Guar Daily Fundamental Report 24th May, 2014

Domestic Fundamentals:

- Guar prices improved today in key markets on Friday due to good demand from millers.
- Recent showers in Rajasthan region become the major influencing factor which led the prices
 down of guar from last couple of weeks. Notably, water levels in major dams in Rajasthan are
 not sufficient enough and if El Nino come into affect then prices of guar seed will move up in the
 coming months as expected.
- Meanwhile, stockists are bullish on guar in the coming months ahead due to lower monsoon
 precipitation forecast from various weather agencies. It is notable that future of guar prices are
 totally depend on weather.
- As per expectation of Agriwatch, if monsoon remained normal in the coming months then prices
 will fall upto Rs. 3500-4000 per quintal. However, if monsoon fall short below normal then prices
 of guar seed would go upto Rs. 6000 to 6500 per quintal.
- Major stockists are not releasing stock in anticipation of higher price in the months ahead. Any
 fresh gum demand from foreign buyers might encourage guar price.
- US based organizations are conducting guar cultivation commercially to watch the sustainability of guar crop in the region as reported.

Outlook: Market Is presently getting some downward correction after having recent rallies in the prices thanks to lower monsoon rainfall expectations. However, one should wait for correct direction of the prices which is totally influenced by upcoming monsoon showers.
