

**COTTON WEEKLY RESEARCH REPORT**  
**22<sup>nd</sup> Jun 2020****Domestic market summary**

**Domestic market Scenario:** Indian cotton market showed mixed trend during the week. The floor prices has been reduced along with reducing bulk discounts accordingly by CCI so the prices are now practical and match with the market price. The trade might increase because of unlocking of lockdown and reduced floor CCI prices. The India cotton exchange recent month's prices stood around Rs 33,504 per candy. Gujarat Shankar-6 variety cotton spot prices in Cotton Association of India stood around Rs.35400/ candy during the week.

**Weekly Price Outlook :** The average price of Kapas is likely to remain between Rs. 4750-5000/q in Rajkot while the prices in Andhra Pradesh likely to hover around Rs.4200-4550/q.

**Major Market Highlights:**

- Reduction in CCI effective sale price has brought CCI sale quotation close to market price. This new change in prices by CCI is market friendly.
- Cotlook index remained firm (67.51 cents/lbs) higher compared to the ICE cotton future stood slightly higher (60.50 cents/lbs).
- All India arrivals have reached between 65,000 to 75,000 bales per day.
- Indian Rupee remained weaker between 76.02 and 76.21 during this week.

**Market Highlights:**

- About 18 lakh ha area has been sown under cotton till 11th June'20 for 2020-21 marketing year, up by around 24% during the same period of time last year. In Punjab, around 22% increase in area is seen to 4.9 lakh ha followed by Haryana, up by 6% to 7.13 lakh ha compared to the previous year during the same time. In Rajasthan, the maximum increase was witnessed from 3.45 lakh ha to 5.19 lakh ha in 2020-21 compared to the previous year. In Gujarat, the sowing has started recently during the last week and around 0.78 lakh ha is sown. The sowing also started in AP and Karnataka covering the area around 0.07 lakh ha and 0.42 lakh ha, respectively.
- Maharashtra cotton marketing federation claims that only 10 lakh quintals of FAQ kapas is left with the farmers in Maharashtra. And the procurement by the federation is likely to finish by the end of June month. The federation has purchased around 76 lakh quintal of cotton while CCI has procured around 110 lakh quintal till date. As the monsoon has arrived in Maharashtra, the cotton quality has is prone to deterioration due to moisture which causes discoloration of the threads and makes ginning difficult. Therefore, the federation has

decided to purchase cotton only in centres where ginning units are operational and have proper storage capacity.

- Texprocil urged the government to include cotton yarn under the 3 per cent Interest Equalization Scheme as exporters are passing through difficult times. Also, to cover cotton yarn and cotton fabrics under the present RoSCTL (Rebate of State and Central Taxes and Levies) Scheme and the much-awaited Refund of Duties and Taxes on Export Products (RoDTEP) Scheme. As these schemes reimburse all the duties and taxes incurred during the production process and support the export of goods and not taxes.
- Cotton yarn exports showed a steep decline of 28.45 per cent during April-February 2019-20. Sharp declines in cotton yarn exports were reported in major markets like China (-51 per cent), Bangladesh (-23 per cent), Vietnam (-18.5 per cent) and South Korea (-28.46 per cent). Export of cotton textiles during March to May 2020 would be very low and insignificant on account of the outbreak of COVID-19. A steep decline of 64.55 per cent in exports of cotton textiles, including cotton yarn, during the two-month period of April-May 2020 is expected. The yarn export orders were cancelled especially by US and EU due to the halt in payments. Also, India's export of cotton textiles and apparel decline by a mere 16.5 per cent during April'19 to February'20.
- The cotton textile mills have slowly restarted the operation reaching to around 60-70 per cent of their operating capacity. The demand across India is still not strong but is expected to increase in July. CCI is giving bulk discounts to the buyers to support the textile mills hardships. But CCI also as lowered the bulk discounts along with reducing the floor prices from Rs.45000- Rs.46900/candy in the first week of June'20 to Rs. 36100- Rs. 36600/candy on 16<sup>th</sup> June'20 depending on the minimum quantity purchased per day making it practical for purchasing near the actual markets rate.

### Cotton Balance Sheet (India):

Cotton Balance Sheet								
In Lakh Bales(170 KGS)	2016-17	2017-18	2018-19	2019-20*	Oct-Dec	Jan-Mar	Apr-June	July-Sept

*All figures in Lakh Bales (of 170 Kgs. Each) Source: CAI&Agriwatch \*: estimated*

As per the latest estimates by Agriwatch, cotton output in country during the season 2019-20 would be around 351.8 lakh bales (of 170 kg each) whereas 321 lakh bales was produced in 2018-19.

