

**COTTON WEEKLY RESEARCH REPORT**  
**27<sup>th</sup> Jul 2020****Domestic market summary**

**Domestic market Scenario:** The cotton market showed mixed trend. CCI reported record highest one day sales of over 5 lakh bales on 20<sup>th</sup> July, 2020. Domestic arrivals declined to 25,000 bales a day from 45,000 bales per day during the first week of July. The arrivals declined due to the onset of monsoon and the harvesting across India is almost completed. Domestic mills are buying regularly from current arrivals and also from stock with ginners. But the Indian exporters were not able to sell big quantity despite attractive basis. The India cotton exchange front month's prices stood high, around Rs 33,643 per candy. Gujarat Shankar-6 variety cotton spot prices in Cotton Association of India stood around Rs.34,560/ candy during the week.

**Weekly Price Outlook :** The average price of Kapas is likely to remain between Rs. 4700-4900/q in Rajkot while the prices in Andhra Pradesh likely to hover around Rs.4150-4550/q.

**Major Market Highlights:**

- Higher CCI sales were reported in the last week, owing to the bulk discounts of around Rs.1500/candy on the purchase of above 4500 bales. CCI also, increased the free period to 90 days; 50 % of sale quantity to be lifted in first 45 days and balance 50% in next 45 days
- Cotlook Index remained weak (67.92 cents/lbs) higher compared to the ICE cotton futures that stood steady (62.47 cents/lbs).
- All India arrivals have reached between 15,000 and 25,000 bales per day.
- Indian Rupee remained strong between 74.75 and 75.19 during this week.

**Market Highlights:**

- With the advancement in monsoon, India has received around 388 mm rainfall in July, up by 6% from normal rainfall. Cotton area across India covered around 118 lakh ha as on 24th July'20 for 2020-21 marketing year, up by around 22% during the same period of time last year and 8% short of last year's total acreage. The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) has been almost completed (covering 19.02 lakh ha). In Maharashtra the acreage increased to 40.78 lakh ha while in Gujarat the area is near about same at 21.48 lakh ha compared to corresponding time last year. AP and Telangana received 67% and 35% higher rainfall in July, thus, a surge in acreage is reported in both the states covering 3.42 lakh ha (+121%) and 21.09 lakh ha (+56%), respectively.

- Cotton fields are prone to damage due to continuous rains since last week in Punjab. The cotton crop does not sustain for more than two days of stagnating water. Therefore, crops in few areas in Bhatinda and Mansa have started wilting. As the crop has reached near flowering stage in both the areas, the yield loss might increase if the area receives continuous rainfall in the coming days. The crop condition in Fazilka, Muktsar and Faridkot is also worrisome with heavy rainfall.
- According to the ICRA's forecast, revenue of India's cotton spinning sector will decline by 25-30% during 2020-21 and recovery will be slow. The reason behind it is that the demand has been sluggish after the pandemic affected the global economy. Also, the reduced offtake of cotton yarn and fibre exports reduced as a result of the China and India dispute.
- On 20<sup>th</sup> Jul'20, CCI sold around 5 lakh bales of cotton highest sales in last 5 years. In North India, Punjab purchased 44,000 bales followed by Haryana (12,500 bales) and Rajasthan (16,000 bales). In Central India, the maximum purchase was reported from Maharashtra (2.17 lakh bales), followed by Gujarat (0.715 bales) and Madhya Pradesh (8,500 bales). In South India, CCI sold 20,000 bales in Telangana, 8,900 bales in Karnataka and 1200 bales in Guntur, AP. According to the traders, CCI can sell about 35-45 lakh bales of cotton by the end of the season out of the total procured cotton of 105 lakh bales in 2019-20. CCI and its agencies have in total, procured 1.25 crore bales of cotton in the current year, which is close to one third of the cotton arrivals in the country.

## **Domestic Cotton Prices Scenario**

### **Kapas (Raw Cotton) Weekly Price Scenario**

**Weekly Price Review:** Weekly kapas average price at Rajkot remained steady at Rs. 4722/q. The trade was slowed down in some areas due to rain. The mills were working at lower capacities where the shelter is not proper for keeping stocks.

### Kapas Monthly M-o-M Price Scenario

The arrivals in the month of June declined. The monthly average price was ruling steady to low in June at Rs. 4754/q compared to the prices during the corresponding month of the previous season due to the lower demand this year. Monthly average price of Kapas at Rajkot remained Rs. 4769 per quintal during May, which was Rs. 6275/quintal during the corresponding month last year in Jun'19. We expect Kapas prices to remain steady to low further in July due to the lower demand across the country as well as because of increase in sowing area.

### Spot Price versus MSP

The arrivals increased during the week ending on 23<sup>rd</sup> July'20 in Gondal. Kapas at Gondal market closed at Rs.4605/q, up from the prior week's Rs. 4597/q. Average price in the week was lower by around Rs. 945/q from MSP (Rs.5550/q) though the average gap between the spot price and MSP has decreased in the last week.

### Lint price Outlook

The average price stood around Rs.3548/maund of lint in Sirsa, up by Rs. 15/q though, there were no new arrivals in the Haryana and Punjab. The average price in Bhatinda and Abohar in the last stood around Rs.3568 and Rs. 3536/maund of 37.32 kg each respectively.

#### Lint Price Trend at Key Centers

### Cotton Fiber price Outlook

The average cotton fiber (Shankar-6) of premium quality prices was slightly weak at Rs. 34560/candy from around Rs. 34650/ candy compared to the previous week. The demand was slightly improved in the international market for Indian cotton. Average prices were around Rs. 44,083 per candy last year during the same time. We expect cotton fiber to remain firm in range of Rs. 33500-36000 per candy in the coming week candy.

