

COTTON WEEKLY RESEARCH REPORT
10th Aug 2020**Domestic market summary**

Domestic market Scenario: The cotton market showed mixed trend. Big traders and merchants were actively buying CCI cotton stock and reselling the same. The lower arrivals against the demand, created firmness in the market. Indian raw cotton exporters witnessed regular demand in low quality cotton as Indian basis are attractive. The India cotton exchange front month's prices stood firm, around Rs 34,203 per candy. Gujarat Shankar-6 variety cotton spot prices in Cotton Association of India stood steady around Rs.34,960 candy during the week.

Weekly Price Outlook : The average price of Kapas is likely to remain between Rs. 4700-4900/q in Rajkot while the prices in Andhra Pradesh likely to hover around Rs.4300-4650/q.

Major Market Highlights:

- Cotlook index stood strong (69.45 cents/lbs) compared to the ICE cotton future that stood weaker (63 cents/lbs).
- All India arrivals have reached between 10,000 and 15,000 bales per day.
- Indian Rupee stood steady between 74.80 and 75.04 during this week.

Market Highlights:

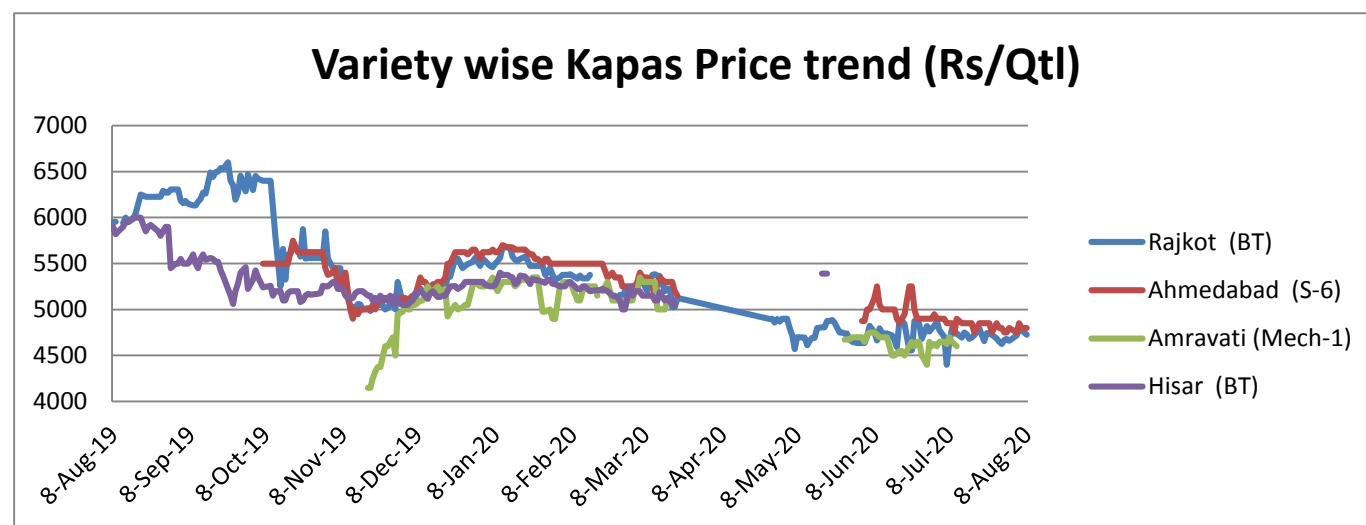

- **Cotton area across India covered around 123.63 lakh ha as on 6th Aug'20 for 2020-21 marketing year, down by around 3.2% compared to the total acreage under cotton last year.** The cotton sowing in the northern part of India (Punjab, Haryana & Rajasthan) covered an area of 19.11 lakh ha. In Maharashtra the acreage increased to 41.37 lakh ha while in Gujarat the area is near about same at 22.48 lakh ha, down by -9% compared to corresponding time last year. In AP and Telangana, a surge in acreage is reported in both the states covering 4.75 lakh ha (+13.9%) and 22.77 lakh ha (+32.1%), respectively.
- **Indian cotton remained cheaper and had negative basis throughout the month comparatively against the world market.** The domestic prices are likely to remain range- bound in August and September until the new crop arrives. The demand for apparels and garments remained low, therefore there are no bullish factors that prices could rise in the coming days based on. While the new crop usually starts arriving from the first week of September in the Northern part of India (Punjab, Haryana and few areas of Rajasthan), full-fledged arrivals starts only from October in the rest of India. The weather plays an important role when the crop is growing; if the unfavorable weather conditions damage the crop in the coming days that could reduce the crop size and delay the arrivals in the new season, thus, the prices might surge from the present range.

