

27<sup>th</sup> June, 2020

### Executive Summary:

- In Telangana, maize has been sown in 16,175 acres as of 24th Jun'20 which is higher than 7,658 acres compared to corresponding period last year. In A.P, maize has been sown in 7090 hectares as of 24th Jun'20; higher than 2895 hectares compared to corresponding period last year. Pests and diseases are nil till date.
- In Rudrapur region of U.P, starch feed makers are buying maize at Rs.1375-1380 per quintal; sourced from naugachia region of Bihar while in Telangana, local starch feed makers are buying maize at Rs. 1300 per quintal. Maize is also moving towards Bengaluru at Rs. 1600 per quintal (Delivered Price); sourced from Davangere region of Karnataka.
- In Bihar, despite the local stockists' demand and also export demand of Bangladesh and Nepal feed makers, maize is being traded at Rs. 1250 per quintal (Bilty Price). Recent rains in Bihar has affected the arrival quality. It is expected that maize could trade steady to range bound in near term amid limited demand.

### Previous Updates:

- In India, maize has been sown in 10.43 lakh hectares as of 19th Jun'20 which is higher than 5.25 lakh hectares compared to corresponding period last year.
- As per trade sources, in Telangana, harvesting of rabi crop of maize has completed while in Bihar regions, maize crop has been harvested around at 80% and in Karnataka, maize crop has been harvested at 60-65% till date.
- In Nizamabad, maize is likely to trade steady amid limited demand and arrival.
- As per trade sources, India exported around 19,934 MT of maize for the month of May'20 at an average FoB of \$205.76/ MT. Out of which, around 15,364 MT Indian maize was exported mainly to Nepal at an average FoB of \$193.74/MT; mainly through Raxaul followed by Sonauli ICD, Jogbani ICD and Nepalgunj Road port.
- Maize acreage in Kharif 2020-21 may turn out to be more or less same than that in Kharif 2019-20 as one side, farmers would prefer less labour intensive crops. Expectation of good monsoon amid increase in MSP by Rs. 90 per quintal at Rs. 1850 per quintal for the Kharif season 2020-21 and reward offering by Haryana government from water guzzling paddy crops to maize; are all good motivating factors for farmers to grow more maize for this Kharif season. However, on the other side, low prevailing market prices could be a major factor to shift towards more remunerative and high yield crops like pulses.
- As per AP markfed, from the current rabi crop, 3,80,933 MT of maize has been procured by A.P government as of 17th June,2020.
- As per media sources, Telangana State Cooperative Marketing Federation (TS-Markfed) has procured maize about 6.94 lakh tonnes as of 25th May,2020; out of estimated production of 14.16 lakh tonnes (Agriwatch estimates). The decision of the agency to close purchasing operations on May 31 was unexpected, as the government had earlier said they would procure 100% of the production.
- The Cabinet Committee on Economic Affairs (CCEA) has approved the increase in MSP of maize by Rs. 90 per quintal to Rs. 1850 per quintal for Kharif crop for marketing season 2020-21.
- As per trade sources, India imported around 268.5 MT of maize for the month of April'20. Out of this, around 193.5 MT was imported from Myanmar at Kolkata port (145.5 MT @ \$261.04 USD/MT) and Chennai port (48 MT @ \$249.98 USD/MT).

### International Market Commentary:

- Corn on CBOT fall by 2.76 USD/MT to 124.90 USD/MT for July'20 contract compared to previous day. Further, price direction depend on the demand for U.S corn.
- As per USDA, U.S corn exports reached 32.44 MMT in the 2019-20 marketing year. At 1.31 MMT (for the period 12th June- 18th June, 2020) US corn exports were up 50 percent from the previous week and 16 percent from the previous 4-week average; mainly for the destinations like Mexico (397,400 MT), South Korea (201,500 MT), Japan (146,400 MT), Israel (88,200 MT), and Peru (87,000 MT). Agriwatch expects that increase in export demand for U.S corn could give support to CBOT corn market.
- IGC increased its global corn production forecast for 2020/21 by 3 MMT to 1172 MMT compared to previous month forecast. Forecast for global corn ending stock was also up by 8 MMT to 296 MMT for 2020/21 compared to last month forecast which could weigh on international corn market.

**Outlook and Recommendation:** Maize cash market is likely to trade steady to range bound in the near term.