Due to the good export parity in the current year, exports are likely to surge by around 8% to 45 lakh bales. The pandemic made the exports viable and cheaper in the international market.

Whereas, the imports are likely to decline to around 16.5 lakh bales from the previous estimates of 23 lakh bales in 2019-20.

Due to lower opening stock but estimation of higher production of cotton would increase the availability the new season at 392.8 lakh bales.

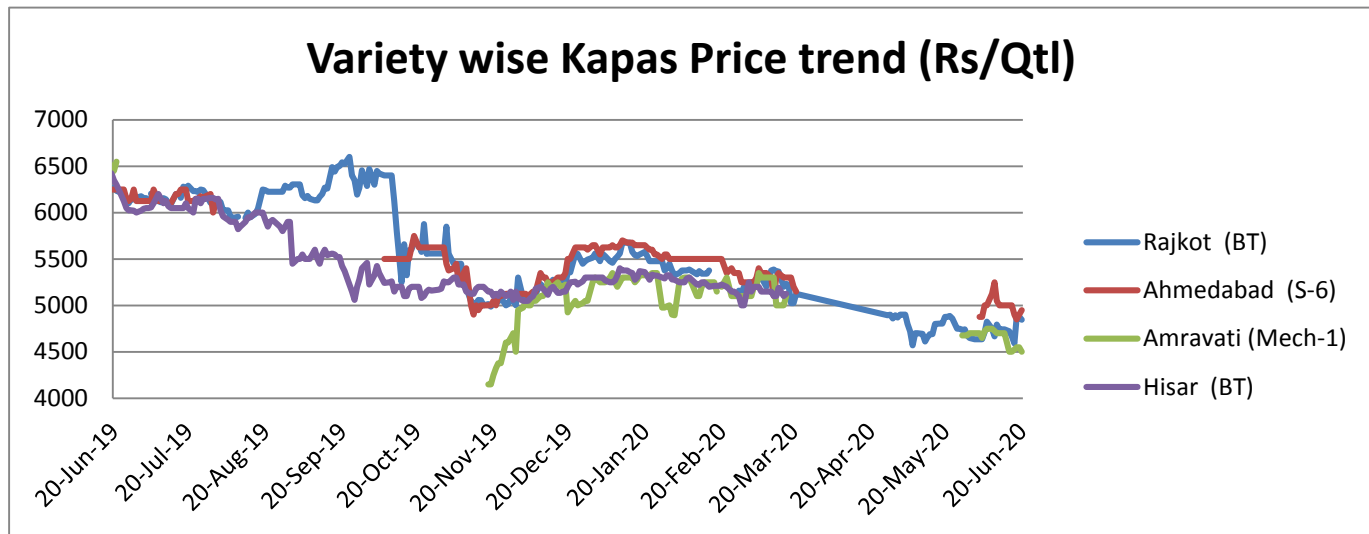

Total domestic mill consumption (excluding non- mill consumption) in 2019-20 is likely to decline by around 15% amid covid-19 pandemic to 240.6 lakh bales compared to 286 lakh bales during the previous season.

So, decline in consumption would result in higher ending stocks to around 88 lakh bales, it is higher much higher compared to the ending stocks of previous season.

