### Executive Summary:

- In Bihar, despite the export demand from Bangladeshi and Nepalese feed makers, maize is being traded at Rs. 1250-1275 per quintal (Bilty Price). Maize is being delivered to Kolkata at Rs.1450 per quintal; sourced from Bihar. Hyderabad poultry feed makers are buying maize at Rs. 1500 per quintal; sourced from Nizamabad region.
- As per trade sources, around 25% crop loss could be due to heavy rains in M.P regions. However, exact loss assessment could be after when weather conditions becomes favourable or when rains stop. This crop loss could lead to maize prices in near future.

- As per Telangana agri department, maize is at cob formation to seed hardening stage. Agriwatch trade sources revealed that decrease in acreage is mainly due to encouragement by Telangana Government, to shift towards other remunerative crops like cotton but that decrease can't be more than 25%. Also, fall-armyworm and stem-borer in Nizamabad, Mahabubabad and Nagarkurnool districts is below ETL. Agriwatch expects that decrease in acreage would support to maize prices in the state.

### International Market Commentary:

- U.S corn exports have reached 42.16 MMT in the 2019-20 marketing year. At 0.94 MMT (for the period 14th Aug - 20th Aug, 2020) US corn exports were down 22 percent from the previous week and 10 percent from the previous 4-week average; mainly for the destinations like Mexico (255,300 MT), Japan (227,600 MT), Colombia (219,100 MT), China (135,400 MT), and Canada (33,300 MT). However, expectation of increase in export demand for U.S corn in coming weeks would support to CBOT corn market.
- IGC increased its global corn production forecast for 2020/21 by 2 MMT to 1166 MMT compared to previous month's forecast. However, forecast for global corn ending stock was kept unchanged at 288 MMT for 2020/21, same as last month's forecast, due to increase in consumption estimates.

**Outlook and Recommendation:** Maize cash market is likely to trade steady to slightly firm in the near term.
