**Domestic market Scenario:** Indian Domestic prices traded low compared to last week. Although the price in Indian market is higher than that internationally. Prices may rise unless the demand increases in textile industry otherwise prices may remain steady for the next week also. Lint price at Sirsa is likely to be in range of Rs. 4700-4950 per maund.

### **Major Market Highlights:**

- The Indian cotton market sentiments remained steady and no further import contracts have been booked by India.
- US cotton planted area is estimated to reach 13.7 million acres, 3% below than previous year.
- Gujarat 29 mm Cotton sold between 45,250 to 45,450 Rs./Candy.

- NY July futures w/w lost 0.52 cents.
- Indian Rupee remained stable from 69.02 to 69.35 during this week.
  
- All India daily arrivals stood at 35,950 bales this week. The arrivals are dwindling around the above range. The demand for cotton still been low by the textile industries as there is no parity for the export.
- As on 27<sup>th</sup> June'19, the total cotton area of 27.08 lakh ha has been reported sown in India 15% less against the previous year of 32.2 lakh ha in 2018. Higher area is reported from Haryana (0.74 lakh ha), Punjab (0.28 lakh ha), Rajasthan (0.35 lakh ha) and Madhya Pradesh (0.23 lakh ha), whereas, less area is reported from Maharashtra, Telangana (3.92 lakh ha), Karnataka, AP (0.58 lakh ha), Tamil Nadu, Odisha and Gujarat.
- Around 15-20% more area is likely to be under herbicide resistant BT cotton in Maharashtra. Nearly 20-25 lakh hectare is expected to come under HT Bt variety of cotton this kharif. Nationally, around 40-45 lakh packets of HT Bt cotton seeds are reported to be in circulation, according to industry sources.
- The agriculture department in Bhatinda is targeting to increase the yield in the coming season for cotton from 888 kg/ha in 2018-19 to 920kg/ha in 2019-20 and would also bring the area to 1,40,000 ha in the year

2019-20. This year, the area was 91,000 ha. This would increase the yield of Punjab in the coming season as Bhatinda is one of the largest cotton growing districts of Punjab.

- Maharashtra finally covered with rain showers today. The monsoon is crucial for cotton sowing, therefore, Maharashtra would pick up the pace in sowing which was 0.12% behind last week. The area is expected to increase by 5% (2019-20) in the state.
- Restricted cotton sowing due to delay in monsoon has affected the planting progress in India. Till June 21<sup>st</sup>, around 18.2 lakh ha have been sowed declined from 20.7 lakh ha (12.08% less) in 2018-19. If monsoon is delayed more than 10 days, then cotton yield would be affected for the coming season crop.

### Pakistan Spot Prices

According to the market sources mills and spinners showed their some improved buying interest. It is most likely that the government may provide some incentives to cotton growers in coming days. Sharp swings in the rupee-dollar exchange rate parity did worry ginners and spinners who were already protesting the government decision of imposing general sales tax on raw cotton. In Pakistan, 2019-20 cotton production is expected to increase 300,000 bales to 8.0 million bales, as area rebounds from 2018-19 and the yield remains relatively flat.
