

## **Executive Summary:**

- In Ahmadabad region of Gujarat, poultry feed makers quoted maize steady at Rs. 1350 per quintal while starch feed makers quoted it down by Rs. 10 per quintal to Rs. 1350 per quintal compared to previous day.
- In Maharashtra, maize prices are likely to increase in near term due to increase in demand from Gujarat feed makers.
- As per Agriwatch trade sources, in Andhra Pradesh, maize acreage has increased around 20% during Rabi season. Also looking at current weather conditions, we expect good crop production compared to last year while in Nizamabad, maize production is likely to be same compared to last year and is likely to trade steady to range bound in near term amid sluggish demand.
- In Davangere, maize is likely to trade steady to range bound in near term amid sluggish demand. In Davangere, about a 70% of the material arriving in the market is still infested with fungus. In the affected lots, between 2 to 8% of the grains are infested.
- In Bihar, maize production is expected to be almost same compared to last year despite increase in area as
  there is chance of yield loss. Bihar crop is expected to be delayed and likely to hit the market in the month of
  April.
- As per Ministry of Agriculture in India, maize has been sown in around 16.96 lakh hectares as on 9th February'18 for Rabi season (2017-18) which is higher than 16.55 lakh hectare covered during corresponding period last year.

### **International Market Commentary:**

- Corn prices on CBOT rose yesterday by 0.89 USD/MT to 145.07 USD/MT for March'18 contract on the expectation of less production in Argentina due to drought and increase in demand for U.S. corn.
- As per USDA, U.S corn exports reached 16.49 MMT in the 2017-18 marketing year. At 0.85 MMT (for the period 2nd February –8th February, 2018) U.S corn exports were down 1 percent from the previous week and 2 percent from the previous 4-week average. The destinations were primarily to South Korea (206,000 MT), Peru (203,800 MT), Mexico (184,500 MT), Japan (118,800 MT), and Colombia (36,500 MT).
- IGC decreased its forecast for 2017/18 global corn production by 6 MMT to 1048 MMT compared to previous forecast due to low maize output prospects in Argentina, Brazil and South Africa. Forecast for global corn ending stock was also decreased by 8 MMT to 314 MMT compared to last forecast for 2017/18.

Outlook and Recommendation: Maize cash market is likely to trade steady to range bound in the near term.