- **CCI has sold around 16 lakh bales of cotton in August month so far and totalling to around 22 - 23 lakh bales (2019-20 crop) this season.** Due to the weak logistics at CCI, the buyers are facing delay in delivery. If the frequency of sales continues at the present trend, then there is possibility that CCI could sell another 25-30 lakh bales by the end of September'20, hence improving the liquidity in the market.
- **The cotton crop in Marathwada and Vidarbha region (41.8 lakh ha) in Maharashtra, that was sown in early June, has started flowering.** Thus, the early signs of pink bollworm infestation were also noticed in the fields. Aurangabad, Jalna and Beed, the main cotton growing areas (over 15.9 lakh hectare area is under cotton cultivation) in the Marathwada region have found some traces of pink bollworm as the bud formation has started. The government has issued an alert to the farmers to take precautionary measures against it.
- **The cotton demand from the spinning mills has been hit due to Covid-19 lockdown.** Although the mills have started functioning, there would only be gradual improvement in the demand in the coming months. According to the ICRA's forecast, revenue of India's cotton spinning sector will decline by 25-30% during 2020-21 and recovery will be slow. The reason behind it is that the demand has been sluggish after the pandemic affected the global economy. Also, the reduced offtake of cotton yarn and fibre exports reduced as a result of the China and India dispute.

Domestic Cotton Prices Scenario

Kapas (Raw Cotton) Weekly Price Scenario

Weekly Price Review: Weekly kapas average price at Rajkot was firm at Rs. 4724/q compared to the prior week that traded slightly lower around Rs. 4682/q.

Kapas Monthly M-o-M Price Scenario

The arrivals in the month of July increased slightly. The monthly average price was ruling steady to low in July at Rs. 4713/q compared to the prices during the corresponding month of the previous season due to the lower demand this year. Monthly average price of Kapas at Rajkot remained Rs. 4754 per quintal during June, and Rs. 6177/quintal during last year in July'19. We expect Kapas prices to remain steady in August due to the lower demand across the country as well as because of increased acreage under cotton amid good rainfall.

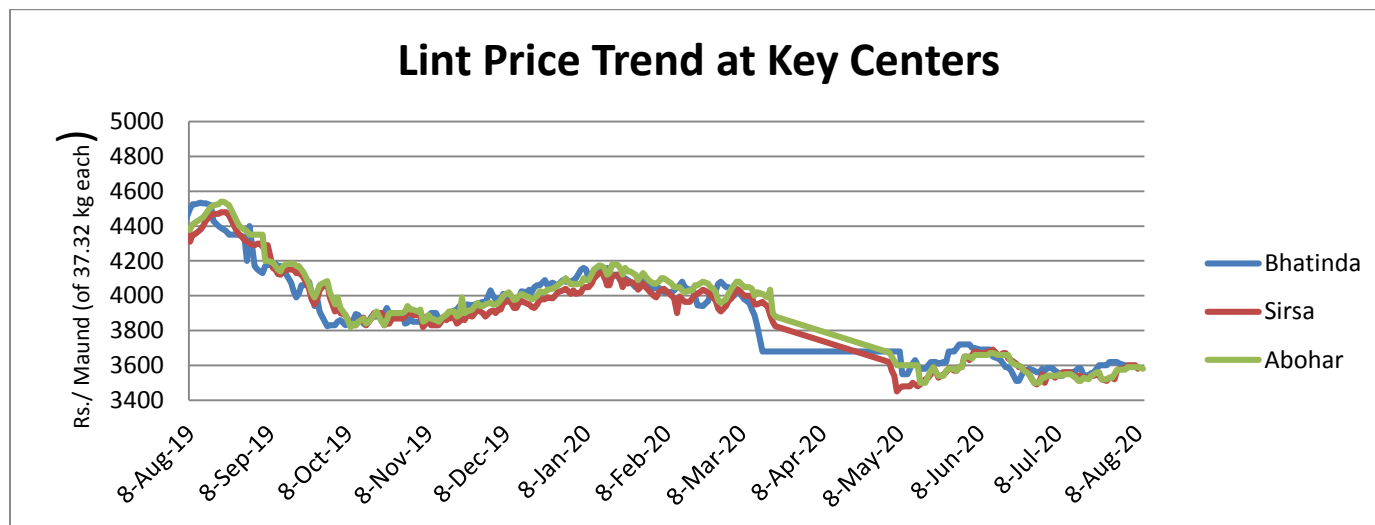

Spot Price versus MSP

The prices slightly decreased during the week ending on 6th Aug'20 in Gondal. Kapas at Gondal market closed at Rs.4656/q, decreased from prior week that stood at Rs. 4665/q. Average price in the week stood low by around Rs. 894/q from MSP (Rs.5550/q). The average gap between the spot price and MSP has decreased in the last week.