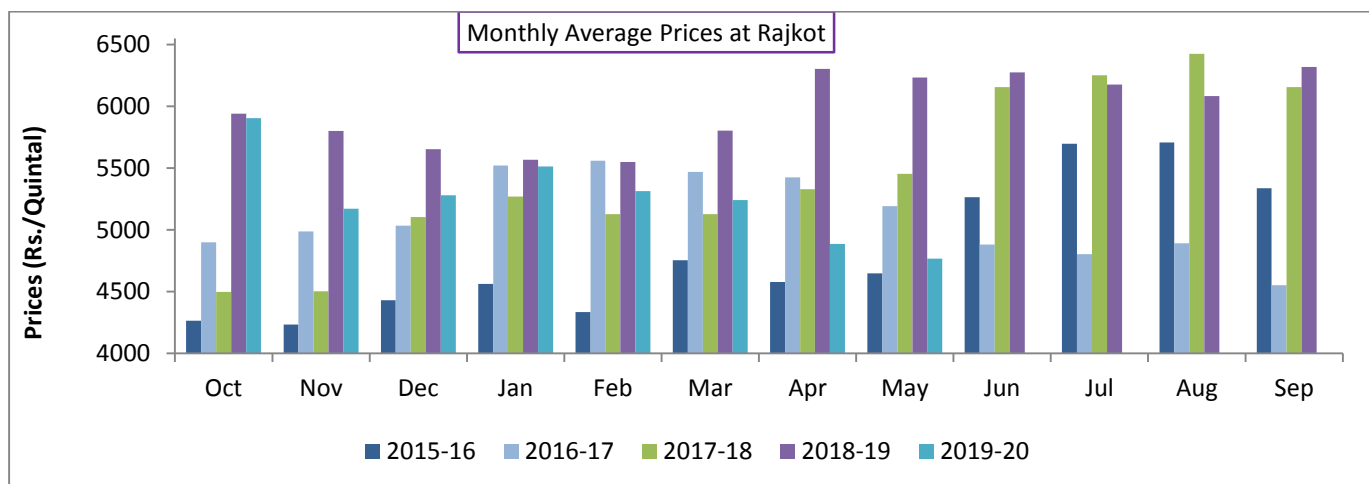

## Domestic Cotton Prices Scenario

### Kapas (Raw Cotton) Weekly Price Scenario

**Weekly Price Review:** Weekly kapas average price at Rajkot decreased to Rs. 4720/q because of the onset of monsoon. The trading activity slightly declined due to the rains. The prices stood at Rs. 4747/quintal in the previous week.

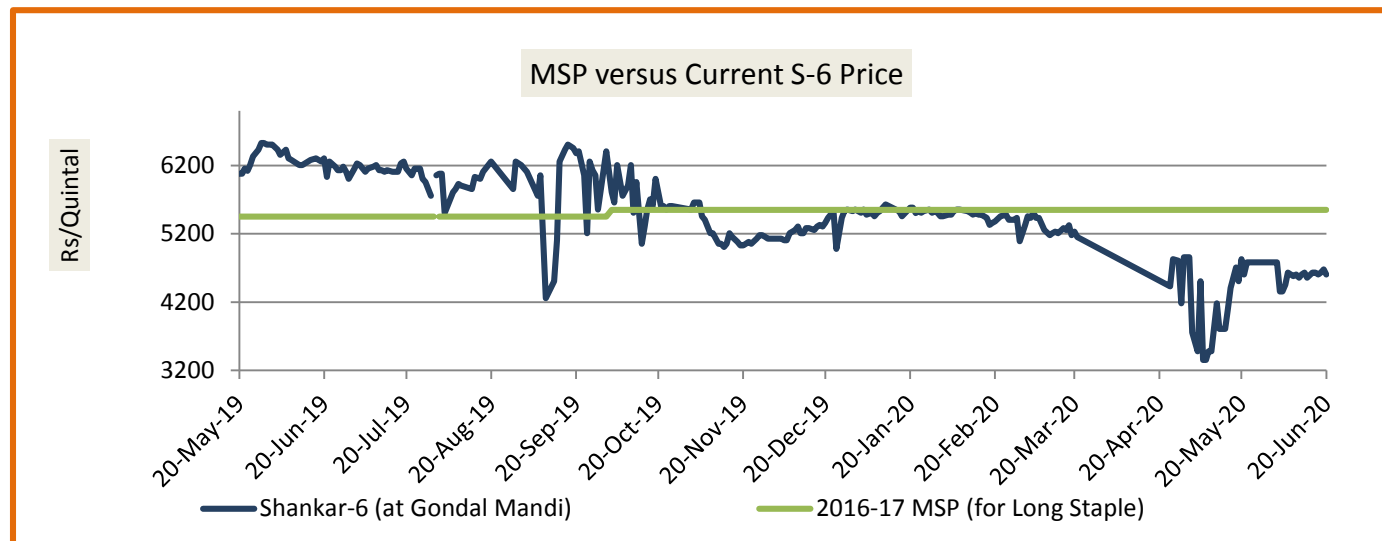

### Kapas Monthly M-o-M Price Scenario

Few markets of Kapas (seed cotton) in country were openend in May month, the monthly average price was ruling lower in May at Rs. 4768/q much lower compared to the prices during the corresponding month of the previous season due to the lower demand this year. Monthly average price of Kapas at Rajkot remained Rs. 4887 per quintal during April, which was Rs 6302/quintal during the corresponding month last year in April'19. We expect Kapas prices to remain steady to low further in the coming month (June) due to the lower demand across the country as well as in international market.

