

COTTON WEEKLY RESEARCH REPORT
18th Nov 2019**Domestic market summary**

Domestic market Scenario: The cotton market across India showed weaker trend because of heavy rainfall occurred recently in the major cotton producing states. But CCI has started procurement across India along in Punjab, Haryana and Rajasthan but still a bit slow because of high moisture and the weather disrupted the trade in Gujarat and continued rains in Maharashtra, MP and Telangana. But after the cyclone “Maha” in Gujarat and Maharashtra, the weather improved in the cotton belts across India. CCI procurement in Maharashtra, Gujarat and AP likely to commence while the farmers were instructed to dry the cotton first as to decrease the moisture content. Average price of Lint at Sirsa during the week was Rs.3846 per maund (of 37.32 Kg each), lower from the previous week price of Rs. 3872 due to the weaker demand from cotton mills. Average price for Shankar-6 (29mm) was Rs.39066 per candy (of 355.6 kg each) during the week stood low, which was Rs. 39250 per candy previous week.

Weekly Price Outlook : In the coming week we expect Kapas price to remain steady to steady to weak with the price band of Rs. 5000-5300 per quintal in the Rajkot market. Lint price at Sirsa is likely to be in range of Rs. 3700-4000 per maund.

Major Market Highlights:

- Total arrivals declined after the cyclone “Maha” hit Gujarat as well as in Maharashtra but the monsoon has almost ended by this week which would help cotton to lose moisture.
- Indian cotton prices (68.78 cents/lbs) are much lower than Cotlook index (74.90 cents/lbs), thus Indian cotton can be exported easily.
- Gujarat 29 mm Cotton sold between 38,400 to 38,600 Rs./Candy.
- All India Daily Arrivals remained steady in between 30,000 to 50,000 bales.
- Indian Rupee remained stronger between 71.97 and 71.48 during this week.

Market Highlights:

- According to the trade sources, Total arrivals stood around 22.07 lakh bales so far till 15th Nov’19. And a total of 6.15 lakh bales have arrived in this week ending on 15th Nov’19 higher against 3.24 lakh bales last week. Of this, 3.14 lakh bales were from Central India, followed by 1.35 lakh bales from South India in this week. The arrivals from North India (in Haryana, Punjab & Rajasthan) have started so the arrivals increased to around 1.63 lakh bales this week.
- CCI has so far begun procurement in Punjab, Rajasthan, Haryana and Gujarat, and now in Maharashtra, Telangana and Karnataka at MSP. Farmers are to get Rs. 5,450-Rs. 5,500 per quintal while market prices are

much lower at Rs. 5,100 per quintal for better quality cotton. The procurement centres in MH would be open in phases since the moisture content is currently high. Corporation had procured around 40,000 bales so far compared to 2000 bales in same period last year and the total arrival in the market until date has been close to 25 lakh bales.

- **CCI is in full swing to procure cotton from North India that were in sluggish mode during the last month due to high moisture content.** The prices in Punjab, Haryana and Rajasthan recovered to certain level around Rs.5300-5400/q during this week. The agency had gradually increased its purchase, as cotton produce arriving in the market these days had moisture content within permissible limits.
- **According to the Indian Cotton Association Limited (ICAL), more than 15 lakh bales of raw cotton have arrived** in the mandis of Punjab, Haryana and Rajasthan in September and October, according to the Indian Cotton Association Limited (ICAL). Rajasthan has recorded arrivals of 7.13 lakh from September 1 to October 31, while the figure is 6.01 lakh bales in Haryana and 1.91 lakh bales in Punjab.
- **High moisture content in fresh cotton harvest arriving in spot market has hit purchases and availability of quality produce as desired by textile mills.** Therefore, arrivals as well as the prices for the low quality declined by this week. CCI in Andhra Pradesh is not procuring as expected leaving the window open for private traders. Farmers are not getting the MSP at very lower prices around Rs.4800 to 5050/q on selling to private traders whereas CCI is procuring cotton at MSP (Rs.5550/q).
- **CAI released its estimates for 2019-20 season at 355 lakh bales of cotton production, up by 13.6% compared to the previous year's production.** Comparatively, Agriwatch estimates the production might range around 351 lakh bales in 2019-20 against 321 lakh bales in 2018-19 season. CAI projects that exports are likely to remain steady at last year's level of 4.2 million bales, the lowest in a decade. If exports to remain steady, the United States and Brazil exports may increase to key Asian buyers such as Vietnam, Bangladesh and Pakistan.

