#### **Domestic Fundamentals:**

- Mostly weak sentiments reported among major spot market on Friday amid lower arrivals.
- Guar seed future July contract remained weak and touched a low of Rs 3622.00 per quintal before closing at Rs 3605.50 per quintal. Guar has breached support level of Rs 4100 per quintal and is likely to touch Rs 3450-3500 per quintal in near future. Export demand is normal. Downtrend is likely to continue although small technical recoveries can be expected.
- As per Rajasthan Metrological department, monsoon may be delayed by a week. Guar is one of the main Kharif crop. Major parallel crops in irrigated areas include cotton and paddy, whereas in rain fed areas major parallel crops include Moong, Moth and Urad. All the parallel crops have MSP and guar doesn't. Furthermore, most of the parallel crops are offering more returns compared to guar. Therefore, if current situation continues we may see a lower acreage in the season.
- As per latest update, India has exported 494101 tonnes of guar seed products in 2017-18. Of the total quantity around 321923 tonnes is guar gum, 127437 tonnes is guar meal and 44740 tonnes is guar split. Exports of guar seed products have increased by 17.66 percent in 2017-18 compared to previous year. Higher exports have helped in reducing stock position. Export demand is likely to stay good in coming weeks.
- The wholesale price index of guar seed has decreased from 91.3 in April 2018 to 88.7 in May 2018. The WPI for May 2018 is up by 4.5 compared to last year for the same month and by 21.0 percent compared to May 2016. WPI is expected to stay week in coming months.
- All India weekly average prices decreased by 0.52 percent to Rs. 3382.56 per quintal during the week ended 15th June 2018. Guar seed average price were ruling at Rs 3400.08 per quintal during 01-08 June 2018. As compared to prices in the week 09-15 June 2017, the prices are firm by 0.93 percent. Prices are expected to remain steady to weak in coming days.
- Prices of guar seed and guar gum are falling continuously as guar has entered in seasonal downtrend. Many traders in market are attributing the fall in prices to slick water chemical supplied by china. This chemical is not a perfect substitute for guar gum. Furthermore, this chemical supplied by china is expensive compared to guar gum supplied by India. The price of chemical is higher by around \$ 600-700 per tonne. Speculative trading is harming the guar industry and distress selling is putting more pressure on falling guar prices.
- As per trade sources, export of guar gum has declined in the month of April. Exports in the month of April are down by around 7.4% compared to previous month. India exported around 27283 tonnes of guar gum in the month of April at an average FoB of \$ 1884.03 per tonne.

Outlook: Prices are likely to move weak in coming days.