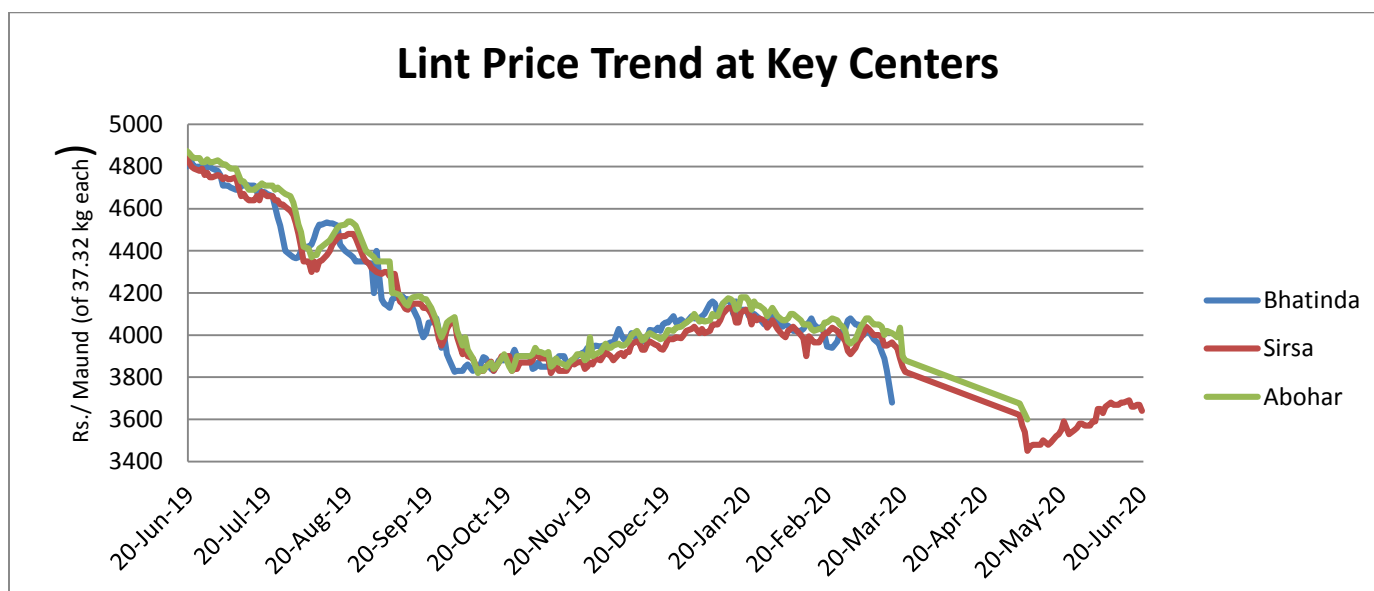

## Spot Price versus MSP

The arrivals increased during the week ending on 18<sup>th</sup> June'20 in Gondal. Kapas average price at Gondal market was closed at Rs.4613/q higher than MSP and from the prices that were in the prior week that stood at Rs. 4571/q. Average price in the week stood further down by around Rs.936/q from MSP (Rs.5550/q). The average gap between the spot price and MSP has increased after the lockdown amid coronavirus.