#### Cotton Fiber (Shankar-6) Price Trend

## Cotton Seed Oil and Cotton Seed Oil Cake

### Cotton Seed Oil weekly Price Scenario

Cotton seed oil prices showed positive trend across all the centres during the week ending on 23<sup>rd</sup> July'20. Weekly average price in Hyderabad stood firm at Rs. 811. In Mumbai the prices ranged around Rs. 851 and Rs.808 per 10 Kg in New Delhi.

	Weekly Average Price as on (Rs/10 kg.)		% Change
	23-Jul-20	16-Jul-20	
New Delhi	808	798	1.15
Rajkot	853	835	2.20
Hyderabad	811	798	1.57
Mumbai	851	842	1.09

### Cotton Seed Oil Cake weekly Price Scenario

The cottonseed oilcake prices were weaker during last week. The prices in Kadi & Akola stood around Rs. 2124/q and Rs. 2018/q, respectively due to low buying despite prices having dropped, amid increased rainfall in Maharashtra and limited demand from local millers. NCDEX Cotton seed oil cake futures ended on a weaker note on Friday at Rs.1794/q against Rs. 1926/q in the prior week. NCDEX COCUDAKL is now getting support at 1742 and below same could see a test of 1662 levels, and first resistance is now likely to be seen at 1905.

Centers	Weekly Average Price as on (Rs/quintal.)*		% Change
	23-Jul-20	16-Jul-20	
Kadi	2124	2167	-2.01
Akola	2018	2077	-2.84

\*Source: NCDEX

### International Market Scenario

Average International ICE cotton prices stood weaker at 63.32 cents/lbs, down by 85 points during the last week. Also Cotlook A index weekly average stood weaker at 67.92 cents/pound this week, which was at 69.06 cents/pound during last week. The main reason for weakening in prices were heightened tensions between China and US including President Trump's statement that the Phase One agreement wasn't a priority for him. For the week ending July 19, the US crop was rated at 47% good or better condition, three percentage points ahead of the previous week's report.

### **Major Market Highlights:**

- U.S. Export Sales was poor but shipments were satisfactory. Net UPLAND sales reductions of 13,100 RB for 2019-2020** were down 25 percent from the previous week and down noticeably from the prior 4-week average. Increases for Pakistan (5,500 RB, including 4,200 RB switched from Indonesia), Vietnam (2,400 RB), Turkey (500 RB, including decreases of 100 RB), and Thailand (200 RB), were more than offset by reductions primarily for Bangladesh (8,800 RB), China (4,400 RB), Indonesia (3,900 RB), and Mexico (2,300 RB). Shipment is satisfactory and will reach USDA target of 15 million bales.
- The demand at the Chinese Reserve auctions has remained good, with sales now exceeding 100,000 tons** since the auctions begun in first week this month, which implies increased mill use. A survey shows Chinese spinners

were operating at more than 60% of capacity. Cotton use has recovered slightly and is steady, but the yarn and fabric sector are still suffering from weak apparel exports due to which the cotton yarn prices are weak.

### Cotlook A Index

Cotlook A index noticed slightly weak in last week. The Cotlook A Index was at 67.92 cents/lb lower than the previous week (69.06 cents/lb) and a hike of 2% is witnessed compared to the previous month.

**China Cotton Index(328)**

## USA Spot Prices

Spot cotton prices stood lower due to weaker demand. U.S. Export sales were very much disappointing as at higher rate there is no buying for U.S. cotton. Competition from other origins like Brazil and India restrict US cotton demand. According to the NASS Crop Progress report released July 20, boll-setting had reached 29 percent completed in Virginia, 26 in North Carolina, and 14 percent completed in South Carolina. Kansas cotton condition was rated mostly fair to good. Squaring was at 76 percent, ahead of 54 last year, and 49 percent for the five-year average.

USA Spot Prices	Monthly Average Price as on		% Change
	23Jul-20	16-Jul-20	
Prices	62.72	63.57	-1.35
Prices in US cents per Pound			

Source: USDA

## Pakistan Spot Prices

The prices stood weaker compared to the previous week more than 1% because of fall in the international prices of cotton. During the last two days of the week the quality of cotton was affected due to arrival of Phutti which was affected by rain. The buying in the last week decreased by the textile mills due to arrival of low quality cotton. The sowing of cotton has completed. The rates decreased in the market due to the panic as in the coming week due to the arrival of Eidul Azha. It is expected that business of cotton will fully resume after Eidul Azha holidays.

### Cotton

#### Technical Commentary:

- Cotton 29 mm MCX Jan contract faces resistance at 16480.
- Relative strength indicator (RSI) is in the neutral region.
- The price closed below moving averages.
- Price decreased & open interested increased indicating short buildup.

We will advise traders to sell today.

#### Strategy: **Sell**

Intraday Supports & Resistances			S2	S1	PCP	R1	R2
Cotton	MCX	Aug	15520	15670	15980	16360	16510
			Call	Entry	T1	T2	SL
Cotton	MCX	Aug	<b>Sell</b>	16100	15970	15850	16178

\* Do not carry-forward the position next day

**Commodity: Cotton Seed oil Cake**
**Contract: Aug**
**Exchange: NCDEX**
**Expiry: Aug 20, 2020**
**Cotton**

**Technical Commentary:**

- Overall Candlestick pattern shows down trend.
- RSI is in the oversold region.
- Prices closed below 9 and 18 days EMAs.
- Both Price & open interest decreased indicating long liquidation.

We will advise traders to sell today.

**Strategy: Sell**
