

Domestic Fundamentals:

- Mostly weak tone are featured in Guarseed and Guargum spot markets today. Arrivals are reported in mixed zone at major trading centers today.
- All India weekly average prices are lower by 2.64 percent to Rs. 3444.97 per quintal during the week ended 28th Feb 2020. Guar seed (Cluster bean seeds) average price were ruling at Rs. 3538.63 per quintal during 16th to 23rd February 2020. As compared to prices in the week 24-28 February 2019, the prices are lower by 10.78 percent. Prices are expected to move in steady to weak tone in coming days on less demand of crushers due to weak demand of gum in the overseas market. However, Guarseed and Guargum prices may boost up again during May to June 2020. However, fear of spreading coronavirus in worldwide is the negative factor for gum prices. However, Churi prices may decline in summer season because of other alternative products availability for cattle feed but Korma is likely to rise in expectation of good demand.
- Currently, steady prices of Churi and Korma is also affecting to guar seed prices. Guar seed and Guargum future prices of March month contracts declined today on selling pressures today. Guar and Gum prices in spot markets are likely to trade in weak zone in next day amid weak demand of millers and weak sentiments in the global markets.
- As per the Agricultural and Processed Food Products Export Development Authority, India shipped 19% lower guar derivatives products to 267823.67 MTs in the first eight month of this financial year against 330974.88 MTs in 2018-19 during the corresponding period of time. India is likely to export 20 % lower guar derivatives in 2019-20 (Apr-Mar) on account of poor demand for guar gum from the U.S. as it has started to use other alternatives of gum. Weak crude oil prices and declining numbers of oil rigs have also weakened U.S. demand for gum. Polyacrylamide, carboxymethyl cellulose, xanthan gum, and partially hydrolyzed polyacrylamide are the major alternatives products of guar gum and likely to replace and affect demand of gum in this year. Exporters expect 20% lower shipment in the range of 280,000-300,000 tonnes in this fiscal year. However, guar meal exports are likely to increase by 17% to 175,000 tonnes in this year as demand is rising due to its higher amino acid profile and overseas buyers are switching from soymeal to guar meal. Good exports demand of guar meal is supporting guar meal prices to rise.
- As per data released by Baker Hughes, the number of oilrigs in USA has lowered by 1 to 791 as on 21st February 2020 compared to 790 in last week and down by 256 compared to 22nd Feb 2019. Total number of oilrigs was recorded at 3957 in Janaury'20 compared to 4259 in the corresponding period in last year. Therefore, exports are being slightly affected.
- As per trade sources, export of guar split has increased in the month of January-20. Exports in the month of Janaury-20 are higher by around 60.38% compared to previous month. India exported around 3400 tonnes of guar split in the month of January-20 at an average FoB of \$ 1241 per tonne. Of the total quantity, around 2180 tonnes have been exported to China.
- As per trade sources, export of guar gum has increased in the month of Janaury-20 by 30.37 percent compared to previous month. India exported around 23178.89 tonnes of guar gum at an average FoB of \$ 1710.37 per tonne in the month of January-20 compared to 17779.68 tonnes in December-19 at an average FoB of \$ 1830.69 per tonne. Exports are expected to decline in February-20 on weak demand of U.S. & China.

Outlook: *Guarseed and Guargum prices are likely to trade in steady to weak zone in next day.*