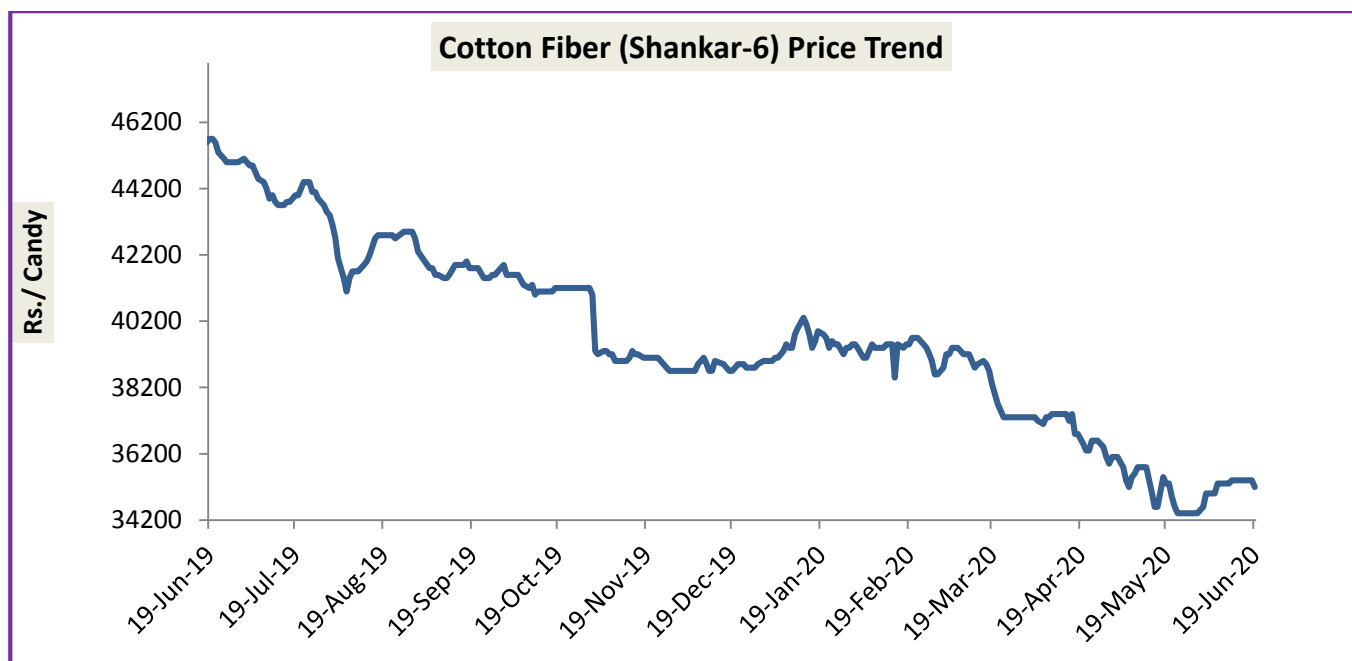

## Lint price Outlook

The Sirsa market was active last week and the average price stood around Rs.3673/maund of lint. While, there were no arrivals in the Haryana and Punjab as the season has ended and sowing started in May. Punjab covered an area of around 4.9 lakh ha so far till last week. The average price in the week slight increased from the prior week that stood around Rs.3663/maund of 37.32 kg each.

### Cotton Fiber price Outlook

The average cotton fiber (Shankar-6) of premium quality prices increased to Rs. 35400/candy from around Rs. 35266/candy compared to the previous week due to the support gained from smoother exports of cotton. Also, the demand from international market seems positive as Indian cotton is now cheaper in the world market. Average price were around Rs. 45,633per candy last year during the same time. We expect cotton fiber to remain firm in range of Rs. 35000-36500 per candy in the coming week candy.

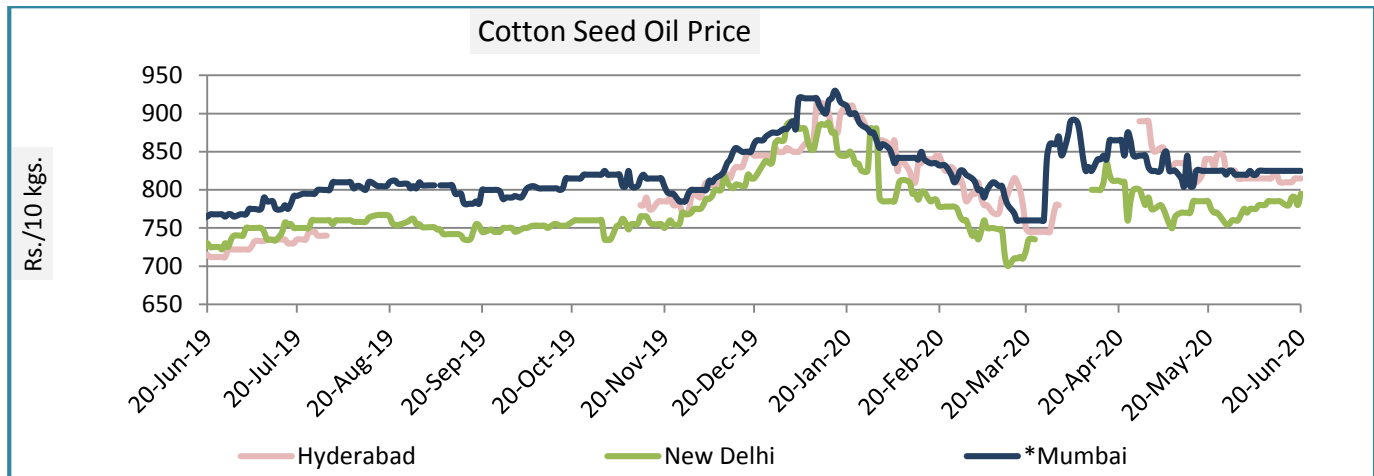

### Cotton Seed Oil and Cotton Seed Oil Cake

#### Cotton Seed Oil weekly Price Scenario

Cotton seed oil price showed mixed trend across all the centres during the week ending on 18<sup>th</sup> June'20. Weekly average price in Hyderabad stood weaker at Rs. 815 and in Mumbai the prices ranged around Rs. 826 and Rs.784 per 10 Kg in New Delhi.

