

**Domestic Fundamentals:**

- Despite higher arrival from last week, prices moved upward further with the increasing expectation of higher price in coming months. Current pace of arrival may slow down once again despite higher prices as strong sentiments would intend to farmers to retained their stocks with changed markets inner tone.
- Prices of guar seed improved from last couple of sessions as markets are discounting the rumors of less rainfall thanks to El Nino predictions by various weather departments.
- Small farmers are now don't want to hold guar due to lesser hope of increase in guar seed prices in the coming months. It is notable that guar stocks are now in hands of big stockists and farmers and majorly small farmers have release their guar stocks in their local respective markets as reported.
- US based organizations are conducting guar cultivation commercially to watch the sustainability of guar crop in the region as reported.
- India is offering Rs 128/kg FOB guar split as reported. Recent surge in Rupee affect the guar splits exports.
- Farmers are likely to sown guar in the coming crop season considering lower remuneration compared to Cotton. It is notable that Cotton needs more attention and farmers have to pay more for plunking. Guar prices are still lucrative for growers compared to their substitute crops as reported.

**Outlook:** Uptrend in guar seed market continues on the back of increasing fear of drought, lower area coverage and retaining of stock by medium and bulk stockiest. However higher prices encourage some stock holders and farmers to release their stock for availing the benefit of higher prices at current level.
