Guar Daily Fundamental Report 24th April, 2014

Domestic Fundamentals:

- Guar market improved sharply today in key markets due to lower arrivals compared to prior day Also firm demand support the prices.
- Prices of guar seed improved from last couple of sessions as markets are discounting the rumors of less rainfall thanks to El Nino predictions by various weather departments.
- Small farmers are now don't want to hold guar due to lesser hope of increase in guar seed prices
 in the coming months. It is notable that guar stocks are now in hands of big stockists and farmers
 and majorly small farmers have release their guar stocks in their local respective markets as
 reported.
- US based organizations are conducting guar cultivation commercially to watch the sustainability
 of guar crop in the region as reported.
- India is offering Rs 128/kg FOB guar split as reported. Recent surge in Rupee affect the guar splits exports.
- Farmers are likely to sown guar in the coming crop season considering lower remuneration compared to Cotton. It is notable that Cotton needs more attention and farmers have to pay more for plunking. Guar prices are still lucrative for growers compared to their substitute crops as reported.

Outlook: Guar sentiments are weak for medium to long term considering weak demand from International markets, higher carry over stock from last year and higher guar production scenario for current season representing huge surplus of guar stocks in the markets.
