### Guar Daily Fundamental Report

24<sup>th</sup> Dec, 2014

#### **Domestic Fundamentals:**

- Mixed sentiments recorded in key guar spot markets on Tuesday as markets couldn't find adequate cues to decide the prices either side.
- With higher degree of increase in guar seed prices compared to gum prices, market is losing its bullish strength. Fresh selling is expected in the coming days ahead considering weak demand of guar seed and lower crude oil price expectations.
- Total all India arrivals are presently 45000 bags as reported.
- We expect prices to test Rs 4600-4650 in the coming sessions from where sellers will again take control of the market. With lower crude oil targets, we expect prices of guar seed to test Rs 3700-3800 per quintal in the coming days for January contract.
- Guar seed area likely to go up in the coming year as farmers are likely to shift their cropping
  pattern from Cotton to Guar. Farmers are currently holding Cotton this year and are not able to
  fetch satisfactory remuneration from Cotton. In the meantime, less guar seed crop and less
  water availability for sowing of Guar seed for the coming marketing year likely to surge the prices
  up. Higher prices of guar seed in the month of April to May urge farmers to plant more guar seed
  in the next marketing year.

**Outlook**: Guar prices taken a sharp downside due to heavy speculation at higher levels.
