Maize crop is at cob formation to seed hardening stage. Agriwatch trade sources revealed that decrease in acreage is mainly due to encouragement by Telangana Government, to shift towards other remunerative crops like Tur, Cotton and Soybean. Agriwatch expects that decrease in acreage would support to maize prices in the state.

 custom duty of 15 % under TRQ Scheme for end users, in the current financial year 2020-21. At present, there
 is no import parity as maize is trading lower in the domestic markets due to demand destruction from poultry
 feed industry on the fear of corona virus, hence there has been negligable imports. But it could limit the upside
 in the long run.

Agriwatch expects that decrease in export demand for U.S corn would weigh on CBOT corn.
- IGC decreased its global corn production forecast for 2020/21 by 6 MMT to 1160 MMT compared to previous month's forecast due to reduction in production forecast for U.S, China and EU.