	Weekly Average Price as on (Rs/10 kg.)		% Change
	18-Jun-20	11-Jun-20	
<b>New Delhi</b>	784	783	0.11
<b>Rajkot</b>	810	812	-0.21
<b>Hyderabad</b>	815	813	0.31
<b>Mumbai</b>	826	825	0.10

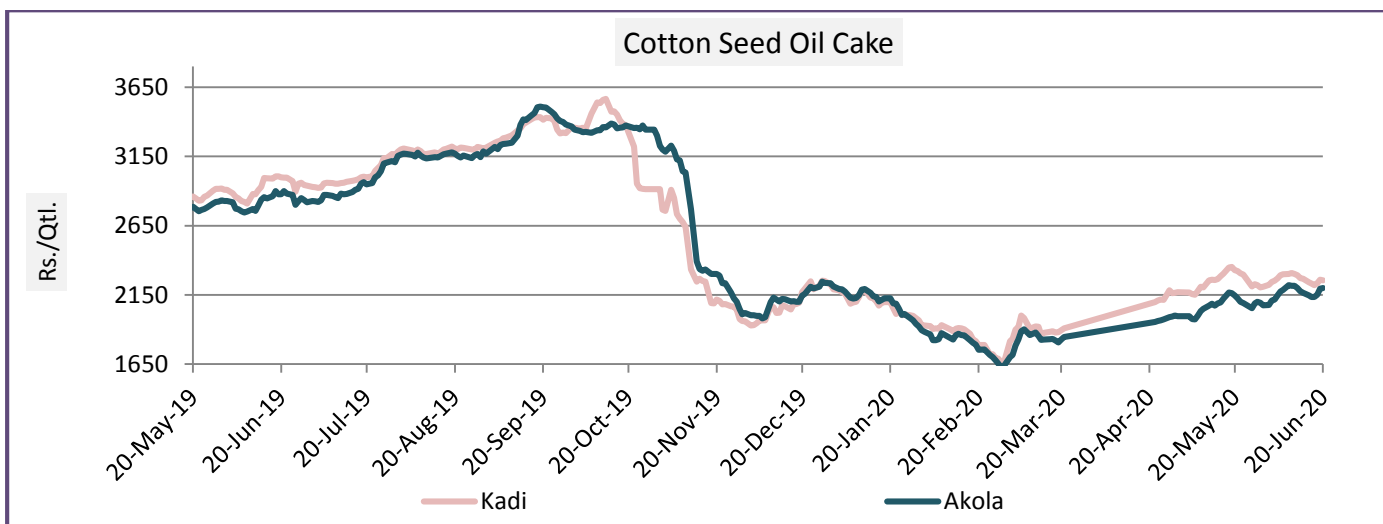

### Cotton Seed Oil Cake weekly Price Scenario

Cotton seed oilcake spot prices were down during the week. The average prices stood down by around 2% in Kadi and Akola. The prices slipped down due to the muted demand in the market due to the onset of monsoon in India. But the prices might improve in few days as low crush for cotton seed resulted in lower availability of cotton seed oilcake thereby providing lateral support for prices. NCDEX Cotton seed oil cake futures ended on a firm note on Friday at Rs.2190/q against Rs.2154 in the prior week. NCDEX Cocudakl is now getting support at 2150 and below same could see a test of 2119 levels, and first resistance is now likely to be seen at 2200.

Centers	Weekly Average Price as on (Rs/quintal.)*		% Change
	18-Jun-20	11-Jun-20	
Kadi	2244	2298	-2.38
Akola	2151	2202	-2.29

\*Source: NCDEX

## International Market Scenario

Average International ICE cotton prices stood slightly firm at 60.29 cents/lbs during the week. Also Cotlook A index weekly average stood slightly firm at 67.42 cents/pound this week, which was at 68.15 cents/pound during last week.

