AGRIWATCH

Domestic Fundamentals:

- Mixed sentiments recorded in key guar spot markets on Tuesday as markets couldn't find adequate cues to decide the price either side.
- Cotton (Substitute crop of Guar seed) sowing hampers due to low water availability. Germination is not happening for Cotton which might urge farmers to go for Guar sowing in July-Aug as expected.
- India has exported around 9184 tons of guar gum powder and 1940 tons of Guar splits in the week ended 25th May 2014.
- Guar price direction also depends on Cotton sowing which is still going on in Rajasthan. If cotton sowing lowered down this year compared to last year than guar sowing is likely to increase for the coming marketing year.
- Recent showers in Rajasthan region become the major influencing factor which led the prices down of guar from last couple of weeks. Notably, water levels in major dams in Rajasthan are not sufficient enough and if El Nino come into affect then prices of guar seed will move up in the coming months as expected.
- Meanwhile, stockists are bullish on guar in the coming months ahead due to lower monsoon precipitation forecast from various weather agencies. It is notable that future of guar prices are totally depend on weather.
- As per expectation of Agriwatch, if monsoon remained normal in the coming months then prices will fall upto Rs. 3500-4000 per quintal. However, if monsoon fall short below normal then prices of guar seed would go upto Rs. 6000 to 6500 per quintal.

Outlook: Market Is presently getting some downward correction after having recent rallies in the prices thanks to lower monsoon rainfall expectations. However, one should wait for correct direction of the prices which is totally influenced by upcoming monsoon showers.
