### Weather Updates:

- As per the latest update of Indian Meteorological Department (IMD), the SW Monsoon (SWM) so far has covered the entire southern part of the country along with eastern, NE state and most of the parts of Madhya Pradesh and southern Gujarat region. The pre-monsoon showers have covered almost the entire Rajasthan except some parts of central and southern Rajasthan. As on June 26th, the cumulative rainfall % departure country as a whole, again came down to -7% which reached at break even on June 22nd (at par with normal).
- For upcoming days it's expected that by July 6th Southwest Monsoon would be covering remaining parts of India as well. With this we can expect that in Maharashtra and M.P Maize sowing would proceed further with good pace.

### International Market Updates:

- As per U.S Corn planting report as of 27th June 2022, 67 % of Corn was in good to excellent condition this week against 70 % during past week and 64 % for the same time period during last year. Also, 4 % of Corn crop was in silking stage.
- Closing price of Corn on CBOT rose by 6.00 USD to 299.000 USD per MT as compared to previous day's closing price of for July 22 contract, on the suspicions regarding lower Corn crop estimates from South Africa. However, AgriWatch, expects Corn on CBOT to display a consolidation trend during upcoming near term.

**CBOT Corn Daily Futures Price Listing (USD/MT) as on 28 June , 2022**

### Outlook and Recommendation:

- AgriWatch expects, range bound price movement of Maize during the coming near term, since domestic as well as export demand continues to remain sluggish and also there has been decline in the arrivals reaching markets on the account of decreasing Rabi Maize in the market.
- Buying excess quantity of Maize under current prices would not be a wise discussion with respect to the expectation of a good return in medium to long term.