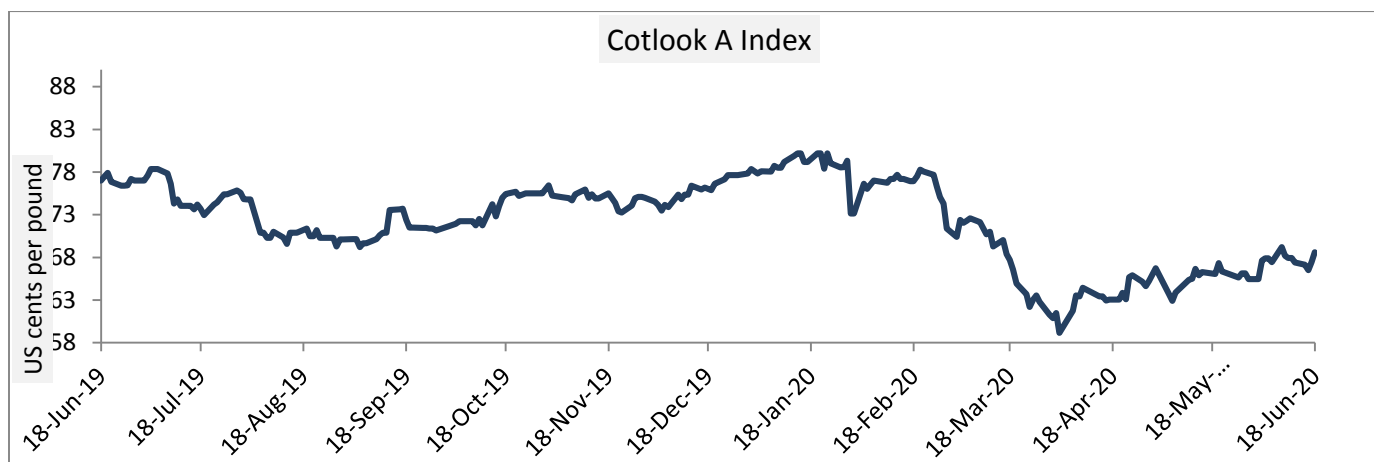

### **Major Market Highlights:**

- **The cotton textile industry in Pakistan is neglected in the new budget released by the Pakistan government as no new incentive for value-added textile industry was announced in the new federal budget.** Cotton yarn the major raw material of apparel sector should be exempted from all duties and taxes to encourage value addition. The condition of the textile industry would worsen aimed at liquidity crunch and shrinking global business adding it would lead to closure of industrial units. The imposition of 17 percent sales tax in the previous budget had brought a disastrous impact on the textile industry already.
- **The weekly export sales reported by USDA, which showed net sales of 97,600 running bales (RB) for 2019-2020 were down 76% from the previous week and 31% from the prior 4-week average.** However, exports of 348,300 RB were up 18% from the previous week and 32% from the prior 4-week average. Exports were primarily to China, at 123,500 RB, Vietnam at 89,900 RB, Turkey at 49,900 RB, Pakistan at 24,000 RB, and Bangladesh at 13,300 RB. U.S. Export Sales was better than expected. China and Vietnam were main buyers. Shipments were well above the average needed to hit the USDA's export target.
- **China has given exemption for 97 per cent of Bangladeshi products effective from 1<sup>st</sup> of July.** China's tariff exemption is expected to help Bangladesh the economic impact of the Covid-19 pandemic. This will boost exports of cotton with the improving relations between the two countries. Due to the deteriorating ties between India and China amid recent clashes, most of the Indian cotton exports contracts might be affected in the future.