Cotton Balance Sheet (India):

All figures in Lakh Bales (of 170 Kgs. Each) Source: CAI&Agriwatch *: estimated

As per the latest estimates by Agriwatch, cotton output in country during the season 2018-19 would be around 321.05 lakh bales (of 170 kg each) whereas 351.61 lakh bales is expected in 2019-20.

Following lower production, imports will rise marginally to 26 lakh bales and around 20 lakh bales is expected to import in the new season.

Due to lower opening stock but estimation of higher production of cotton would increase the availability the new season at 384.48 lakh bales.

Total domestic consumption (Including mill, small mill and non-mill consumption) in 2019-20 would be around 305.69 lakh bales compared to 311.5 lakh bales during the previous season due to lower demand from textile industries.

Cotton exports are expected to remain higher as that of previous year. It is expected that country would export around 52 lakh bales of cotton in the season 2019-20 due to slightly higher crop compared to 2018-19.

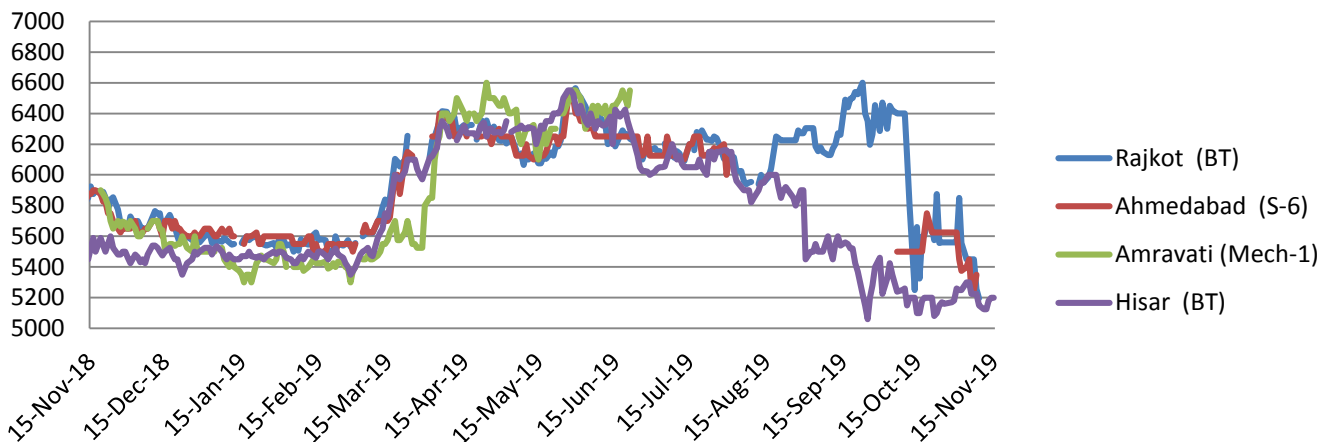

Ending stocks are expected to be around 26.77 lakh bales, it is higher compared to the ending stocks of previous season.

