Guar Daily Fundamental Report

19th July, 2014

Domestic Fundamentals:

- Guar markets decline sharply today in key markets over rainfall in guar producing regions especially in Rajasthan and Gujarat. However, overall prices sentiments remained bullish for the medium term due to lower planting estimates.
- With increasing momentum of precipitation in guar region, guar sowing likely to start specially in rainfed areas like Rajasthan and Gujarat. Earlier, farmers are thinking to plant castor against guar if rainfall not occur in next 10 days.
- Punters are trying to pull the market down to take long positions at lower levels. From current, we are expecting maximum Rs 200 downside from there prices should rebound.
- Meanwhile, satellite picture clearly suggest that monsoon rainfall likely to hit Western Rajasthan and Gujarat in the near term which might decline the prices.
- Guar germination will drying if monsoon rains not come within a week specially in irrigated areas like Haryana and north Rajasthan.
- Rajasthan farmers likely to grow 20% less guar this year in their respective fields as expected. Farmers are more interested in growing cotton, moong, moth etc this time against guar as reported.
- Guar sowing in irrigated belt of Haryana is going on and as per our preliminary survey; guar acreage in Haryana is likely to decline by 8-10% compared to last year.

Outlook: Prices of guar are currently moving in a weak tone over rainfall. However, overall price trend should remain bullish for medium term due to lower guar sowing compared to last year.
