support price for 2019-20 (Oct-Sep), to ensure farmers don't shift to other crops. The Cotton Association of India has recommended a 10% increase in support price for 2019-20.

*All figures in Lakh Bales (of 170 Kgs. Each) Source: CAI& Agriwatch *: estimated*

As per the latest estimates by Agriwatch, cotton output in country during the season 2018-19 would be around 336.53 lakh bales (of 170 kg each) which is lower compared to production of 365 lakh bales of last season.

Following lower production, imports will rise marginally to 27 lakh bales compared to 15 lakh bales in previous season.

Due to lower opening stock imports, and lower production of cotton availability would be standing lower this season at 387.56 lakh bales compared to 428.04 lakh bales during the previous season.

Total domestic consumption (Including mill, small mill and non-mill consumption) would be around 367 lakh bales compared to 404 lakh bales during the previous season.

Cotton exports are expected to remain lower as that of previous year. It is expected that country would export around 53 lakh bales of cotton in the season 2018-19.

Ending stocks are expected to be around 20.57 lakh bales, it is lower compared to the ending stocks of previous season.

International Market Scenario

International cotton prices remained weak during the week. Cotlook A index weekly average stood 80.13 cents/pound this week, which was 80.56 at cents/pound during last week.

Major Market Highlights:

This week was volatile week and giving some breathing space to bulls. On 21st Feb anticipating good US Export Sales numbers and some positive news from trade negotiation between US and China NY future rose to recent high. Cotton prices were able to challenge the 72-cent level on the week, but settled at 71.84, basis March futures. May futures settled the week at 73.01. This week's upside movement in March was not unexpected as it marked first Notice Day for the March delivery period.

The cotton production in Pakistan up to Feb 15 stood short by 6.83 per cent at 10.7 million bales over the corresponding period last year. This is the seventh consecutive year the country is faced with a short crop of around 4.8m bales from a record production of around 15m bales achieved in 2011-12. According to trade sources, in order

to meet the shortfall, textile spinners are likely to import up to 3.5m to 4m bales, burdening foreign exchange reserves by around \$1 to \$1.2 billion. Cotton export is unaffected so far and we don't expect Pakistan to pose hurdles as their cotton industry requires raw material from India. India is the most accessible and price-lucrative market for them, Atul Ganatra, president of the Cotton Association of India.

The US net sales of 299,800 RB for 2018/2019 were up 31 percent from the previous week and 52 percent from the prior 4-week average. Increases were reported for Pakistan (130,300 RB), India (50,000 RB), Turkey (37,100 RB), Vietnam (28,000 RB, including 6,100 RB switched from China, 3,200 RB switched from South Korea, 500 RB switched from Japan, and 400 RB switched from Hong Kong), and Malaysia (15,000 RB, including 100 RB switched from Japan). Reductions were reported for South Korea (2,700 RB) and Japan (1,800 RB). For 2019/2020, net sales of 19,400 RB were reported for Bangladesh (15,000 RB) and China (4,400 RB). Exports of 181,100 RB were down 5 percent from the previous week, but up 3 percent from the prior 4-week average.

Cotlook A Index

Cotlook A index remained weak during the week. The Cotlook A Index was UNCH on February 21 to 80.30 cents/lb. The USDA Adjusted World Price was updated to 61.80 cents/ lb on Thursday, down 47 points from the previous week.

USA Spot Prices

Cotton was sharply high during last week last week as weak overall demand continues to impact the US market. On the other hand, world production and supplies are going lower due to bad weather in the growing season for major producers around the world, including India, Pakistan, and Australia. China had problems with its growing weather, too. Demand for US Cotton has been disappointing, as the weekly export sales reports have shown average demand at best since the start of the marketing year. China has not bought any US Cotton this year and has been active in other markets, especially India. US prices are down and China might start to look at the US crop, but there have been worries about the quality of the US crop due to some extreme growing conditions in Texas and the Southeast over the Summer and Fall. Ideas are that the quality worries have kept some importers of US Cotton away from the market.

Pakistan Spot Prices

Pakistan scrapped duties on import of cotton for February 1-June 30 to tide over shortage of the crop. In the current year, Pakistan has harvested 10.8 mln bales of cotton, down 25 per cent from initial target of 14.4 million bales. The Pakistan is likely to import 3.5-4 million bales - costing up to \$1.2 billion -as the crop size for season 2018-19 is estimated at 10.8m bales, against the annual demand of around 15m bales. India's cotton exports to Pakistan are unlikely to see a sharp jump, despite the neighboring country scraping import duty, as high domestic prices have

made exports uncompetitive. Indian cotton is currently available around 43,000 rupees a candy, while prices in Pakistan are trading at 43,500 rupees per candy.