Domestic Cotton Prices Scenario

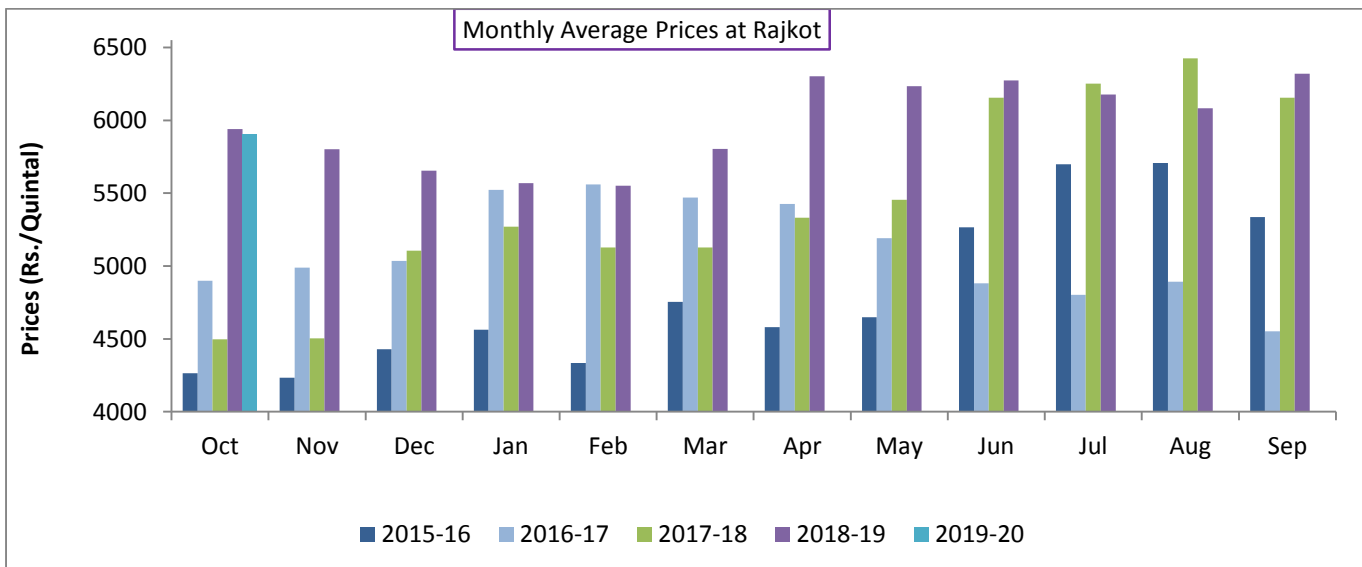

Kapas (Raw Cotton) Weekly Price Scenario

Weekly Price Review: Weekly kapas average price at Rajkot stood slightly higher to Rs 5115/quintal this week as the the state was hit by the cyclone and rains at this point of time has damaged the crop compared to the prices in the previous week Rs. 5618/q. Kapas prices would remain steady to low in Gujarat. The expected range for Kapas at Rajkot would be between Rs. 5000-5300 per quintal for the coming week whereas the prices in Hisar with new arrivals are hovering around Rs.5150/q compared to last week because of inactivity of CCI and lower demand.

Variety wise Kapas Price trend (Rs/Qtl)

