

## COTTON WEEKLY RESEARCH REPORT

10<sup>th</sup> June 2019

### Domestic market summary

**Domestic market Scenario:** Indian Domestic prices traded slightly lower compared to last week. The price in Indian market is higher than that internationally. Unless international markets recover, the market may continue to decline further as the current basis favors cheaper imports but adversely affecting the yarn exports as there is no parity. Average price of Lint at Sirsa during the week was Rs.4826.6 per maund (of 37.32 Kg each), weaker from the previous week price of Rs. 4886.6. Average price was Rs.45716 per candy (of 355.6 kg each) during the week, which was Rs. 45533 per candy previous week.

**Weekly Price Outlook :** In the coming week we expect Kapas price to remain steady with the price band of Rs. 6250-6500 per quintal in the Rajkot market and and hike in prices is likely to be seen after monsoon. Lint price at Sirsa is likely to be in range of Rs. 4750-5100 per maund.

### **Major Market Highlights:**

- Indian imports has continued and still exports are on hold due to less parity. India was the major buyer from US whereas overall export shipments was not strong last week.
- Gujarat 29 mm Cotton sold between 45,650 to 46,150 Rs./candy.
- All India Daily Arrivals remained between 15,000 to 20,000 bales.
- Gujarat Daily Pressing was approximately 5,000 to 6,000 bales.
- NY July futures w/w lost 2.49 cents.
- Indian Rupee remained stable between 69.25 to 69.47 during this week.
- **The bulls continue to point to ever increasing imports of U.S. cotton by India.** The world's largest cotton producing country finds itself with a weather reduced 2018-19 crop and is having to import cotton as the price of its dwindling domestic supplies increase almost daily. India will continue to buy U.S. cotton and this will offer slight upward price support for New York.
- **The country has produced a record of 275.93 million tons of cotton**, last year 328.05 million tons was produced according to the third advance production estimate released by the Ministry of Agriculture, in 2018-19.
- **USDA has pruned India's output for 2018-19 to 25.5 mln bales of 480 pounds each, that equals 32.7 mln bales of 170 kg each.** Until April, USDA had estimated India's output around 27.0 mln bales of 480 pounds or 34.62 mln 170-kg bales. The lower output is also reflected in 40% decline in exports and 100% rise in imports as estimated by the Cotton Association of India. India's exports for the current year are estimated

to fall to 4.6 mln bales from 6.9 mln bales, while imports may hike up to 3.1 mln bales, compared with 1.5 mln bales a year ago.

- **Cotton Association of India (CAI) recently released its latest cotton crop estimating the crop size at 315 lakh bales**, lowest in over a decade and significantly down from the previous year's output estimate of 365 lakh bales. The total cotton supply estimated by the CAI during the period from October 2018 to May 2019 is 325 lakh bales including the arrival of 288 lakh bales and imports of 9 lakh bales up to May 31, 2019.

## USA Spot Prices

Cotton was firmer last month as overall demand continues to impact the US market. On the other hand, world production is likely to expand in 2019-20 to 125.5 million bales, 7.0 million bales (6 per cent) above the 2018-19 estimate. Increase in both global cotton harvested area and yield together support the higher production estimate. Global area is projected at 34.5 million hectares, 4 per cent above 2018-19 and the highest in 8 years. The world yield is also forecast higher in 2019-20, at 791 kilograms per hectare. Demand for US Cotton has been inclined up by 68% compared to previous week, as the weekly export sales reports have shown good demand at best since the start of the marketing year including India, Turkey, Bangladesh and Vietnam. China imports from US this year has been declined and has been active in other markets, especially Pakistan and they might buy Indian cotton in the coming days. Earlier expected US crop was declined due to some extreme growing conditions in Texas and the Southeast over the Summer and Fall but the rains in early April in major cotton producing states lead to plantation progress as per latest report shows that 57% area is planted by 28th May but still low compared to 61% in the last season.

### Pakistan Spot Prices

The prices of cotton witnessed increasing trend settled about 3% higher in the cotton market due to unfavourable weather conditions prevailing in Pakistan and concerns about lower yields, with the backdrop of a bitter US- China trade war. According to the market sources, leading mills kept on the sidelines as they have already covered their position, but some small mills showed little interest in buying fine quality. In Pakistan, 2019-20 cotton production is expected to increase 300,000 bales to 8.0 million bales, as area rebounds from 2018-19 and the yield remains relatively flat.
