

Domestic Fundamentals:

- Mostly weak sentiments reported among major spot market on Saturday amid higher arrivals.
- Acreage for guar seed is expected to be lower this year due to lower returns in guar compared to other competitive crops. Government has declared higher MSP for Kharif crops. Farmers are more likely to sow cotton, Paddy, moong, etc. Fallow land may also increase in Rajasthan during Kharif season as farmers may forego guar to sow chickpea in Rabi season.
- All India average monthly prices for guar seed decreased by 7.06 percent from Rs 3410.91 in May to Rs 3170.10 per qtl in June-2018. Average price (June) is lower by 3.27 percent compared to Rs 3277.2 per qtl (June-2017). Guar prices are expected to remain steady to weak in upcoming weeks.
- As per data released by Baker Hughes the number of oil rigs in USA has decreased to 1047 as on 29th June 2018 down by 5 compared to last week and up by 107 compared to 30th June 2017. The total number of oil rigs was recorded at 2179 worldwide in May'18 compared to 2096 in the same month last year. Although the number of oil rigs is rising but alternatives to guar gum are slightly affecting exports from India.
- Guar korma has provided huge support to guar industry this year. Guar korma has been the third largest exported commodity derived from guar. Demand for roasted guar korma is high. Roasting guar korma increases its protein content. Millers/Processors margins have improved as their total returns have increased against their total cost. Export demand for guar gum is normal. Overall downtrend is likely to continue in guar seed although small technical recoveries can be expected.
- As per trade sources, export of guar gum has increased in the month of May by 18.51 percent compared to previous month. India exported around 32331 tonnes of guar gum in the month of May at an average FoB of \$ 1838.08 per tonne compared to 27282 tonnes in April at an average FoB of \$ 1884.02 per tonne. Export demand is normal as of now.
- As per trade sources, export of guar split has increased in the month of May. Exports in the month of May are up by around 86.20% compared to previous month. India exported around 5480 tonnes of guar split in the month of May at an average FoB of \$ 1460.89 per tonne. Of the total quantity around 3060 tonnes and 2000 tonnes has been exported to China and United States respectively.
- As per latest update, India has exported 494101 tonnes of guar seed products in 2017-18. Of the total quantity around 321923 tonnes is guar gum, 127437 tonnes is guar meal and 44740 tonnes is guar split. Exports of guar seed products have increased by 17.66 percent in 2017-18 compared to previous year. Higher exports have helped in reducing stock position.

Outlook: Prices are likely to move firm in coming days.