Kapas Monthly M-o-M Price Scenario

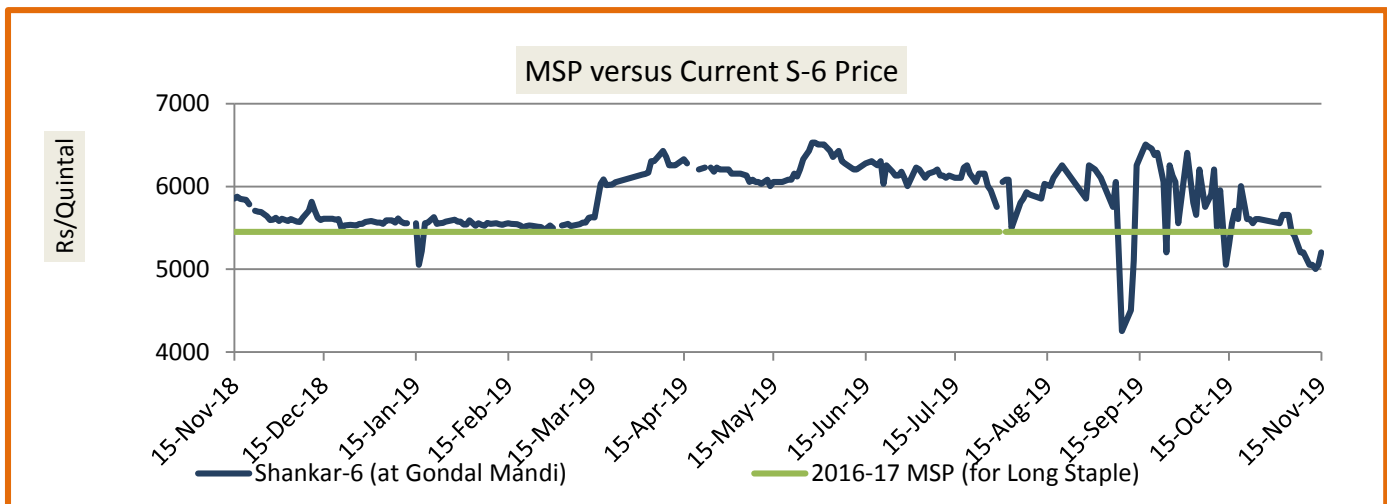

Kapas(seed cotton) prices in country noticed firm during the Oct when compared to the previous month, but the same is ruling lower compared to the prices during the corresponding month of the previous season.

Monthly average price of Kapas at Rajkot remained Rs. 5905 per quintal during June, which was Rs 6319.2 /quintal during previous month and Rs.5940 per quintal during the corresponding month last year. We expect Kapas prices to remain steady to firm further in the coming month due to the new arrivals which is expected to be of good quality

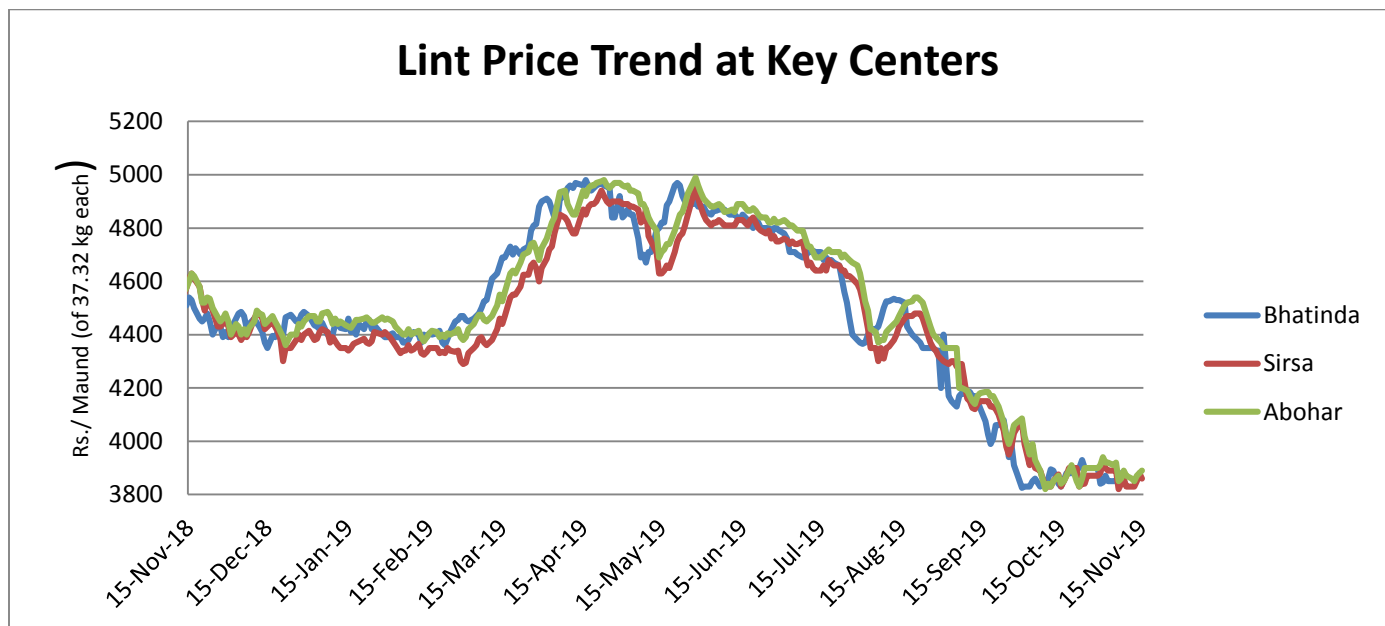

Spot Price versus MSP

The Kapas average price at Gondal market this week ended at a weaker note because of cyclone caused damage to the crop as well as the arrivals were lower. Prices moved down by around Rs.350/q this week compared to Rs.100/q in last week. The average gap between the prices likely to take correction by 1st week of December'19.