### Cotlook A Index

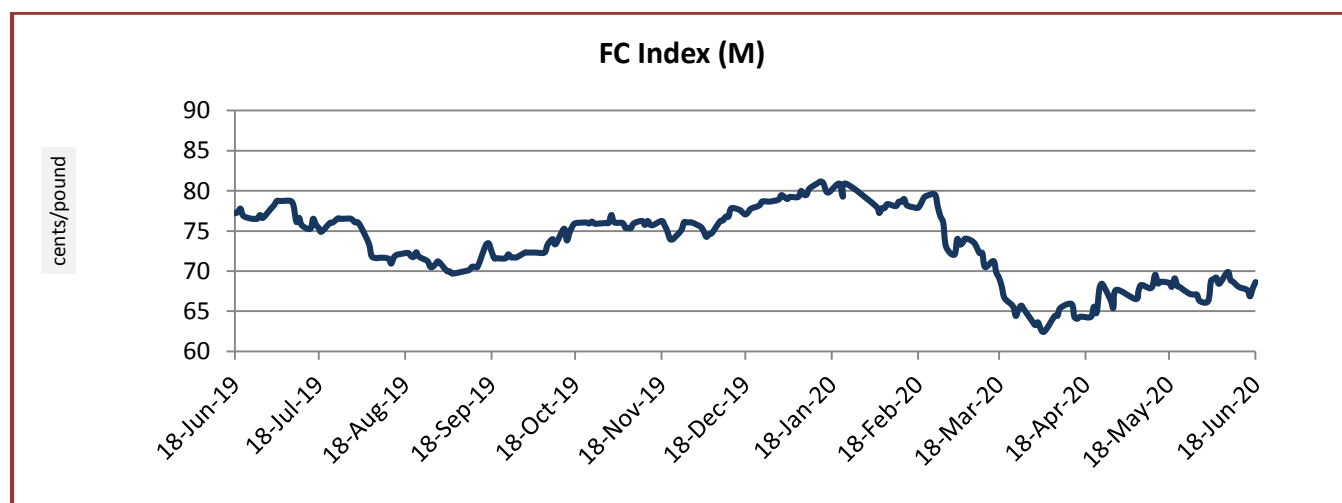

Cotlook A index noticed slightly weaker in last week. The Cotlook A Index was at 67.42 cents/lb lower than the previous week (68.15 cents/lb) and a slight hike compared to the previous week.

Cotlook A Index	WeeklyAverage Price change as on		% Change

### USA Spot Prices

The price gains in the last week were due to the good export sales numbers, and hopes of continued Chinese demand for U.S. agricultural products. Also, dry weather in Texas, the largest cotton-producing state. A USDA report indicated that until May 28th 2020, China's purchase of U.S agricultural products rose sharply. China's imports of U.S. cotton rose by 30% at 1.48 MT year on year.

	18-Jun-20	11-Jun-20	
Prices	60.73	60.03	1.16
Prices in US cents per Pound			

### Pakistan Spot Prices

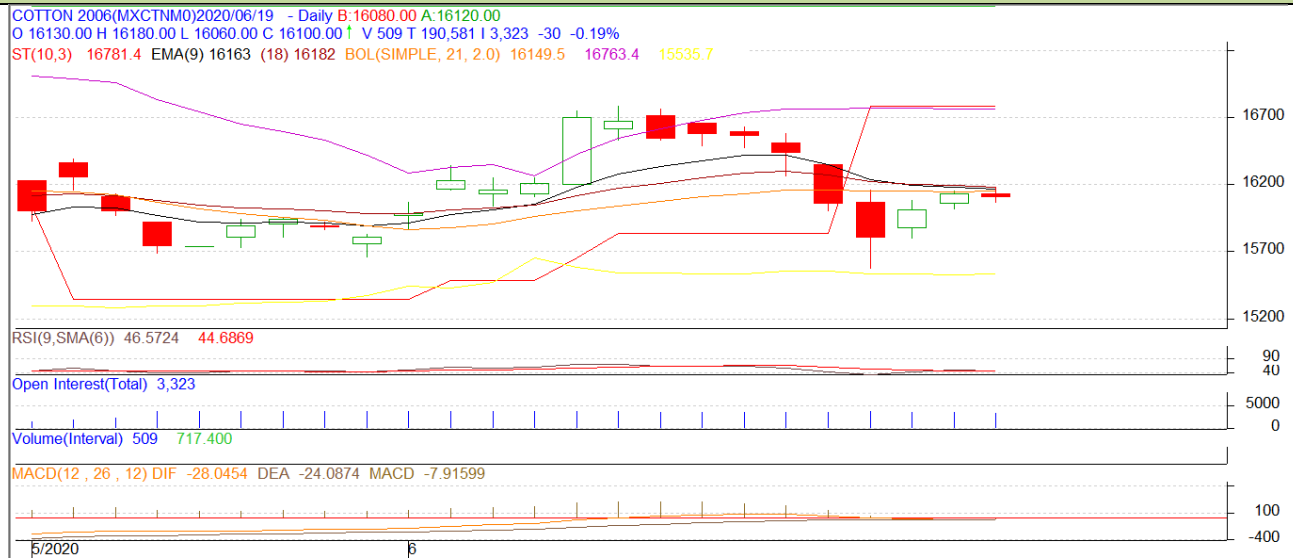

The prices stood weaker compared to the previous week by more than 2%. The attack of locusts is increasing in the country. But the ginning factories have started operating. Many textile mills were interested in buying of new cotton. Till now, ginners had signed agreements for the sale of five thousand bales. The delivery time of some deals is after June 25. If the situation remains same, it is expected that rate of cotton and Phutti will further increase. The area of cultivation is 2.5 percent less at 2.41 million ha as compared to the last year's area of cultivation of 2.48 million ha as on 13<sup>th</sup> Jun'20. The germination level is also very low and locusts have also caused severe damage to crops. However, water is available in abundant quantity.
