Guar Daily Fundamental Report 3rd April, 2014

Domestic Fundamentals:

- Guar prices declined today due to higher arrivals compared to prior day presently, Market is
 moving in a range as farmers bring their guar stocks when the prices surge. However, the
 arrivals decline in case the market crash.
- India is offering Rs 128/kg FOB guar split as reported. Recent surge in Rupee affect the guar splits exports.
- Farmers are likely to sown guar in the coming crop season considering lower remuneration compared to Cotton. It is notable that Cotton needs more attention and farmers have to pay more for plunking. Guar prices are still lucrative for growers compared to their substitute crops as reported.
- Farmers in US have alleged that West Texas Guar hasn't paid anything for their 2013 guar crop. This incident could discourage farmers of US to plant guar for the next season and hurt the program of experimenting guar planting in US.
- Overall prices of guar are falling in spot markets amid fall in prices in NCDEX platform. Stockiest
 are creating artificial panic in the market in order to increase the guar arrivals from farmers in the
 market. This move gives clear indication that stockiest are trying to build their guar stocks at
 lower levels as expected.
- Prices of guar seed likely to test Rs. 4000 per quintal in the coming period.
- Their is an increase in possibility of higher release of guar stock because of emerging opportunity in Chana and Mustard seed in the coming months, so stockiest are expected to release guar stock first which likely to depress the guar prices in the coming period.
- Market is estimating 2.8-3 million tons of guar production for 2013-14.

Outlook: Guar sentiments are weak for medium to long term considering weak demand from International markets, higher carry over stock from last year and higher guar production scenario for current season representing huge surplus of guar stocks in the markets.