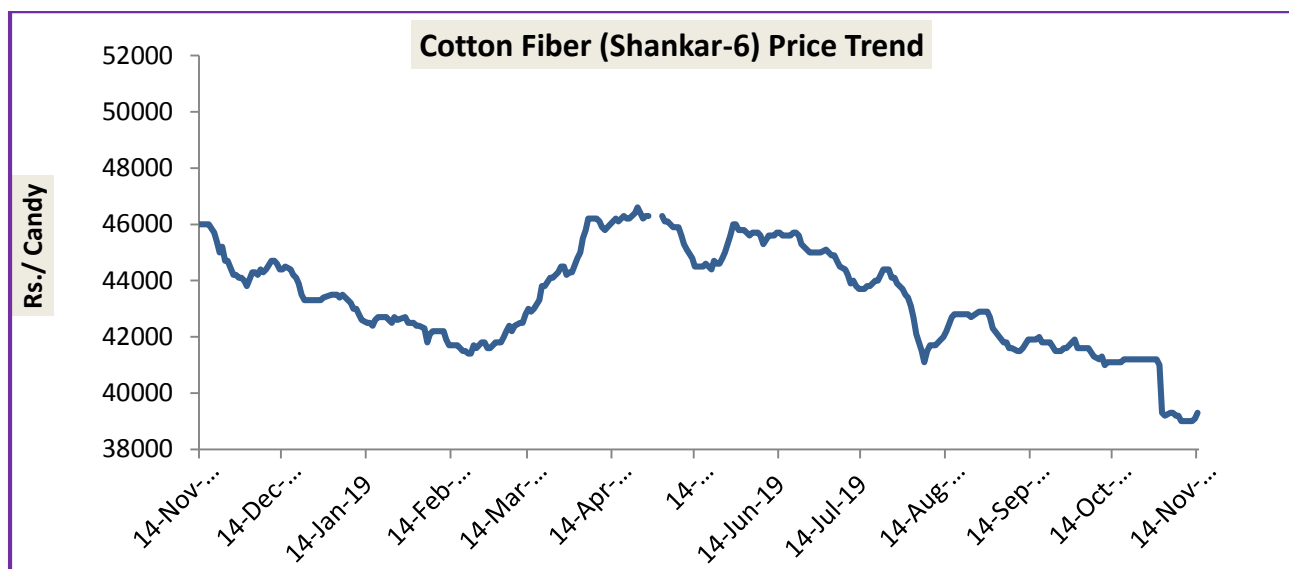

Lint price Outlook

Lint prices remained steady during this week compared to previous week because of lower demand from textile industry. Weekly average price of Lint at Sirsa lower to Rs. 3861 per maund of 37.32 kg each, as compared to the previous week price of Rs. 3871 per maund. The arrivals have increased in all the states in North India out of which arrivals in Bhatinda the major belt of Punjab arrived 41650 quintals this week followed by Abohar with 9860 quintals last week and around 46000 quintals in Bhiwani, Haryana.

Cotton Fiber price Outlook

Cotton fiber (Shankar-6) of premium quality noticed weaker compared to previous week due to the slow supply disturbed by the rains as well as due to the lower demand. Whereas the Indian cotton prices become competitive to the international prices. Average price was Rs. 39066 per candy (of 355.6 kg each) during the week, which was Rs. 39250 per candy previous week. We expect cotton fiber to remain weaker in range of Rs 38000-41000 per candy in the coming week candy due to lower demand of lower quality cotton which is not upto the standards for exports.

