

Domestic Fundamentals:

- Mixed sentiments recorded in key guar spot markets on Monday as markets could not find adequate cues to decide the prices either side.
- Spot demand of guar seed witnessed at lower rates which will give hint of recovery in prices in the next 1-2 months.
- Farmers are shifting towards guar seed crop from Bajra this year due to late rainfall especially in West Rajasthan. Bajra sowing time has elapsed due to late rainfall which bound farmers to go for guar seed sowing despite of lower guar seed prices.
- Decline in guar seed prices discourage farmers in Gujarat to plant guar seed in their respective fields. Good rainfall in Gujarat enables farmers to plant castor seed (alternative crop of guar seed) this crop year.
- Exports figures for guar gum, splits and meal are not very encouraging at the moment. Till the end of second week of July, India has exported 10743 tons of guar byproducts. With falling crude oil prices, exports of guar gum and powder is tumbling. Considering current W-o-W exports, we expect around 23000 tons of guar products export in the month of July which is approx. 58% down compared to prior year.

Outlook: Guar price likely to recover from recent lows due to crop damage in parts of Rajasthan and Gujarat as reported.
