As per trade sources, the demand from feed industry and starch industry reportedly improved during the past week. Prices in Akola market were trading at Rs. 2806 per quintal as compared to previous week Rs. 2877 per quintal. Whereas, Cottonseed Oil prices have fallen by around 5 percent this week. The demand in domestic market was improved as compared to last week and sluggish arrivals also pushing the prices on upper side. Wheat procurement nearing its completion and as of June 29th the procurement of Wheat stood at 187.87 Lakh Metric Tonnes (LMT) which is down by 56.6% from last year. This fiscal year, Uttar Pradesh procurement fall by 94% to 33 LMT as compared to 60 LMT target set by them earlier due to higher exports and sluggish arrivals in market. Officials claim that increasing private purchases for export were the primary cause of the sudden decline in government purchases of wheat. India had exported around 18 LMT of wheat till June 22 while on the other hand wheat flour exports were recorded at 3 LMT till June 14. Around 0.3 LMT of wheat had already been supplied to Afghanistan as humanitarian assistance towards Afghan people. Out of total 15 LMT has been exported to Bangladesh only. Wheat prices may move up in the coming weeks as the domestic demand expected to get improved by Mid of July. If Egypt request for supply is expected, it may boost up prices further. Demand from the International market is expected to be weak, mainly because of bulk harvesting, which may continue to cap uptrend to some extent.

The soy meal prices (Indore) are likely to trade with weak bias tracking Soymeal import and weakness in the global market. Soy meal Indore prices are likely to trade in the range of 48,000 – 52,000/MT.

After for week continuous loss, during the week under review, ICE Canola went up by 3.46% on short covering. According to Agriculture and Agri-Food Canada's (AAFC), Canada's canola supplies declined from last year by 37% to 14.5 MMT due to drop in carry in stocks by 49% and 35% lower production as a result of last summer's drought. Demand for Canadian canola remains firm on a strong world oilseed crush and high prices for competing oilseeds, vegetable oils and protein meals. Disruption of Black Sea exports of sunflowerseed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices.

RM seed Price Outlook for coming week: RM Seed is expected to trade range bound with weak bias amid weak demand from crushers on squeeze in crush margin.

(Prices: Maize-Industrial/Feed Grade: Narela Market)

As per trade sources, the demand from feed industry and starch industry reportedly improved during the past week. As per the sources, Hyderabad starch industry is buying Maize from Nizamabad, Telangana at the delivery rate of Rs. 2,500 per quintal. As the Rabi Maize supply is about to end and the flow of supplies have reduced in Bihar markets, the previously stocked is being released in the Southern as well as Northern markets of the country. Poultry persons in Punjab and U.P are utilizing locally produced Zaid Maize rather than buying Maize sourced from Bihar due to more feasible prices. In M.P starch Maize is trading at the delivery rate of Rs. 2,200 to Rs. 2,400 per quintal of delivery rate.

There were firm sentiments observed in major mandis as compared to previous week. Prices were firm mainly because of slight increase in demand in domestic markets. Rainfall activity is hampering arrivals also a reason for firm prices. We anticipate prices to go up in the coming days.

Outlook: Feed prices are expected to feature sideways bias in coming week.