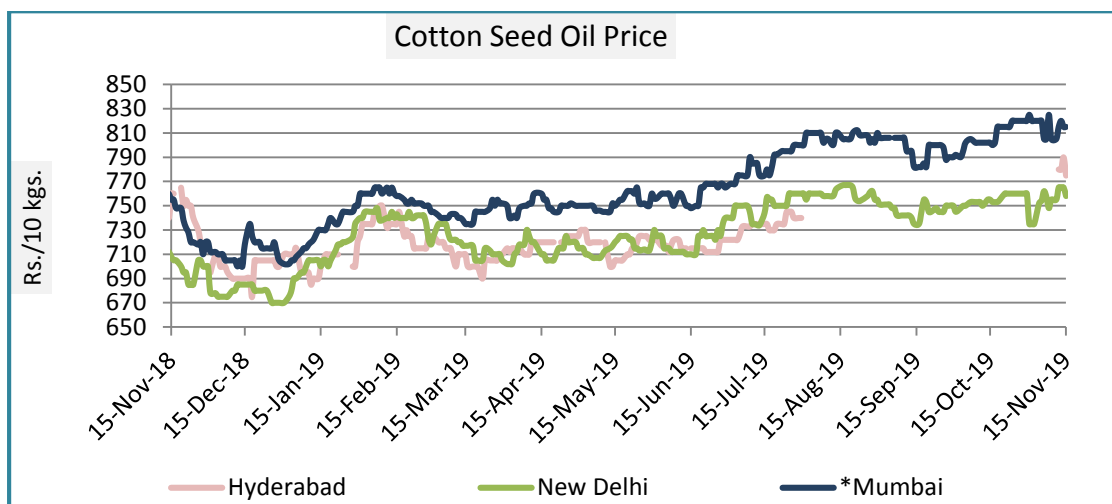

Cotton Seed Oil and Cotton Seed Oil Cake

Cotton Seed Oil weekly Price Scenario

Cotton seed oil price marginally showed positive trend across all centres during the week. Weekly average price in New Delhi slightly decreased to Rs. 760.5 from Rs. 751.3 per 10 Kg last week.

	Weekly Average Price as on (Rs/10 kg.)		% Change
	14-Nov-19	07-Nov-19	
New Delhi	760.5	751.3	1.22
Rajkot	801.6	790	1.47
Hyderabad	785	780	0.64
Mumbai*	815.8	811	0.59

