

**COTTON WEEKLY RESEARCH REPORT**  
**3<sup>rd</sup> Feb 2020****Domestic market summary**

**Domestic market Scenario:** The domestic cotton market was weaker compared to the previous week as well as the arrivals in this week also declined slightly. The export demand has been disrupted as China's market was closed on their New Year and the threat caused due to deadly virus spread across China and other countries has declined exports from India in last few days. Average price of Lint at Sirsa during the week was Rs.4063 per maund (of 37.32 Kg each), higher from the previous week price of Rs. 4088 due to the good quality of cotton. Average price for Shankar-6 (29mm) was Rs.39417 per candy (of 355.6 kg each) during the week stood low, which was Rs. 39667 per candy previous week.

**Weekly Price Outlook :** In the coming week we expect Kapas price to remain steady with the price band of Rs. 5400-5600 per quintal in the Rajkot market. Lint price at Sirsa is likely to be in range of Rs. 4000-4200 per maund.

**Major Market Highlights:**

- Cotton prices have again declined in the domestic market. As the export market has declined due to the corona virus that has put the bearish impact on the global market. CCI procured around 48 lakh bales till 26<sup>th</sup> Jan'20 this season so far.
- Indian cotton prices decreased slightly (71.58 cents/lbs) compared to previous week and still lower than Cotlook index (78.15 cents/lbs), thus Indian cotton still has the attractive price for exporting.
- Gujarat 29 mm Cotton sold between 39,400 to 39,900 Rs./Candy.
- All India Daily Arrivals remained steady in between 2,10,000 to 2,40,000 bales.
- Indian Rupee remained stronger between 71.25 and 71.48 during this week.

**Market Highlights:**

- **According to the trade sources, total arrivals stood around 156.93 lakh bales so far till 31<sup>st</sup> Jan'20 from the start of the season.** And a total of 12.92 lakh bales have arrived in this week ending on 31st Jan'20 around 7% lower compared 13.83 lakh bales. Of this, 7.36 lakh bales were from Central India, followed by 4.4 lakh bales from South India in this week. The arrivals from North India (in Haryana, Punjab & Rajasthan) have started so the arrivals stood around 1.09 lakh bales this week.
- **CCI procured around 31% of the total cotton arrived in the market till 28<sup>th</sup> Jan'20. CCI bought the major quantity of cotton (57% of total procurement) from Telangana about 27 lakh bales** out of total procurement of around 48 lakh bales. CCI procured 4.63 lakh bales from north zone (Punjab, Haryana and Rajasthan). CCI in Punjab procured 28% of the total arrived cotton as the central body introduced direct payment method in

the state this season and disbursed Rs.430 crore to over 20,000 farmers in six districts of south Malwa belt. Payments were strictly made directly to bank accounts. After Telangana, CCI procured around 8 lakh bales from Maharashtra followed by Gujarat (2.57 lakh bales) till 28<sup>th</sup> Jan'20.

- **Indian cotton prices went weaker 3-4% since the corona virus in China has spread its effect in different countries.** As India already booked for cotton export shipments in February of around 2-3 lakh bales which is likely to be affected due to the situation prevailing in China. Cotton exports in November were down in November while it gained supports in December with increasing demand, depreciation in rupee and higher international prices. But the exports in February likely to decline and it is unlikely to recover as soon as China recovers its present situation from virus.

*All figures in Lakh Bales (of 170 Kgs. Each) Source: CAI&Agriwatch \*: estimated*

As per the latest estimates by Agriwatch, cotton output in country during the season 2018-19 would be around 321.05 lakh bales (of 170 kg each) whereas 351.61 lakh bales is expected in 2019-20.

Following lower production, imports will rose marginally to 32 lakh bales and around 24 lakh bales is expected to import in the new season.

Due to lower opening stock but estimation of higher production of cotton would increase the availability the new season at 400.2 lakh bales.

Total domestic consumption (Including mill, small mill and non-mill consumption) in 2019-20 is likely to be around 305.96 lakh bales compared to 311.5 lakh bales during the previous season due to lower demand from textile industries.

Cotton exports are expected to remain slightly higher as that of previous year. It is expected that country would export around 45.7 lakh bales of cotton in the season 2019-20 due to slightly higher crop compared to 2018-19. Ending stocks are expected to be around 48.54 lakh bales, it is higher compared to the ending stocks of previous season.

## Domestic Cotton Prices Scenario

### Kapas (Raw Cotton) Weekly Price Scenario

**Weekly Price Review:** Weekly kapas average price at Rajkot stood down by Rs.100 at Rs 5408/quintal this week compared to the previous week which stood at Rs. 5533/q. Kapas prices would remain steady to low in Gujarat in the coming week as far as the demand remains weak. The expected range for Kapas at Rajkot would be between Rs. 5400-5600 per quintal for the coming week. Whereas the arrivals of Desi cotton in Bhiwani finished since last week while BT continues to arrive in the market.

### Variety wise Kapas Price trend (Rs/Qtl)

### Kapas Monthly M-o-M Price Scenario

Kapas(seed cotton) prices in country noticed firm during the Jan when compared to the previous month, but the same is ruling slightly lower compared to the prices during the corresponding month of the previous season due to the lower demand with higher production this season.

Monthly average price of Kapas at Rajkot remained Rs.5514 per quintal during Jan, which was Rs 5281/quintal during previous month and Rs.5568 per quintal during the corresponding month last year. We expect Kapas prices to remain steady to weak further in the coming month due to declining arrivals with decrease in demand.

### Spot Price versus MSP

The Kapas average price at Gondal market this week ended slight higher at Rs. 5521/q compared to the weekly average of Rs. 5529/q last week. Average price in the week is slightly down by around Rs.28/q from MSP (Rs.5550/q). The average gap between the spot price and MSP has slightly improved, therefore, the price is likely to remain steady in the coming days above MSP.

### Lint price Outlook

Lint prices stood weak during this week compared to previous week because of good quality kapas as per the demand. Weekly average price of Lint at Sirsa stood down by Rs.26/q lower at Rs. 4063 per maund of 37.32 kg each, as compared to the previous week price of Rs. 4088 per maund. The arrivals compared to the previous week in Bhatinda the major belt of Punjab has declined 28900 quintals this week followed by Abohar with 3740 quintals and around 9500 quintals in Bhiwani, Haryana.

### Lint Price Trend at Key Centers

### Cotton Fiber price Outlook

Cotton fiber (Shankar-6) of premium quality noticed weaker compared to previous week because of the decline in the global prices on the back of lack of trade caused after the outbreak of corona virus in China. Average price was Rs. 39416.6 per candy (of 355.6 kg each) during the week, which was Rs. 39667 per candy previous week. We expect cotton fiber to remain firm in range of Rs 38000-42000 per candy in the coming week candy due to the demand for good quality cotton.

The prices moved lower in US after the spread of Corona virus from China that disturbed the global trade between the two countries right after both signed a trade deal. It may be that the market sees a big shipment number of Chinese cotton previously bought. The arrivals were down by 20.26 per cent which were over 10.45 million bales during the corresponding period of last season.