Lint price Outlook

The average price stood around Rs.3588/maund of lint in Sirsa, up by Rs. 53/q. The new arrivals are expected to commence after 2nd week of September this year. The average price in Bhatinda and Abohar in the last week stood steady around Rs.3610 and Rs. 3582/maund of 37.32 kg each respectively.

Source: Agriwatch

Cotton Fiber price Outlook

The average cotton fiber (Shankar-6) of premium quality prices was firm at Rs. 34960/candy from around Rs. 34917/candy compared to the previous week. The demand was steady in the international market for Indian cotton but due to the lower arrivals in the domestic market, the market was supported. Average price were around Rs. 42,317 per candy last year during the same time. We expect cotton fiber to remain firm in range of Rs. 34000-36500 per candy in the coming week candy.

Cotton Seed Oil and Cotton Seed Oil Cake

Cotton Seed Oil weekly Price Scenario

Cotton seed oil price showed positive trend across all the centres during the week ending on 6th Aug'20. Weekly average price in Hyderabad stood steady at Rs. 823. In Mumbai the prices ranged around Rs. 878 and Rs.840 per 10 Kg in New Delhi.

	Weekly Average Price as on (Rs/10 kg.)		% Change
	06-Aug-20	30-Jul-20	
New Delhi	840	814	3.17
Rajkot	860	843	1.98
Hyderabad	823	811	1.44
Mumbai	878	864	1.64

Source: Agriwatch

Cotton Seed Oil Cake weekly Price Scenario

The cottonseed oilcake prices were weaker during the last week. The prices in Kadi & Akola stood around Rs. 2058/q and Rs. 1924/q, respectively. The prices dropped due to the lack of demand due to the arrival of low quality cottonseed oilcake. Although the prices might surge with the commencement of the new season in Oct'20. NCDEX Cotton seed oil cake futures ended on a weaker note on Friday at Rs.1754/q against Rs. 1780/q in the prior week. NCDEX Cocudakl is now getting support at 1705 and below same could see a test of 1658 levels, and first resistance is now likely to be seen at 1844.

International Market Scenario

Average International ICE cotton prices stood firm at 63.71 cents/lbs, up by 269 points at 61.02 cents/lbs during the last week. Also Cotlook A index weekly average stood firm at 69.93 cents/pound this week, which was at 66.57 cents/pound during last week.

Major Market Highlights:

- In Pakistan, due to the starting of spell of rains in many areas of Punjab and Sindh the supply of kapas will be decreased as well as the quality will also be affected.** The production of cotton crop might be affected in the cotton producing areas of Sindh because of rains. If rainwater collects in the field, it will damage the crops. Rains also increase the risk of attack of viruses and insects on the crop.
- China cotton yarn imports are estimated to increase by 7.4% to 1.51 LT in Jul'20 compared to the previous month.** According to foreign shipment data in June, cotton yarn imports of China from Vietnam in Jul are estimated at 70,400 tonnes followed by India 20,000 tonnes, from Pakistan 25,200 tonnes, Uzbekistan 15,000 tonnes, and from other regions and countries at 20,000 tonnes. It is expected that the demand in August likely

to remain stagnant as the operating rate of fabric mills declined. The high inventory and lack of demand may put pressure on yarn prices in the country.

- U.S. Export Sales were weaker with sales reductions of 68,500 RB in the week ending on 30th Jul'20 for 2019-2020 were down noticeably from the previous week and from the prior 4-week average.** Increases primarily were reported for Egypt (5,800 RB switched from Turkey), Malaysia (1,400 RB switched from Indonesia), and China (600 RB), were more than offset by reductions primarily for Vietnam (61,300 RB), Turkey (5,900 RB), South Korea (3,500 RB), El Salvador (2,100 RB), and Indonesia (1,800 RB).

Cotlook A Index

Cotlook A index was firm in the last week. The Cotlook A Index was at 69.93 cents/lb higher compared to the previous week (66.57 cents/lb).

USA Spot Prices

The spot prices has gained a 3% rise in last week from its prior week. Although the rise did not stand for longer period and fallen by 4% within one day on last Thursday from 64 cents/lbs to 61 cents/lbs. The events in trade disputes between US and China is being observed closely by the market traders. The traders in the market are anticipating a vengeance over the Trump administration's banning of TikTok and WeChat which could lead to the cancellations of U.S. cotton purchases from China.

Daily Movement of USA Spot Price

Pakistan Spot Prices

Pakistan cotton prices stood slightly firm during last week because the textile and spinning sector took interest in buying. The stability in the price of cotton was also because the big private traders has so far procured most of the cotton bales and is continuously buying. A few ginning factories are starting their operations including in Punjab. The demand of kapas as well as trading volume is increasing. Also, Incentives for the textile sector were announced and a five-year textile policy were being formulated.