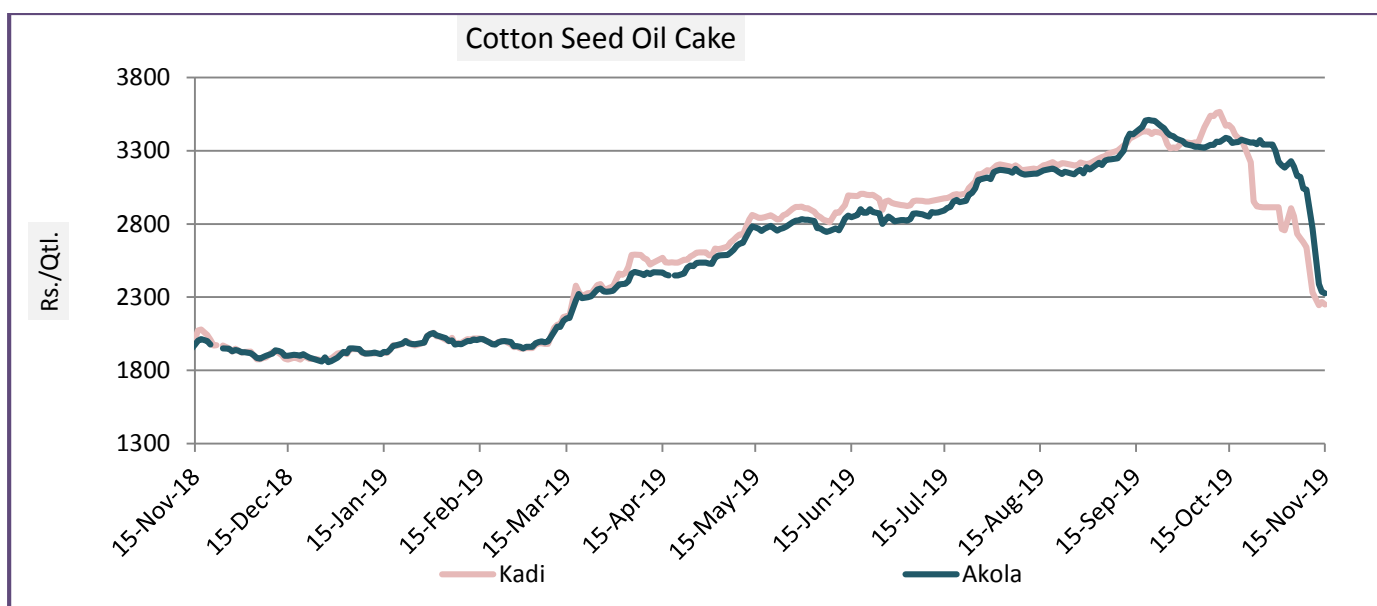

Cotton Seed Oil Cake weekly Price Scenario

Cotton seed oil cake price declined significantly from previous week as the kapas prices were weaker in the same week due to high moisture. Weekly average price in Akola was Rs. 2714 per quintal, higher compared to the weekly average price of Rs. 3176 per quintal in the previous week.

Centers	Weekly Average Price as on (Rs/quintal.)*		% Change

Akola	2714	3176	-14.55

*Source: NCDEX

International Market Scenario

International US cotton spot prices stood steady at 66.68 cents/lbs during the week. Also Cotlook A index weekly average stood slightly higher at 75.33 cents/pound this week, which was 74.98 at cents/pound during last week.

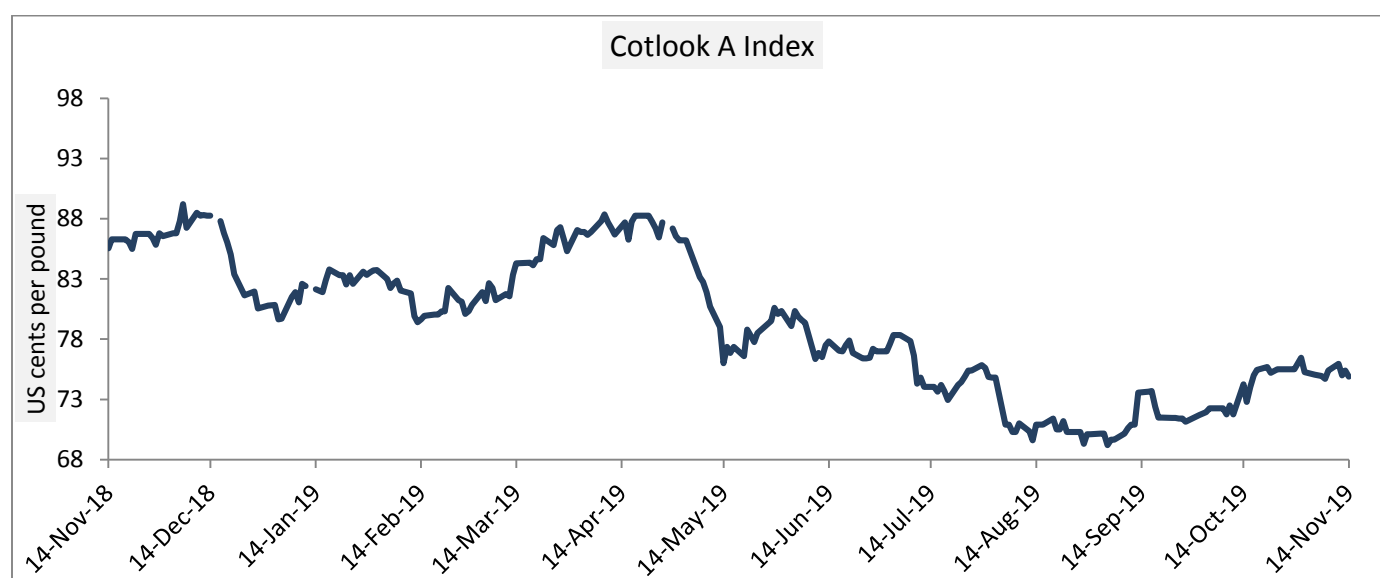

Major Market Highlights:

