GRIWATCH

Domestic Fundamentals:

- Guar prices surge today in key markets due to weaker arrivals. However, over demand is weak.
- Arrivals of guar seed should decline in the coming weeks as per our expectation as farmers will start harvesting their new mustard seed crop from 3rd week of February onwards.
- Higher participation/buying of retail players also curb any major hike in prices in the coming weeks as expected.
- India has exported 24841 tons of Guar Products (Gum, Splits & Meal) in the month of January 2016 which is 58% lower export figures compared to last year. Out of the total guar exports, 20094 tons of Guar gum powder, 2515 tons of Splits and 2232 tons of Guar meals exported in January 2016.
- Guar meal total exports for the month of January 2016 declined sharply by 74% compared to last month due to weak demand from overseas.
- Daily around 30000-35000 bags of guar seed arrive in the market as reported.
- Ratio of guar seed to gum improved slightly this week to 1.75 which in the earlier week was 1.74. Higher decline in guar seed prices compared to guar gum increased the ratio.
- Prices are likely to trade in a range between Rs 2900-3300 per quintal in the coming weeks.

Outlook: Prices are likely to recover upwards in the coming trading sessions as expected as farmers are now starting releasing their old stocks which traders and big players are trying to pick up which will support the prices in the near term.
