

Guar Daily Fundamental Report 04th Aug, 2014

Domestic Fundamentals:

- Mixed sentiments recorded in key guar spot markets on Saturday as markets couldn't find adequate cues to decide the prices either side.
- Guar Seed and Gum Markets witnessed lower circuit from last three consecutive trading days in NCDEX futures platform. Good precipitation in guar producing regions especially in rainfed areas of Western Rajasthan like Bikaner, Ajmer, Jaipur etc. contribute the sowing progress of guar seed. It is notable that market participants are in bull state due to weak monsoon data. However, consecutive days rainfall in these regions change the sentiments to bearish for shorter period.
- Farmers are thinking not to divert their crop sowing pattern from guar to other crop in Alwar region. Normally, farmers plant wheat after guar in Alwar but delay in rainfall this year unable farmers to plant 180 days guar crop.
- Farmers have around 27% guar seed holding in Rajasthan state as reported.
- Ministry of Agriculture in North Darfur (Region of West Sudan) allotted 10000 acres to cultivate guar seed crop this season. Govt encourage farmers to plant more guar crop as it can increase their incomes and can also make their soil fertile.
- Still there is pretty less rainfall in Kutch, Banaskantha, and Patan area which urge farmers to plant castor and Cotton over guar.
- Gujarat got some rainfall last week especially Sabarkantha and Mehsana region as reported.
 Reportedly, only 35-40% rainfall deficit against normal reported in these regions this week which was 80-90% last week.

Outlook: Prices of guar are currently moving in a weak tone over rainfall. However, overall price trend should remain bullish for medium term due to lower guar sowing compared to last year.
