

**Domestic Fundamentals:**

- Mixed sentiments recorded in key guar spot markets on Tuesday as markets could not find adequate cues to decide the prices either side.
- Reportedly, 40% less yield in Haryana region for guar seed. Lower rainfall become the major factor for lesser yield.
- Crop quality in Ganganagar region remained good due to even rainfall as reported. Expectedly, farmers will get 4 quintal per bigha yield from guar this season.
- With increasing guar arrivals in key markets, recent hike in prices would curb in the coming days as expected.
- Guar crop is drying in Barmer region due to warmer days and lack of rainfall which affect the yield. According to estimates, guar yield would lie between 30-50 kg per bigha which normally comes at 1quintal per bigha in Barmer district.
- India has exported 51723 tons of guar products in Sept 2014 which is slightly down compared to last month guar exports. It is notable that India exported 53581 tons of guar products in Aug 2014.

**Outlook:** Guar prices likely to decline in the coming days considering increasing guar arrivals. However, overall sentiments remained bullish due to lower guar acreage and yield expectations.

**NCDEX Guar Seed Future Quotes:**