- **Nearby cotton futures finish higher on Friday with gains of 54 to 61 points, DEC 19 Cotton closed at 64.88, up 61 points.** The 11/14 Cotlook A Index fell by 90 points to 74.90 cents/lb. Good through 11/21, yesterday's updated AWP for cotton is 57.06 cents/lb, which was back up 46 points.
- **The US Export Sales report from USDA showed 345,100 RB of 2019-20 upland cotton sold in the week ending 7th Nov'19 were up by 52% compared to previous week.** With major buyers including Pakistan (60,500 RB), China (83,300 RB), Turkey (46,000 RB), followed by Vietnam (29,400 RB). For 2019-20, net upland shipments exports of 3,200 RB were down 42% from previous week and were primarily to India (1000RB), Thailand (1000 RB), Indonesia (16,700 RB) and Japan (400 RB).
- **Exports of raw cotton from Pakistan during first quarter of current financial year increased by 53.65%** as compared the exports of the corresponding period of last year. According the data of Pakistan Bureau of Statistics, during the period from July'19-September'19, about 6,980 metric tons of raw cotton worth 10.828 million dollar exported as compared the exports of 4,619 metric tons valuing 7.043 million dollar of same period of last year. However, the exports of cotton yarn and cotton cloth decreased by 6.19% and 5.60% respectively and was recorded at 294.280 million dollar.
- **The 2019 U.S. crop is now estimated further down to 20.8 million US bales.** USDA lowered U.S. production 60,000 bales from previous month' estimates and lowered ending stocks from 7 million bales down to 6.1 million bales. USDA reported the overall 62% of the crop have been harvested higher against 53% in the previous year. The excellent quality of the crop is stimulating export demand as the crop moves to warehouses whereas the reduction in production estimates is triggering more imports by US.
- **Pakistan is expecting shortfall in cotton production and around 3.5-4.5m bales would have to be imported.** Cotton production for current season (2019-20) would not be more than 9 million bales as estimated by the country earlier. The production from the Punjab having sharply declined due to the excessive rains and due to the use of inferior quality pesticides made the situation uncontrollable.

Cotlook A Index

Cotlook A index noticed weak during the week. The Cotlook A Index was slightly up 75.33 cents/lb than previous week (74.98 cents/lb).

USA Spot Prices

USDA exports increased by 52 percent with sales of 345,500 RB of 2019-20 upland cotton. China's participation has deliberately and dramatically slowed her importation of U.S. cotton because of the tariff war. USDA beginning to lower the 2019 crop, the prospects for higher prices are improving. The 2019 U.S. crop is now estimated even lower at 20.8 million bales. Cotton harvest continued in the Plains, the Blacklands, East Texas, the Edwards Plateau and the Trans-Pecos. Some cotton fields in the Plains were plowed under due to poor conditions. The USDA in its earlier October forecast had estimated US 2019-20 cotton production at 21.7 million bales.

Pakistan Spot Prices

According to the market sources, Growers have urged the government to halt duty free import of cotton as they have started picking fresh cotton crop. The growers also demanded the government withdraw sales tax and custom duty on cotton import because it would kill the ginning industry as well as growers.

Untimely rains in some parts of country damaged the cotton crop, keeping ginners under pressure owing to huge losses. Total arrivals of Pakistan reached 77.06 lakh of cotton bales till November 3, 2019 lower compared to previous years' production of 81.34 lakh bales (-20.88%) on the corresponding period last year. Of total, 42.71 lakh bales arrived

from the Punjab and 34.34 lakh bales from Sindh, according to the report released by the Pakistan Cotton Ginners Association (PCGA).
