**International Market Commentary:**

- Corn on CBOT fell by 3.15 USD/MT to 215.54 USD/MT for March'21 contract compared to previous day due to profit booking.
- As storms in major production areas of Brazil disrupted fieldwork, threatening to slow export shipments from one of the world's major suppliers.
- As per USDA, U.S. Maize exports have reached 24.16 MMT in the 2020-21 marketing year. At 1.19 MMT (for the period February 12- February 18, 2021) U.S. Maize exports were down 14 percent from the previous week and 11 percent from the prior 4-week average; mainly for the destinations like Mexico (321,100 MT), Japan (226,700 MT), Vietnam (146,200 MT), China (144,300 MT), and Peru (110,300 MT). However, Agriwatch expects that increase in export demand for U.S. Maize in near term would support CBOT Maize.

**Outlook and Recommendation:** Maize cash market is likely to trade steady to slightly firm in the near term.
